(a) *Purpose.* The department shall issue Class A bear licenses in sufficient numbers to assure maintenance of bear populations for each zone indicated in par. (d).

(b) *Quota formula.* In each black bear management zone, the number of Class A bear licenses to be issued to harvest the desired numbers of bear shall be based on hunter success rates from previous seasons. In establishing licenses for a zone without an adequate history of licenses, the average success rates of similar zones shall be applied or the department shall estimate an anticipated success rate. The license number formula is:

$$\text{License number} = \frac{\text{Bear to be harvested}}{\text{Hunter success rate}}$$

(c) *Success rate formula.* Hunter success rates used to compute the number of Class A bear licenses to be issued for each zone shall be those calculated by the department from annual bear season harvest reports except where no previous history of success rates exist. The license rate formula is:

$$\text{Hunter success rate} = \frac{\text{Number of bear harvested}}{\text{Number of licenses issued}}$$

(d) *Population goals.* The fall pre-hunt black bear population goal is as follows:

| Zone | Population Goal |
|------|-----------------|
| A | 4,600 |
| A1 | 3,300 |
| B | 2,200 |
| C | 800 |

(e) *Temporary bear harvest subzones.* 1. The department may establish temporary bear harvest subzones within each black bear

management zone to increase or decrease harvest within specific subzones to assure maintenance of bear populations at a density level equivalent to that of the bear management zone.

2. The department may require that a portion of the Class A bear licenses available within a bear management zone be specific to a temporary bear harvest subzone to assure maintenance of bear populations at a density level equivalent to that of the bear management zone.

3. Class A bear licenses for the temporary subzones shall be used only within the subzone.

4. Temporary subzone boundaries shall follow deer management unit boundaries as identified in s. NR 10.28.

5. Temporary subzones may be established to increase bear harvest when either of the following 2 conditions exist within the area considered for a subzone:

a. The bear population density within the subzone for the previous 3 year period exceeds by 20% the zone population density goal as indicated by indices or models, or both.

b. Bear nuisance or agricultural damage complaints per square mile within the subzone exceed the zone average by 20% or more for the previous 3 year period.

6. Temporary subzones may be established to decrease harvest when either one of the following conditions exist:

a. The mortality rate of adult bears within the subzone exceeds 22% for the previous 3 year period.

b. The bear population density within the subzone for the previous 3 year period is below the zone population density goal by 20% or more as indicated by indices or models, or both.

7. Each temporary bear harvest subzone may be established for a period not to exceed

(f) *Permanent bear harvest subzones.* Class A bear licenses for subzones shall be used only in the subzone.

(2) APPLICATION PROCEDURE. (a) *Application submittal.* Application for Class A bear licenses shall be on forms provided by the department. Applications shall be postmarked no later than the Friday nearest January 15 or received by the department customer service and licensing bureau, 101 South Webster, P.O. Box 7924, Madison, WI 53707 no later than 4:30 p.m. on that Friday each year.

The group's preference standing shall be that of the member with the lowest number of preference points. If the group is selected, the group shall accept or reject Class A bear licenses for all members of their group.

(3) LICENSE ISSUANCE. The department shall select successful applicants and issue Class A bear license approval notices no later than February 15 of each year. The department may reissue a Class A bear license if the license is returned or if the applicant fails to or cannot comply with s. 29.1085, Stats. Selection shall be by random drawing.

(4) FEES. A successful applicant shall submit the appropriate license fee established by s. 29.092 (2) (d) or (i), Stats., to the department before receiving a Class A bear license. The fees shall be mailed and postmarked no later than the Friday nearest March 1 or received by the department customer service and licensing bureau, 101 South Webster, P.O. Box 7924, Madison, WI 53707 no later than 4:30 p.m. on that Friday each year.

(6) EDUCATIONAL PERMIT ISSUANCE. Upon receipt of proper application, the department shall issue an educational permit for bear observation. The applicant shall include the location to the quarter section, times and dates of the activity, name of person and bear eco-tourism business or educational institution they are representing. The educational permit authorizes the permittee to observe or shine bear for educational purposes only pursuant to s. 29.245 (3) (b) 3. and (5) (b) 1., Stats.

(a) No person may be engaged in shining bear for educational purposes without being in possession of an educational permit.

(b) Only the named person on the permit may possess a firearm when participating in the actions authorized by the permit.

