(b) If, in the judgment of the coroner, medical examiner, or designee specified in par. (a) the vascularized organ may be necessary in determining the cause of death, the coroner, medical examiner, or designee may order a biopsy of the vascularized organ or, if the coroner, medical examiner, or designee is present during the scheduled removal, he or she may deny removal of the vascularized organ. If denial of removal is a possibility, the organ procurement organization shall make a good faith effort to consult with a forensic pathologist designated by the coroner, medical examiner, or designee as to the pathologist's opinion concerning the necessity of the vascularized organ in determining the cause of death. If the biopsy is ordered or the removal is denied, the coroner, medical examiner, or designee shall specify, in writing as part of any death report required under ch. 979, any reasons for determining that the vascularized organ may be involved in the cause of death.

(c) For a decedent specified under par. (a), as authorized under the requirements of this section by the coroner, medical examiner, or designee with jurisdiction over

3. Upon receipt of a notification under subd. 2., the tissue bank so notified, if willing to receive the tissue donation, shall contact a reasonably available person, under the priority established in sub. 4. If the coroner or medical examiner informs the hospital that subds. 2. and 3. apply and that consent has been given for an anatomical gift, the hospital shall transfer the decedent to the coroner or medical examiner.

(b) When a decedent is within the custody of a coroner or medical examiner, the death occurred outside a hospital or the decedent was transferred to the coroner or medical examiner under par. (a) 4., and the coroner or medical examiner refers the decedent as a potential tissue

donor, any such referral shall be made under the following conditions:
