### *Analysis by the Legislative Reference Bureau*

This bill requires the Department of Agriculture, Trade and Consumer Protection to promulgate rules requiring special packaging for liquid nicotine, which is commonly used to refill cartridges for electronic cigarettes. Current law defines special packaging as packaging that is designed or constructed in a way that makes it significantly difficult for children under five years of age to open or access the substance contained in the packaging or container. The bill creates an exemption from these rules for liquid nicotine contained in disposable packaging that is filled and sealed by the manufacturer and intended for use in vapor devices such as electronic cigarettes, and that is not intended to be opened by the consumer. The bill also requires these rules to meet the specifications and follow the testing methods for special packaging provided under certain federal regulations.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.