NR 10.103 Deer hunting. (1) *TAGS.* A one-piece back and carcass tag shall be issued with each hunting license and shall remain intact until the hunter kills a deer while hunting. While hunting, no person may possess a validated carcass tag including bonus and special carcass tags unless it is attached to a legally killed deer.

(2) *VALIDATION.* Any person who kills a deer or if s. 29.405, Stats., applies, the person providing the carcass tag, shall immediately validate the carcass tag by slitting the marks on the carcass tag as designated by the department. Failure to completely validate the carcass tag renders possession of the deer illegal and the carcass tag invalid.

Note: The carcass tag attachment procedures are also provided in s. 29.40 (2), Stats.

NR 10.104 Deer population management. (1) *DEER MANAGEMENT SYSTEM.* The department shall manage the state deer population by:

(a) Establishing deer management unit boundaries within the state;

(b) Establishing deer population goals for each deer management unit;

(c) Monitoring the performance of the deer population within each deer management unit; and

(d) Establishing deer hunting seasons and annual harvest quotas with the objective of maintaining deer populations at the established deer population goals for each deer management unit.

(2) DEER MANAGEMENT UNITS. (a) The deer management unit boundaries are as described in s. NR 10.28.

(b) *Management unit size and configuration.* Deer management unit boundaries shall be established to encompass areas of similar land use, soils and vegetative cover, and be of sufficient size to permit accurate monitoring of herds.

(c) *Unit boundaries.* Unit boundaries shall be readily identifiable features of the landscape such as roads and rivers. When road boundaries are used, the department shall give priority to use of numbered and lettered highways.

(3) **THREE YEAR REVIEWS.** The department shall review, and seek public comment, regarding the need to modify the boundaries or population goals for all deer management units every 3 years. For deer management units in the ceded territory as defined by s. NR 13.02 (1), the department shall also consult with the Wisconsin Chippewa bands in a government to government manner.

(4) **DEER POPULATION GOALS.** (a) *Deer range.* The depart-

ment will calculate the area of deer range in each unit based on estimates of the amount of wetland, woodland at least 10 acres in size, and cropland within 330 feet of woodlands.

(b) *Unit goals.* The deer population goals for each deer management unit described in s. NR 10.28 shall be expressed as the number of deer per square mile of deer range in January and are as follows:

| Management Unit | Deer Goal | Management Unit | Deer Goal | Management Unit | Deer Goal |
|-----------------|-----------|-----------------|-----------|-----------------|-----------|

(5) **ANNUAL ANTLERLESS DEER KILL QUOTAS.** (a) *Annual population estimate.* The department shall annually calculate an estimate of the overwinter deer population for each deer management unit using the sex-age-kill method for calculating deer densities. The sex-age-kill method uses the following quantitative data for each deer management unit: proportion of yearling bucks in the harvest, proportion of yearling does in the harvest, proportion of males and females at birth, the number of fawns seen per doe during the summer, the proportion of total buck mortality due to hunting harvest, and the harvest by sex as registered during the hunting seasons.

(b) *Quota objective.* Using the overwinter deer population estimate established under par. (a), expected fawn production and overwinter mortality, the expected archery harvest of antlerless deer excluding those harvested under authority of hunter's choice and antlerless deer hunting permits, and the deer population goal in sub. (4), the department shall annually calculate an antlerless deer kill quota for each unit with the objective of maintaining the deer herd at the established deer population goal.

(c) *Quota adjustment in ceded territory units.* For deer management units in the ceded territory as defined in s. NR 13.02 (1),

expected tribal harvest shall be deducted from the antlerless deer kill quota established in par. (b).

(6) **ANTLERLESS DEER PERMITS** (a) *Purpose*. The department shall issue deer hunting permits in sufficient numbers to achieve the state quota determined under sub. (5).

(b) *Permit formula*. In each deer management unit, the number of permits issued by the department shall be determined by the following formula:

$$\text{Permit number} = \frac{\text{State Quota}}{\text{Predicted hunter success rate}}$$

(c) *Success rate prediction*. The predicted hunter success rate used by the department to compute the number of permits for each deer management unit shall be based upon the percentage of permitted hunters harvesting an antlerless deer in that unit during previous seasons. In new deer management units or units with significant boundary changes, the predicted hunter success rate shall be based upon the harvest history of similar units.

(7) **ANTLERLESS DEER PERMIT APPLICATION PROCEDURES** All applications shall be on department forms and no person may submit more than one application.

