

(19) "Trap net" means a device constructed of netting, which may employ wings or wings and leads, directing the movement of fish through a tunnel of netting into inner hearts or built-in forebays wherein they are trapped by their own movement. Such nets may be referred to as shallow trap nets, submarine trap nets or deep water trap nets but shall not include drop nets or fyke nets.

(20) "Trawl" means a large conical bag of netting to which are often attached wings of netting, which is towed in the water and captures fish by scooping rather than encircling them. The mouth of the bag is normally kept open laterally by 2 large boards, one on each side so rigged that they serve to spread the entire net, and these boards are secured to towing lines running to the vessel or vessels engaged in towing the net through the water.

(21) "Trawl cast" means the single placement, towing and retrieval of a trawl.

(22) "Stretch measure" means the extension measure of net mesh size whenever the size of mesh of a net is specified. Stretch measure means the distance between the extreme angles of any single mesh.
