TO: Members Joint Committee on Finance

FROM: Bob Lang, Director

SUBJECT: Assembly Bill 835/Senate Bill 690: Sparsity Aid and Low Revenue Adjustment

Assembly Bill 835 and Senate Bill 690 are companion bills which would provide additional funding for the sparsity aid program and increase the low revenue adjustment under revenue limits. AB 835 was introduced on January 12, 2018, and was referred to the Assembly Committee on Education. On February 1, the Assembly Committee on Education recommended the bill for passage on a vote of 14 to 1. AB 835 was referred to the Joint Committee on Finance on February 1, 2018. SB 690 was introduced on January 10, 2018, and was referred to the Joint Committee on Finance.

BACKGROUND

Sparsity Aid. Under current law, sparsity aid is provided to school districts that meet two criteria: (a) school district membership in the prior year of less than 745 members; and (b) population density of less than 10 pupils per square mile of the district's area. Aid is equal to \$300 per pupil, with payments prorated if funding is insufficient. The appropriation for the program is equal to \$18,496,200 GPR in 2017-18 and \$18,759,300 GPR in 2018-19. In 2017-18, 144 school districts qualified for aid under the program, with aid prorated at 98.8%, or approximately \$297 per pupil.

Low Revenue Adjustment. Under current law, any district with base revenue per pupil that is below a statutorily-specified amount (\$9,100 per pupil in 2017-18 and each year thereafter) may increase its revenues up to that amount.

SUMMARY OF BILLS

Sparsity Aid. Under the bills, beginning in 2018-19, school districts that qualify for aid under current law would receive a payment equal to \$400 per pupil, an increase of \$100 per pupil over the current law amount. The bills would provide additional funding of \$6,454,600 GPR in 2018-19.

Attachment 1 shows 2016-17 membership and pupils per square mile for each district in the state, as well as each district's aid eligibility and prorated aid amount in 2017-18. The attachment also shows the estimated aid each district could receive in 2018-19 under the bills, and compares that amount to the prorated aid received by each district in 2017-18.

Low Revenue Adjustment. Under the bills, the low revenue adjustment would increase to \$9,400 per pupil in 2018-19, \$9,500 per pupil in 2019-20, \$9,600 per pupil in 2020-21, \$9,700 per pupil in 2021-22, and \$9,800 per pupil in 2022-23 and each year thereafter.

Under the bills, if an operating referendum was rejected by the voters in a district during the 2015-16, 2016-17, or 2017-18 school year, the low revenue adjustment would remain at \$9,100 per pupil in the three school years following the school year during which the referendum was held. If an operating referendum is held during the 2018-19 school year or any school year thereafter and is rejected by the voters, the low revenue adjustment for that district would remain at the amount for the school year during which the referendum is held for the three following school years.

FISCAL EFFECT

Sparsity Aid. As noted above, the bills would provide additional funding of \$6,454,600 GPR in 2018-19 for the sparsity aid program. It is estimated that this funding would be sufficient to fully fund the program in that year.

Low Revenue Adjustment. The provisions of AB 835/SB 690 regarding the dollar amount of the low revenue adjustment for 2018-19 and thereafter are identical to those that were contained in the 2017-19 budget bill as passed by the Legislature. During budget deliberations, it was estimated that statewide revenue limit authority would increase by \$18.1 million in 2018-19 due to the low revenue adjustment. To mitigate the impact of this increase on the property tax for a median-valued home, the Legislature's budget bill increased the lottery credit by using \$9 million GPR. The Governor vetoed the low revenue adjustment provisions in the budget bill. However, the additional funding for the lottery credit remains.

Based on more recent data and taking into account the referendum provision, it is estimated that the proposed low revenue adjustment would provide an additional \$15.6 million in 2018-19 in revenue limit authority statewide for school districts compared to current law. It is not possible to project with certainty which districts would be eligible for the proposed low revenue adjustment in 2018-19 under the bills, because that depends in part on future enrollment changes in individual districts and the levy decisions of local school boards. Data on revenue per pupil and enrollment for 2017-18, however, can be used to provide some indication of which districts might be eligible for the proposed low revenue adjustment amount. Attachment 2 shows the estimated base revenue per pupil and the maximum estimated adjustment that each district could receive under the low revenue adjustment amount in 2018-19 under the bills.

For declining enrollment districts, there would be an interaction between the base revenue hold harmless adjustment and the proposed low revenue adjustment. If there is no per pupil adjustment and no change in the low revenue adjustment (as under current law), a district with declining enrollment would receive some additional revenue limit authority from the base revenue hold harmless adjustment. Under this adjustment, if a district's initial revenue limit in the current year, after consideration of the per pupil adjustment and low revenue adjustment, but prior to any other adjustments, is less than the district's base revenue from the prior year, the district's initial revenue limit is set equal to its prior year base. The initial revenue limit for a declining enrollment district would be lower than its base revenue as a result of the loss of pupils. Increasing the low revenue adjustment would increase the initial revenue limit for eligible districts, which would result in a partially or fully offsetting reduction in the district's base revenue hold harmless adjustment. The low revenue adjustment, however, is a recurring adjustment which adds to an eligible district's base revenue, while the base revenue hold harmless adjustment is nonrecurring.

The magnitude of any such offset would depend on enrollment changes in 2018-19. Districts that were eligible for the declining enrollment adjustment under revenue limits in 2017-18 are marked in the attachment with a single asterisk to give some indication of the districts that could potentially be affected by the interaction.

Under the bills, if an operating referendum was rejected by the voters in a district during the 2015-16, 2016-17, or 2017-18 school year, the low revenue adjustment would remain at \$9,100 per pupil in the three school years following the school year during which the referendum was held. This provision is estimated to affect the following nine districts in 2018-19: Bonduel, Cameron, Chilton, Darlington Community, Freedom, Gillett, Howard-Suamico, Osceola, and Southern Door County. The estimated low revenue adjustment amount that affected districts could receive in the absence of this provision under the bills is marked in Attachment 2 with a double asterisk. While such a district would not be eligible for the low revenue adjustment in 2018-19 under the bills, it could become eligible for the higher amount that applies under the bills after the relevant three-year period has ended, depending on future enrollment changes and school board levy decisions. For declining enrollment districts that are affected by the referendum provision, the low revenue adjustment amount could be offset by the base revenue hold harmless adjustment.

* Declining enrollment district in 2017-18; low revenue adjustment shown could reduce the district's base revenue hold harmless, resulting in a lower net increase in revenue limit authority compared to current law.

** District would not be eligible for estimated low revenue adjustment shown in 2018-19 under referendum eligibility provision.
