Supplemental Security Income Program

Introduction and Overview

The supplemental security income (SSI) program, authorized under Title XVI of the federal Social Security Act, provides cash benefits to low-income elderly, blind, and disabled persons who meet certain financial and nonfinancial eligibility criteria. The program was established by the 1972 amendments to the Social Security Act (P.L. 92-603) and implemented in 1974 as a comprehensive replacement to the old-age assistance (OAA), aid to the permanently and totally disabled (APTD), and aid to the blind (AB) programs. The SSI program is administered at the federal level by the Social Security Administration (SSA), which establishes uniform eligibility standards, federal benefit levels and program policies, and at the state level by the Department of Health and Family Services (DHFS).

The purpose of the program is to ensure that the SSI benefit paid to an eligible individual is the amount that is necessary to raise the income of the individual to a statutorily prescribed income "floor." The benefit paid is the difference between the "floor," or maximum benefit level and the individual's countable (earned and unearned) income from other sources. As the individual's countable income changes, a corresponding adjustment to the SSI benefit payment enables the individual to maintain this specified amount of cash income.

In addition, eligibility for SSI provides an individual with categorical eligibility for medical assistance (MA) benefits. This link between the two programs eliminates the need for SSI beneficiaries to use their cash income to support most health-related expenses. Consequently, SSI beneficiaries' cash income can be used for other

necessary expenses, such as housing and food.

Most states, including Wisconsin, choose to supplement federal SSI payments with state-supported payments to SSI beneficiaries. In Wisconsin, the state SSI supplement is dependent on an individual's receipt of federal SSI benefits. Some states, including Wisconsin, are required to supplement the basic federal payment to ensure that individuals who received benefits under OAA, APTD, and AB, as of December 1, 1973, did not have their benefits reduced as a result of the implementation of the SSI program.

Eligibility

Eligibility for SSI benefits is based on financial and nonfinancial criteria established under federal law.

Nonfinancial Criteria. To meet the nonfinancial criteria of SSI, a person must be 65 years of age or older, blind or disabled. To qualify for SSI payments based on blindness, a person must have vision no better than 20/200 or have a limited visual field of 20 degrees or less with the best corrective eyeglasses.

SSI payments for a disability may be made to an adult if the individual is unable to engage in substantial gainful activity, which, in calendar year 2007, is defined as \$900 or more of earnings per month, because of a physical or mental impairment. This impairment can be expected to result in death or have lasted, or is expected to last, for a continuous period of at least twelve months.

For purposes of SSI eligibility, an individual under the age of 18 is considered disabled if he or she has a medically determinable physical or mental impairment which results in marked and severe functional limitations. This impairment can be expected to result in death or have lasted, or can be expected to last, for a continuous period of not less than twelve months.

The Social Security Administration contracts with states to determine whether applicants for SSI benefits are disabled. In Wisconsin, the DHFS Disability Determination Bureau is responsible for making disability determinations under rules established by SSA. Medical criteria for determining disabilities are included in a list of medically determinable impairments regularly produced by the SSA to assist staff in making disability determinations. Individuals diagnosed with impairments included in this list are automatically considered disabled for SSI eligibility purposes.

If an adult applicant's impairment is not included in the list of medically determinable impairments, the rules established by SSA require that the applicant receives an individual assessment to determine if his or her impairment prevents him or her from engaging in substantial gainful activity and is comparable in severity to impairments included on the list. A functional assessment is required for any child who is under 18 years of age to determine how the child's condition compares to his or her age norms.

