***Analysis by the Legislative Reference Bureau***

This bill increases the maximum life from 20 to 25 years, the expenditure period from 15 to 20 years, and the tax increment allocation period from 20 to 25 years for Tax Incremental District Number Two in the village of Kronenwetter.

Under the current tax incremental financing program, a city or village may create a tax incremental district in part of its territory to foster development under certain conditions. Currently, towns and counties also have a limited ability to create a TID under certain circumstances. Before a city or village may create a TID, several steps and plans are required. These steps and plans include public hearings on the proposed TID within specified time frames, preparation and adoption by the local planning commission of a proposed project plan for the TID, approval of the proposed project plan by the common council or village board, approval of the city's or village's proposed TID by a joint review board that consists of members who represent the overlying taxation districts, and adoption of a resolution by the common council or village board that creates the TID as of a date provided in the resolution.

Also under current law, once a TID has been created, the Department of Revenue calculates the "tax incremental base" value of the TID, which is the

**ASSEMBLY BILL 301**

equalized value of all taxable property within the TID at the time of its creation. If the development in the TID increases the value of the property in the TID above the base value, a “value increment” is created. That portion of taxes collected on the value increment in excess of the base value is called a “tax increment.” The tax increment is placed in a special fund that may be used only to pay back the project costs of the TID.

The project costs of a TID, which are initially incurred by the creating city or village, include public works such as sewers, streets, and lighting systems; financing costs; site preparation costs; and professional service costs. DOR authorizes the allocation of the tax increments until the TID terminates or, generally, 20 years, 23 years, or 27 years after the TID is created, depending on the type of TID and the year in which it was created. Also under current law, a city or village may not generally make expenditures for project costs later than five years before the unextended termination date of the TID. Under certain circumstances, the life of the TID, the expenditure period, and the allocation period may be extended.

Under this bill, with regard to TID Number Two in the village of Kronenwetter, the expenditures for project costs may be made for up to 20 years after the TID was created, DOR may allocate tax increments for up to 25 years after the TID’s creation, and the maximum life of the TID is extended for 5 years.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