(a) *Application deadline*. All applications shall be post-marked no later than the deadline dates indicated on the form or received by the department license section no later than 4:30 p.m. on those dates to be considered for selection. The department may not establish the annual application deadline to be earlier than July 1.

Note: The department conducts extensive publicity on the application deadlines beginning several months prior to any deadline. Application deadline dates are published in news releases, license outlet handouts, and pertinent regulation pamphlets. The license section address is 101 South Webster, Box 7926, Madison, WI 53707.

(b) *Group applications*. Group applications up to and including 4 hunters will be honored for deer hunting established in s. NR 10.01 (3) (e) 3. provided each applicant completes the application form and all forms are submitted in one envelope marked "group application" on the outside.

(8) **PERMIT ISSUANCE** Upon receipt of proper application, the department shall issue permits in the following manner:

(a) *Preference system*. If the number of qualified applicants for antlerless deer permits and hunter's choice permits in a deer management unit exceeds the number of permits available, the department shall issue those antlerless deer permits and hunter's choice permits for that deer management unit according to the preference system established under s. 29.107(5), Stats.

(b) *Initial permit*. Successful applicants for deer hunting permits shall be determined by random selection from all eligible applications received for each deer management unit.

(c) *Additional permits*. If the number of deer hunting permits in any management unit exceeds the number of applications for the permits, the department may issue the remaining permits available for that unit as antlerless deer hunting permits to its initial deer hunting permit applicants. Permittees to be issued the second permit shall be randomly selected in accordance with any statutorily established landowner preference permit issuance system.

(d) *Unallotted permits*. The department may issue any remaining antlerless deer permits to interested permit applicants on a first-come, first-served basis who possess a valid deer hunting license.

(e) *Bonus permits for farm owners*. Eligible resident farm owners under s. 29.1075, Stats., will receive one free bonus permit for each one they purchase in deer management units with additional permits as described in s. NR 10.104 (8) (c). Where

there are joint owners or vendee names under a land contract, only one of the owners or vendees is eligible. To be an eligible farm under this section, a majority of the land must be used on a commercial basis, to produce income.

(9) **PERMIT AUTHORITY**. No person may hunt antlerless deer in deer management units described as such in s. NR 10.01 (3) (e) unless he or she possesses a current validated deer hunting permit.

(10) **BAG LIMIT**. Each issued deer hunting permit shall authorize the use of the holder's current valid Wisconsin deer hunting license, back tag and carcass tag for the killing of one deer in the deer management unit designated on the permit as follows:

(a) *Hunter's choice deer hunting permit*. Valid for the taking of one deer of either sex, except on Chambers island in Door county where the bag limit shall be one antlerless deer or one buck deer with a forked antler as indicated on the permit and except during the archery season where the permit authorizes the taking of an antlerless deer only under the authority of an archery hunting license.

(b) *Antlerless deer hunting permit*. Valid for the taking of one antlerless deer only.

(1) No person may transport any deer or bear in or on any motor-driven vehicle from the time such deer or bear is killed to the time it is lawfully registered pursuant to s. NR 10.106 unless the deer or bear is carried openly exposed and in such a manner so that the deer or bear carcass tag attached to the deer or bear cannot be handled or manipulated by any occupant of the vehicle.

(2) No person may transport a deer or bear from the time the deer or bear is killed to the time it is registered under s. NR 10.106 that is tagged with the carcass tag of another person unless accompanied by the person issued the carcass tag.

These animals or animal parts may not be removed from the area specified in this section unless exhibited, registered and tagged.

(2) **EXHIBITION AND REGISTRATION**. Each person who has killed a deer or if s. 29.405, Stats., applies, the person who has tagged the deer, during the open seasons for hunting deer with guns or bear during the open seasons for hunting bear with guns

or bows shall exhibit and register the deer with the deer carcass tag attached as required by s. 29.40 (1), Stats., and s. NR 10.103, or the bear with the bear carcass tag attached as required by s. 29.1085 (5), Stats., and s. NR 10.101 (4) at an authorized registration station as follows:

(a) *Gun license deer.* Gun license deer shall be registered within the open season zone in which the deer was killed no later than 5:00 p.m. of the first day following the season's close.

(b) *Special permit deer.* Party permit deer, bonus permit deer or antlerless deer taken under the authority of a hunter's choice permit, a gun deer license or special deer permit shall be registered within the deer management unit in which the deer was killed no later than 5:00 p.m. of the first day following the season's close unless transported on federal or state highways directly to the authorized registration station in an adjoining deer management unit.

