2 handling of anhydrous ammonia, creating an exemption from civil liability, and
3 providing a penalty.

Analysis by the Legislative Reference Bureau

Anhydrous ammonia is a chemical compound that primarily is used for agricultural purposes but that may also be used in the production of the controlled substance methamphetamine. Currently, no statute specifically regulates the storage and handling of anhydrous ammonia. However, current rules promulgated by the department of commerce (department) do regulate the storage and handling of anhydrous ammonia. These rules are promulgated under the department's general authority to promote safe places of employment. Any person who violates these rules may be required to forfeit not less than \$10 nor more than \$100.

This bill creates a statute that specifically regulates the storage and handling of anhydrous ammonia. This bill requires the department to promulgate rules to establish reasonable standards relating to the safe storage and handling of anhydrous ammonia. This bill also increases the penalty that applies to certain violations of these rules and creates certain new penalties relating to anhydrous ammonia. With certain exceptions, any person who does any of the following may be fined not more than \$10,000 or imprisoned for not more than three years and six months or both:

1. Stores, holds or transports anhydrous ammonia in a container that does not meet all applicable requirements prescribed by rule of the department.

ASSEMBLY BILL 7

2. Transfers or attempts to transfer anhydrous ammonia into a container that does not meet all applicable requirements prescribed by rule of the department.

3. Transfers or attempts to transfer anhydrous ammonia without the consent of the owner of the anhydrous ammonia.

4. Intentionally causes damage to anhydrous ammonia equipment without the consent of the owner of the equipment.

5. Commits a theft of anhydrous ammonia or anhydrous ammonia equipment.

Any person who commits a violation described in item 1. or 2., listed above, while performing an agricultural activity is subject to a reduced penalty of not less than \$10 nor more than \$100.

This bill also creates a civil liability exemption. Under this bill, any person who owns, maintains, installs, or lawfully uses anhydrous ammonia equipment is immune from civil liability for any act or omission that relates to the equipment or to anhydrous ammonia and that causes damage or injury to an individual, if that damage or injury occurs while the individual commits a violation described in item 3., 4., or 5., listed above. However, under this bill, a person is not immune from civil liability for certain reckless, wanton, or intentional acts or omissions.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.