Financial Criteria. SSI eligibility is restricted to qualified persons who have countable resources of up to \$2,000, or \$3,000 for married couples. Countable resources include cash, bank accounts, stocks, U.S. savings bonds, land, life insurance, personal property, and vehicles. Certain resources are excluded from consideration, including: (1) the home in which the individual lives and the land that the home is on; (2) one vehicle, regardless of value, if it is used for transportation for the

individual or a member of his or her household; (3) life insurance policies with a total face value of up to \$1,500; (4) household goods and personal effects; (5) burial plots or spaces; (6) a burial fund up to \$1,500 for the individual and his or her spouse; (7) the individual's wedding and engagement rings; (8) retroactive SSI or Social Security benefits for up to nine months after the individual receives them; and (9) grants, scholarships, fellowships, or gifts set aside to pay educational expenses for nine months after receipt.

The SSI income limits are equal to the SSI payment levels plus any applicable disregards. The income and resources of the parents of a blind or disabled child under age 18 are considered in determining the child's eligibility.

SSI recipients are not eligible to participate in Wisconsin Works (W-2), Wisconsin's replacement to the aid to families with dependent children (AFDC) program. However, the spouse of an SSI recipient may participate in W-2.

State SSI Benefits

Basic State Supplement. Each Wisconsin recipient of a federal SSI benefit is eligible for a basic state supplement to his or her federal benefit. The maximum benefit levels are established effective January 1 of every year. The maximum benefit levels are based on living arrangements and marital status. Table 1 identifies the maximum federal and state benefit levels effective January 1, 2007. A recipient's benefit level is based on whether that individual is living independently in his or her own household or living in the household of another person, such as a relative or friend. If a recipient has a spouse who is also eligible to receive SSI benefits, the couple receives a combined benefit.

Table 1: Maximum Monthly Payment Levels 2007

Living Arrangement	Federal	State	Total Payment
Independent Living			
Individual	\$623.00	\$83.78	\$706.78
Couple	934.00	132.05	1,066.05
Couple/One Spouse Eligible	623.00	130.43	753.43
Living in the Household of Another			
Individual	415.34	83.78	499.12
Couple	622.67	132.05	754.72
Couple/One Spouse Eligible	415.34	135.05	550.39
Natural Residential or Substitute Care SSI-E Exceptional Expense Supplement			
Individual	623.00	179.77	802.77
Couple	934.00	477.41	1,411.41

Beginning January 1, 1996, the basic state supplement has not been available to new SSI applicants unless their income is of a level that also qualifies them for the federal SSI benefit. Therefore, receiving federal SSI benefits is a prerequisite for the receipt of the state SSI supplemental benefit. However, individuals who received the state supplement, but not the federal benefit as of December 31, 1995, will continue to receive the state supplement as long as they continue to meet all other SSI eligibility conditions. As of August, 2006, 6,906 individuals received the state-only supplement.

Exceptional Expense Supplement. Certain SSI recipients are eligible for an enhanced payment, referred to as the SSI-E for exceptional expenses. An SSI recipient who resides in a natural residential setting (home or apartment) may be eligible for an SSI-E payment of up to \$95.99 per month if the recipient requires 40 or more hours per month of supportive home care/respite care, daily living skills training, and/or community support program services. If the recipient is a minor child residing with a parent, only services needed when the parent is away from the residence for purposes of employment count toward the 40-hour requirement. If the recipient resides with a spouse, only services needed when the spouse is away from the residence for purposes of employment or because the spouse is

physically or mentally unable to provide care count toward the 40-hour requirement. SSI recipients whose expenses are greater than the SSI-E payment level (\$802.77 in 2007 for an individual) and live in a foster or group home for children or in an adult family or foster home are eligible for SSI-E benefits. An SSI recipient who resides in community-based residential facility, adult family home, or a certified residential care apartment complex is automatically eligible for the SSI-E supplement.

Supplement for Institutional Residents. When an individual enters a hospital or nursing home in which more than half of the cost of care is paid by MA, the individual's monthly SSI benefit standard is reduced to \$30, beginning with the first full month the individual is in the institution. This \$30 payment is considered a personal needs allowance intended to take care of small personal expenses. Recipients with a monthly income over \$45 are not eligible to receive the \$30 payment but, instead, may keep \$45 per month from their resources with the remainder contributing to the cost of their care.