(c) *Lake Superior islands deer.* Any gun killed deer taken on any of the islands in the outlying waters of Lake Superior in Ashland and Bayfield counties shall be registered within the deer management unit in which the deer was killed or within the city of Bayfield no later than 5:00 p.m. of the first day following the close of such season.

(d) *Bow killed deer.* 1. Time deadline. A deer killed under an archery deer license shall be registered no later than 5:00 P.M. on the third day after it was killed.

2. Registration station restrictions. Except as provided under subd. 3., bow killed deer may be registered at any department designated registration station.

3. Additional deer restrictions. All bowhunters authorized to kill an additional antlerless deer shall register it within the deer management unit designated on the deer carcass tag or in an adjoining deer management unit. All such deer shall not be transported outside the unit in which it was killed or an adjoining unit until it is registered.

(e) *Bear license (bow and gun).* Bear shall be registered within the county in which the bear was killed or adjoining county and within the black bear management zone in which it was killed no later than 5:00 p.m. of the day after it was killed.

(3) REGISTRATION TAGGING Upon verification of license and deer hunting permit information, the station operator shall:

(a) Complete and retain the registration portion of the hunter's license;

(b) Lock a registration tag to the carcass or part of the deer or bear; and

(c) Remove the validation portion of the carcass tag.

Note: The portion of the carcass tag remaining attached to the animal contains a number corresponding to the registrant's hunting license and backtag.

NR 10.117 Deer season modification. (1) POWERS

(a) The department may, upon making the findings in sub. (2), modify the deer hunting seasons and deer permit issuance procedures as established in this chapter for any farmland deer management unit described in sub. (5) or any group of farmland deer management units to reduce the deer population nearer to the overwinter population goals established in s. NR 10.104.

(b) The department may modify the deer seasons, deer registration and permit issuance procedures by doing one or more of the following:

1. Increasing a season's length.

2. Increasing the bag and possession limits.

3. Establishing either-sex or antlerless-only deer seasons.

4. Authorizing and encouraging the harvest and donation of antlerless deer to charitable food distribution programs, including the issuance of special deer permits for this purpose.

(2) FINDINGS. The department shall, prior to exercising powers under sub. (1), find all of the following:

(a) It is unlikely the deer population for the deer management units will be reduced to within 20% of the overwinter population goals established in s. NR 10.104 under the established deer hunting rules. In making this determination, the department shall compare the deer harvest required to reduce the deer population to goal to the deer harvest likely to occur under the existing season structure.

(b) Upon review of available deer damage or over-winter loss data, it is likely that a failure to reduce the deer population to the overwinter population goals in the unit will result in increased deer damage to agricultural and forest lands, or a waste of the resource.

(c) The department has held a public informational meeting in affected deer management units to seek public comment on the need to modify the deer hunting rules and consulted with the conservation congress, according to s. 15.348, Stats.

(3) MODIFICATION DEADLINE. The department may implement the modification under sub. (1) by order, if an order is approved by the natural resources board and issued by the department before May 1 prior to the affected deer season.

(4) NOTICE. Modification by the department under sub. (1) shall become effective upon issuance of an order and publication in the official state newspaper. In addition, a notice of the order shall be provided to newspapers, legislators and hunting license outlets in the area affected.

NR 10.12 Migratory game bird hunting. (1) PROHIBITED METHODS. No person shall hunt any migratory game bird by any of the following methods:

(a) *Sinkbox.* From or by means, aid or use of a sinkbox or any other type of low floating device, having a depression affording the hunter a means of concealment beneath the surface of the water.

(b) *Boats.* From any boat or craft other than those propelled by paddle, oar or pole. When motors or sails are attached to the boat, the motor shall be completely shut off and the sail furled, and the boat's progress stopped before a firearm may be loaded.

(c) *Structures.* From any pier, dam, dock or similar structure, except disabled persons under the authority of a class A permit issued by the department.

(d) *Rallying.* By the use or aid of any water, air or motor-driven land conveyance used for the purpose of or resulting in stirring up, driving or rallying.

(e) *Bird calls.* By the use or aid of recorded or electrically amplified bird calls or sounds or imitations thereof.

(f) *Live decoys.* By using directly or indirectly any live tame or captive ducks or geese for decoy purposes regardless of the distance intervening between any such live decoys and the position of the hunter. All live tame or captive ducks and geese shall be removed for a period of 10 consecutive days prior to hunting, and confined within an enclosure which substantially reduces the audibility of their calls and totally conceals these live birds from the sight of migratory waterfowl.

