9. Deer quotas. a. The department will issue party permits or hunter's choice permits in sufficient numbers to assure the harvest of the number of deer for each quota area indicated in subd. e.

b. Quota areas are composed of single management units or parts of units, the boundaries of which are established in s. NR 10.28, Wis. Adm. Code.

c. In each quota area, the number of party permits or hunter's choice permits to be issued to harvest the indicated number of deer is determined by an average of the hunter success rates from the most recent 3 previous seasons or by an average of fewer seasons where a 3-year average is not available. In establishing a quota for an area without an adequate history of party permits or hunter's choice permits, the average success rates of similar quota areas are applied or the department shall estimate an anticipated success rate.

d. Party permit or hunter's choice permit success rates used to compute the number of permits to be issued for each quota area are those published by the department in annual deer season reports except where no previous history of success rates exist.