However, if a physician certifies that a person's stay in a hospital or other medical institution is not likely to exceed three months and the person needs to continue to maintain a home to return to, SSI benefits will not be reduced and the recipient will continue to receive the full SSI benefit for up to three months.

Full SSI payments may be made to persons in publicly-operated community residences serving no more than 16 residents. In addition, residents of public emergency shelters can receive full SSI payments for up to six months in any nine-month period.

Disabled children who receive medical treatment at home under MA state home care plans, who previously received SSI personal needs allowances while in medical institutions, and who otherwise would be ineligible for SSI because of their parents' income or resources, are eligible to receive the \$30 monthly personal needs allowance

that would be payable if they were institutionalized, without regard to their parents' income or resources.

Caretaker Supplement. Certain SSI recipients with dependent children receive a caretaker supplement to their SSI benefit. A recipient with one dependent child receives a supplement equal to \$250 per month. A recipient with two or more dependent children receives a supplement of \$250 per month for the first child and \$150 per month for each additional dependent child. This supplement is a flat-rate benefit that is not affected by the amount of income an SSI recipient receives. The supplemental payments are supported with temporary assistance for needy families (TANF) funds.

Eligibility. An SSI recipient is eligible to receive the caretaker supplement if all of the following apply:

- The custodial parent receives state SSI benefits and is ineligible for a W-2 employment position solely because he or she receives state SSI benefits;
- If the dependent child has two custodial parents, each custodial parent receives state SSI benefits;
- The custodial parent assigns to the state any right of the custodial parent or of the dependent child to support from any other person;
- The dependent child meets the eligibility criteria, or would meet the eligibility for AFDC if AFDC continued to exist; and
- The dependent child does not receive federal SSI benefits.

The supplement was established to replace benefits that the children of SSI recipients had received under the AFDC program. Under AFDC, the dependent children of SSI recipients could be eligible for child-only AFDC benefits, meaning the income and assets of the parents or any other SSI

recipient in the household would not be considered when determining eligibility.

In 2005-06, an average of 5,803 SSI recipients received a caretaker supplement on behalf of an average of 12,222 children each month.

Calculation of Payment Levels

For the basic supplement and SSI-E, the actual payment an individual receives is the difference between the applicable maximum benefit level, as determined by an individual's marital status and living arrangement, and the individual's countable income.

Countable Income. An individual's countable income is defined as earned and unearned income minus certain disregards. Earned income includes wages and net earnings from self-employment. Unearned income includes social security checks, veterans compensation, worker's compensation, pensions, annuities, gifts, maintenance-in-kind (i.e., food and shelter), and interest. For each month, \$20 of earned or unearned income is excluded. In addition, \$65 per month of earned income plus one-half the earnings above \$65 is disregarded.

The income and resources of an ineligible spouse who lives with an applicant or recipient or those of a parent living with a child applicant or recipient are considered in determining eligibility and the amount of the payment. A portion of their income and resources is deemed available to the applicant or recipient and factored into the determination of eligibility and the monthly benefit level.

Under federal law, any earned or unearned income first reduces the federal SSI benefit and then is applied toward reducing the state benefit. If an individual's countable income, minus any disregards, is greater than the maximum federal

benefit level established for that individual's living arrangements and marital status, the individual is not eligible to receive either state or federal SSI benefits.

Table 2 illustrates income deeming procedures for earned and unearned income as of January 1, 2007, for individuals living in their own homes. In the first example, the individual receives \$300 per month in social security benefits and has no earned income. In the second example, the recipient also receives \$300 per month in social security benefits and earns \$125 per month.

Treatment of Other Benefits and Assistance.

Federal law requires SSI applicants to file for all other benefits for which they may be eligible. Generally, cash benefits such as social security, veteran and worker's compensation, and pensions are considered countable income for purposes of determining SSI eligibility and payment amount. Need-based assistance funded with state revenue, however, is generally not considered countable income. Appendix I lists those benefits and resources not included when determining countable income.