(g) *Decoy use.* By the use or aid of decoys which are or have been:

1. Placed beyond 200 feet from the blind or cover in which the hunter is located.
2. Placed in the water more than one hour before the open hunting time.
3. Left in the water more than 20 minutes after the close of hunting time.
4. Left in the water unattended.

(h) *Baiting.* By the aid of baiting, on or over any baited area. As used in this paragraph, "baiting" shall mean the placing, exposing, depositing, distributing, or scattering of shelled, shucked, or unshucked corn, wheat or other grain, salt, or other feed so as to constitute for such birds a lure, attraction or enticement to, on, or over any areas where hunters are attempting to take them: and "baited area" means any area where shelled, shucked, or unshucked corn, wheat or other grain, salt, or other feed whatsoever capable of luring, attracting, or enticing such birds is directly or indirectly placed, exposed, deposited, distributed, or scattered; and such area shall remain a baited area for 10 days following complete removal of all such corn, wheat or other grain, salt, or other feed. However, nothing in this paragraph shall prohibit:

1. The taking of all migratory game birds, including waterfowl, on or over standing crops, flooded standing crops (including aquatics), flooded harvested croplands, grain crops properly shocked on the field where grown or grains found scattered solely as the result of normal agricultural planting or harvesting; and
2. The taking of all migratory game birds, except waterfowl, on or over any land where shelled, shucked or unshucked corn, wheat or other grain, salt, or other feed has been distributed or scattered as the result of bona fide agricultural operations or procedures, or as a result of manipulation of a crop or other feed on the land where grown for wildlife management purposes: provided that manipulation for wildlife management purposes does

not include the distributing or scattering of grain or other feed once it has been removed from or stored on the field where grown.

Note: Baiting rules are taken verbatim from 50 CFR 20.21 (i) as a result of a court of appeals decision nos. 88-0815 to 88-0818 dated March 1, 1989

(2) **POSSESSION.** No person shall possess any live or crippled migratory game bird reduced to possession by means of hunting. Such bird shall be immediately killed and become a part of the daily bag limit.

(3) **OPEN WATER RESTRICTIONS.** No person may hunt waterfowl in open water from any blind which may include any boat, canoe, raft, contrivance or similar device except:

(a) *Mississippi river.* Blinds in any of the waters of the Mississippi river and adjoining counties provided the blinds are securely anchored and located not more than 100 feet from any shoreline including islands. Blinds in open water in Grant county and the Lake Pepin portions of the Mississippi river are permitted regardless of the distance from shore provided the blinds are securely anchored.

(b) *Great Lakes and Big Green Lake.* Blinds in open waters of Big Green Lake, Lake Superior, Lake Michigan and Green Bay beyond 500 feet of any lake or bay shoreline. Blinds do not have to be anchored in these areas.

(c) *Lake Winnebago and Petenwell flowage.* Blinds in open waters of Lake Winnebago and Petenwell flowage (north of state highway 21 and south of state highway 73) if more than 1,000 feet from any shoreline including islands provided blinds are securely anchored.

(d) *Blind removal.* All open water blinds shall be removed at the close of hunting hours each day.

(4) **SPECIAL BLIND RESTRICTIONS.** The department may restrict hunters to certain blind locations within the Collins, Eldorado, Grand River, Pine Island and Theresa state wildlife areas by posted notice. If posted, maps shall be provided by the department indicating where blind sites are located. The following blind restrictions apply to goose hunting in the Horicon zone:

(a) *Zone restrictions.* On any land within the Horicon intensive management subzone established in s. NR 10.31 (3) (b) no person may hunt geese except from a blind unless the person is a disabled person located no more than 20 feet from the blind and in possession of a class A permit issued by the department, except that no person is required to hunt geese from a blind during the early goose hunt established in s. NR 10.01 (1) (g) 1. L.

(b) *Hunter limits.* No more than 2 hunters may occupy any blind at one time nor may any person hunt waterfowl from a blind placed within 200 yards of any other blind occupied by one or more waterfowl hunters or within 100 yards of the property boundary on which the blind is located.

(c) *Game retrieval.* Downed game birds may be retrieved outside blinds with the aid of guns and dogs or by hand.

(5) **TAKING METHODS.** No person shall hunt any migratory bird:

(a) *Guns and devices.* With a trap, snare, net, rifle, pistol, crossbow other than in s. 29.104, Stats., swivel gun, punt gun, battery gun, machine gun, fishhook, poison, drug, explosive, stupefying substance or shotgun of a larger bore than a no. 10 gauge.

