1     **AN ACT** *to amend* 450.11 (1); and *to create* 450.11 (4) (a) 8. and 450.11 (4m) of  
2     the statutes; **relating to:** prescription drug labels.

---

### *Analysis by the Legislative Reference Bureau*

Current law requires prescription drug labels to specify certain information, including the name and address of the practitioner who prescribed the drug, the date on which the prescription was dispensed, the name of the patient, and directions for the use of the drug product or device.

This bill requires prescription drug labels to specify, in addition to the above information, the symptom or purpose for which the drug is being prescribed if the patient wants the symptom or purpose to appear on the label. The practitioner who prescribes the drug must ask the patient if the patient wants the symptom or purpose to appear on the label. If the patient wants that information on the label, the practitioner must add that information to the prescription order and the pharmacist must include that information on the prescription drug label.
