

Chapter NR 666

APPENDIX XI

LEAD-BEARING MATERIALS THAT MAY BE PROCESSED
IN EXEMPT LEAD SMELTERS***A. Exempt Lead-Bearing Materials When Generated or Originally Produced By Lead-Associated Industries¹***

Acid dump/fill solids	solids from lead-associated industries (e.g., K069 and D008 wastes)
Sump mud	Spent grids, posts, and separators
Materials from laboratory analyses	Spent batteries
Acid filters	Lead oxide and lead oxide residues
Baghouse bags	Lead plates and groups
Clothing (e.g., coveralls, aprons, shoes, hats, gloves)	Spent battery cases, covers, and vents
Sweepings	Pasting belts
Air filter bags and cartridges	Water filter media
Respiratory cartridge filters	Cheesecloth from pasting rollers
Shop abrasives	Pasting additive bags
Stacking boards	Asphalt paving materials
Waste shipping containers (e.g., cartons, bags, drums, cardboard)	¹ Lead-associated industries are lead smelters, lead-acid battery manufacturing, and lead chemical manufacturing (e.g., manufacturing of lead oxide or other lead compounds).
Paper hand towels	<i>B. Exempt Lead-Bearing Materials When Generated or Originally Produced By Any Industry</i>
Wiping rags and sponges	Charging jumpers and clips
Contaminated pallets	Platen abrasive
Water treatment sludges, filter cakes, residues, and solids	Fluff from lead wire and cable casings
Emission control dusts, sludges, filter cakes, residues, and	Lead-based pigments and compounding pigment dust