Note: The s. 29.104, Stats., reference authorizes disabled persons under department permit to hunt any migratory bird on which an open season is established in s. NR 10.01 (1) with crossbows meeting s. 29.104, Stats., standards

(b) *Shotgun capabilities.* With any automatic-loading or hand-operated repeating shotgun capable of holding more than 3 shells the magazine of which has not been cut off or plugged with a one-piece filler incapable of removal without disassembling the gun so as to reduce the capacity of said gun to not more than 3 shells at one time in the magazine and chamber combined.

(c) *Legal means.* By any means other than a shotgun fired from the shoulder or a bow and arrow, or by falconry.

(d) *Non-toxic shot requirements.* While hunting waterfowl and coot within any area of the state, no person may:

1. Take, catch, kill or pursue waterfowl and coot with any shotshell loaded with any material other than nontoxic shot.
2. Possess any shotshell loaded with any material other than nontoxic shot.

Note: Muzzle-loading firearms are not restricted by this rule because shotshells are not part of their mechanism.

(6) **TAGGING.** No person may give, put or leave migratory game birds at any place, other than at that person's permanent abode, or in the custody of another person unless the birds are tagged individually or collectively with tags bearing the following information:

- (a) The hunter's signature,
- (b) The hunter's address,
- (c) The total number of birds tagged, by species, and
- (d) The dates the birds were killed.

Note: Tagging is required if the birds are being transported by another person for the hunter, or if the birds have been left for cleaning, storage (including temporary storage), shipment, or taxidermy services.

(7) **DRESSING.** No person may completely dress any migratory game bird and then transport the bird from the field. The head or one fully feathered wing shall remain attached to all migratory game birds being transported from the field to the person's permanent abode or a preservation facility.

(8) **SHIPMENT.** No person may ship migratory game birds unless the package is marked on the outside with:

- (a) The name and address of the person sending the birds,
- (b) The name and address of the person to whom the birds are being sent, and
- (c) The number of birds, by species, contained in the package.

(9) **IMPORTATION.** (a) One fully-feathered wing shall remain attached to all migratory game birds being transported between the port of entry and the possessor's permanent abode or to a preservation facility.

(b) No person may import migratory game birds belonging to another person.

(10) **WATERFOWL STAMP.** No person 16 years of age and older may hunt for waterfowl without a valid state waterfowl stamp with the signature of the licensee written in ink across its face and firmly affixed by its own adhesive to the back of a valid small game or sports license unless the person is carrying a valid conservation patron license, senior citizen recreation card, free military small game license or first-year hunter education certificate.

Note: Violation of state migratory game bird regulations is also a violation of federal regulations. Importation restrictions do not prohibit the importation of legally taken, fully feathered migratory game birds for mounting purposes by a taxidermist holding a valid federal permit and licensed by the U.S. department of agriculture to decontaminate birds.

(11) **HARVEST INFORMATION PROGRAM.** Before hunting any migratory game birds each year, hunters shall register with the department by supplying their names, addresses, date of birth and other necessary information requested by the department in a manner prescribed by the department. No individual may hunt any species of migratory game bird until registered with the department and all hunters must have in their possession proof of registration while hunting migratory game birds.

NR 10.125 Canada goose hunting. (1) **PERMIT REQUIREMENTS.** (a) *Permit possession required.* No person may hunt Canada geese in any area of the state without having on his or her person a valid Canada goose hunting permit.

(b) *Maximum allowable harvest.* The total number of Canada goose permits and carcass tags issued by the department annually under this section and under s. NR 19.84 shall be based upon the maximum allowable harvest assigned by the U.S. fish and wildlife service. The assigned harvest shall be distributed within established zones and by time periods based upon historical data on the distribution of geese within the state and hunter success rates.

(c) *Validity.* All permits are valid only in the zones and for the time periods specified on the permit during the open season established for Canada geese. The department shall use the following procedure when specifying the permit zones:

1. If the maximum allowable harvest is 160,000 birds or less, all permits shall be restricted to one zone.

2. If the maximum allowable harvest is between 160,000 and 210,000 birds, the department may:

a. Issue Horicon and Collins zone permits that are also valid for the exterior zone during a time period specified by the department.

b. Issue exterior zone permits that are also valid for the Horicon zone during a time period specified by the department.

c. Establish a permit processing deadline for exterior zone permits receiving the 2 zone authorization described under subd. 2. b.

