

Chapter NR 234

FERTILIZER INDUSTRY

(Interim Effluent Limitations)

NR 234.01 Purpose
NR 234.02 Applicability

NR 234.06 Table of interim effluent limitations

Note: Pursuant to chapter 147, Wis. Stats. and under the procedure of section 227.027, Wis. Stats., the department of natural resources has promulgated interim effluent limitations which were in effect for one year. These interim effluent limitations will be periodically replaced by permanent effluent limitations.

NR 234.01 Purpose. The purpose of this chapter is to establish interim effluent limitations for discharges from fertilizer industry point sources identified herein as authorized by section 147.04(5), Wis. Stats.

History: Cr. eff. 2-28-75.

NR 234.02 Applicability. These limitations apply to sulfuric acid plants burning sulfur. Other interim effluent limitations in Wis. Adm. Code chapter NR 217 are applicable to discharges from facilities which do not fit the classification of this chapter or to which the limitations of Wis. Adm. Code chapter NR 232 do not apply.

History: Cr. eff. 2-28-75.

NR 234.06 Table of interim effluent limitations

Subcategory	TSS	Iron	Other	
(1) Sulfuric Acid	25.0	1.0	Arsenic	0.25
			Selenium	0.5
			Vanadium	1.0

Note: Limitations are in pounds per 1000 tons of product.

History: Cr. eff. 2-28-75.