3. If the maximum allowable harvest exceeds 210,000 birds, all permits shall be valid in any zone.

(d) *Permit validation procedures.* When a Canada goose is killed and before it is carried by hand or transported in any manner, the hunter shall validate the permit by slitting, tearing or punching holes in the permit in the manner indicated by the department. Failure to follow the validation procedure invalidates the permit and renders any goose in the person's possession illegal.

(2) **APPLICATION AND ISSUANCE REQUIREMENTS.** (a) *Forms.* Applications shall be on forms supplied by the department.

(b) *Deadlines.* 1. All applications for the Horicon and Collins zones shall be postmarked no later than the deadline dates indicated on the forms or received by the department license section no later than 4:30 p.m. on that date to be considered for selection. The annual application deadlines may not be sooner than July 1.

Note: The department conducts extensive publicity on the application deadlines beginning several months prior to any deadline. Application deadline dates

are published in news releases, license outlet handouts, and pertinent regulation pamphlets. The license section address is 101 South Webster, Box 7924, Madison, WI 53707.

2. Exterior zone and early goose hunt subzone permit applications may be obtained by mail or in person at department regional offices and service centers during normal office hours throughout the open season.

Note: Normal office hours are 8:00 a.m.–4:30 p.m. Monday through Friday.

(c) *Application limitations.* 1. No person may submit more than one application per year except that:

a. Persons who submitted an invalid permit application for the Collins or Horicon zones may reapply, provided the goose season is open, for an Exterior zone permit.

b. Persons applying for an early goose hunt subzone permit may also apply for a Collins, Horicon, or Exterior zone permit.

2. Group applications. If 2 or more persons wish to hunt together in the Collins or Horicon zones, each shall fill out an application form and submit them together in one envelope clearly marked "group application" on the outside. A group application shall be considered one application.

(d) *Selection preference.* When applications exceed the number of permits available, successful applicants shall be randomly selected with first preference given to persons who unsuccessfully applied for a permit during the previous year.

(e) *Undersubscribed zones.* If the number of permit applications is less than the number of permits available for any time period, the department may issue the remaining permits to successful applicants by random selection.

(f) *Permit limits.* The department may not issue more than 425 permits for any time period for the Collins zone.

(3) **SPECIAL REQUIREMENTS.** Unless otherwise directed by the department, the following requirements apply to the Horicon and Collins zones:

(a) *Tagging.* When a Canada goose is killed within Horicon and Collins zones, the hunter shall:

1. Completely attach and seal the permit, utilizing its own adhesive, to the neck of the goose before it is carried by hand or transported in any manner.

2. Keep the permit attached to the goose until the meat has been processed for cold storage or human consumption.

(b) *Possession.* No person may possess or transport a dead wild Canada goose unless it is tagged with a validated permit.

(c) *Transportation restrictions.* The hunter shall transport any tagged goose in a motor vehicle so that the permit attached to the goose cannot be handled or manipulated by any occupant of the vehicle.

(4) **REPORTS.** (a) *Harvest reports.* The department may require each successful exterior zone and early goose hunt subzone applicant to submit a harvest report in a manner prescribed by the department within 48 hours of harvesting a goose.

Note: The Canada goose harvest reports are used to calculate total harvest estimates in those zones where hunter participation is unlimited.

(b) *Season reports.* The department may require any permit holder to provide the department a goose hunting report. The selected hunter shall be required to complete the report and mail it within 48 hours of receipt.

Note: The hunting report forms will be mailed to certain hunters only.

(5) **BAG AND POSSESSION LIMITS.** (a) *Bag limit.* The aggregate daily bag limit for persons hunting in both the exterior zone and a subzone within the exterior zone in the same day is equal to the larger of the respective daily bag limits established in s. NR 10.01 (1) (g)

(b) *Daily possession limit.* No person may possess or transport more than the daily bag limit or aggregate daily limit, whichever

applies, of migratory game birds, tagged or not tagged, at or between the place where taken and either the person's permanent abode or temporary or transient place of lodging; or a commercial preservation facility.

(6) **SEASON CLOSURE.** The secretary of the department may close a portion or all of any Canada goose season established in s. NR 10.01 (1) (g) upon a finding by the department that the harvest for that season will exceed the level authorized by U.S. fish and wildlife service. Closure shall become effective upon issuance of an order and publication in the official state newspaper.

NR 10.13 Furbearing animals. (1) PROHIBITED METHODS. No person may:

(a) *Hunting.* Hunt any beaver, fisher, mink, muskrat, or otter with the aid of any spear, gun or dog except that:

1. The owner or occupant of any land and members of their families may shoot or trap beaver on their respective lands without license as established in s. 29.24, Stats.

2. Agents or employes possessing written authorization from the landowner, land lessee or responsible governmental body may use firearms to shoot beaver under s. NR 12.10.

(b) *Trapping.* 1. Traps. Set out or place traps or snares, whether set or sprung, during the closed season.

2. Bait or scent. Set out or place any bait or scent for attracting furbearing animals during the closed season. During the open season, no person may use sight exposed bait consisting of feathers, animal flesh, fur, hide or entrails within 25 feet of any trap.

4. Watersets. Take, capture or kill, or attempt to take, capture, or kill any furbearing animals at any time by means of watersets except during that period when and in those areas where there is an open season for trapping muskrat, beaver, or otter. In addition, persons removing beaver under s. NR 12.10 may use watersets.

5. Trap and snare placement. Set any snares or traps at any time within 15 feet of any beaver dam, except when trapping under the landowner authority established by s. 29.24, Stats.

Note: The rule exception allows trapping on beaver dams by landowners.

6. Trap and snare use. Set, place, operate or possess while on or adjacent to waters of this state, any trap other than a steel-jawed trap, live traps or snare other than that defined in s. NR 10.001 (25e) for the purpose of taking, capturing, or killing furbearing animals. Live traps shall be constructed so that not more than one animal can be taken or captured in any single trap setting.

7. Artificial structures. No person shall construct or place on the ice of any of the waters of this state any artificial house or den for the purpose of taking, catching, or killing any fur-bearing animals, or place or set therein any trap or traps of any kind which might take, catch, or kill fur-bearing animals.

8. Killer traps and snares. Set, place, or operate any killer type trap of the conibear type larger than 7" x 7" or any snare regardless of the size of the noose unless one-half of the trap or snare is located underwater at all times.

9. Steeljawed traps. It shall be unlawful for any person to set, place or operate any steel jaw trap with a spread width of more than 8 inches.

10. Toothed traps. No person may set, place or operate any steel jawed trap with teeth unless it is located completely underwater at all times.

11. Minimum waterset. Except when the muskrat and mink season is open, no person may set, place or operate any waterset smaller than 5¹/₂" jaw spread for steel jaw traps and 6³/₄" x 6³/₄" for killer traps of the conibear type.

12. Trap placement. Set, place or operate any killer trap of the conibear type greater than 6" x 6" or any snare regardless of the size of the noose in the following locations:

a. Within 3 feet of any federal, state or county road rights-of-way culvert unless completely submerged in water.

b. Within 3 feet of any woven or welded wire mesh type fence.

c. Within 100 yards of any building devoted to human occupancy without the owner's consent.

13. Snare specifications. Set, place or operate any snare unless the noose cable and noose attachments conform to the following specifications:

a. Five feet or less of non-stainless steel metal cable or wire with a diameter not exceeding 1/8".

b. All snares shall include a relaxing mechanical lock and anchor swivel. In addition, all snares shall be tagged with a metal tag stamped or inscribed with the name and address of the owner.

(2) MOLESTING. While hunting or trapping, no person shall:

(a) *Raccoon*. Molest any raccoon den or den trees.

(b) *Mink*. Molest any mink den.

(c) *Muskrat and beaver*. Molest any muskrat house, muskrat feeding house, or beaver dam. However, beaver dams may be altered by persons removing beaver causing damage under s. NR 12.10.

(3) TRAPPING HOURS. (a) *Legal time period*. The trapping hours shall be from 6:00 a.m. to 7:00 p.m. (CST).

(b) *Illegal time period*. No person may set or reset any trap or traps or attend any trapline from 7:00 p.m. to 6:00 a.m. (CST).

(c) *Set tending interval*. 1. Dry land and non-drowning sets. Any set capable of capturing an animal and not capable of drowning the animal shall be tended at least once each day and the animal captured shall be removed from the set.

2. Open water drowning sets. Any set capable of drowning the captured animal shall be tended within a 4 day period following the last tending of the set. Any animal captured shall be removed from the set. Water levels shall be monitored to ensure effective drowning sets.

3. Under ice sets. Any set made under the ice is exempt from the checking periods.