Work Incentive Provisions

Federal law includes a number of work incentive provisions for SSI recipients. One provision, Section 1619 of the Social Security Act, allows a disabled SSI recipient to work and continue to receive SSI cash payments and/or medical assistance. Prior to the enactment of this provision, a disabled SSI recipient who, after a trial work period, worked at the substantial gainful activity (SGA) level, would lose his or her disability status even if the recipient continued to be severely impaired and the recipient's income and resources were within the SSI limits. This loss in SSI eligibility resulted in the loss of medical assistance benefits as well.

Section 1619(a). Section 1619(a) provides for the continuation of cash benefits for disabled and blind SSI recipients who are working at the SGA level as long as there is not a medical improvement in the disabling condition. However, the amount of their cash benefit is gradually reduced as earnings increase.

Table 2: Benefit Calculations

		Calculation of Countable Income	
		Example 1	Example 2
Unearned Income			Unearned Income

Total Monthly SSI Payment - Federal and State	\$426.78	Total Monthly SSI Payment - Federal and State	\$396.78

Section 1619(b). Under Section 1619(b), an individual can continue to be eligible for MA after earned income eliminates the individual's cash benefit. This provision applies as long as the individual: (a) continues to be blind or have a disabling impairment; (b) except for earnings, continues to meet all other requirements for SSI eligibility; (c) needs MA in order to work; and (d) has insufficient earnings to purchase comparable health care benefits.

In December, 2005, 319 Wisconsin recipients benefited from the 1619(a) option and 2,199 Wisconsin recipients benefited from the 1619(b) option.

Another work incentive provision is a plan for achieving self-support (PASS). This provision allows disabled and blind recipients to set aside income and resources under a written, approved plan in order to achieve a vocational goal. The funds set aside are not counted against the SSI financial limits for up to 48 months. A PASS may also be used to establish initial financial eligibility by reducing an individual's countable income and/or resources to a level less than the SSI limits. In December, 2005, 75 SSI recipients in Wisconsin benefited from this provision.

Finally, federal law allows blind and disabled persons to disregard certain work expenses when determining SSI eligibility and the amount of the monthly payment. For disabled persons who work, certain expenses for items needed for work because of the person's impairment are disregarded. In December, 2005, 265 SSI recipients in Wisconsin were able to disregard certain work expenses due to an impairment. For blind persons who work, certain work expenses for items needed that do not relate to the person's impairment may also be disregarded. In December, 2005, another 72 SSI recipients in Wisconsin were able to disregard certain work expenses due to their blindness.

Administration

Applications for SSI are processed through the local offices of the SSA. The SSA contracts with the DHFS Disability Determination Bureau to process disability determinations for persons applying for SSI on the basis of disability. Additionally, states have the option of administering their own supplemental benefit payments, or contracting with the SSA to administer the state supplement. In either case, the state determines the level of the state supplemental payment.

The state supplement to the federal benefit is administered by the state's MA fiscal agent, Electronic Data Systems (EDS), under a contract with DHFS. EDS distributes payments and responds to beneficiary questions. State SSI recipients continue to receive their federal benefits from the federal government. Under the state's contract with EDS, which is an addendum to the state's MA contract, the state pays EDS an annual fee of approximately \$926,800 for staff costs and overhead. Postage costs are paid directly by DHFS.

Eligibility determinations for the caretaker supplement are made through the client assistance for re-employment and economic support (CARES) system and one check is sent to individuals who receive both a monthly SSI check and the caretaker supplement. In 2005-06, the administrative costs related to the caretaker supplement in CARES totaled \$1,433,500. These costs were supported with federal TANF funds.

Federal Pass-Along Requirement

An amendment to the Social Security Act in July, 1974, mandated automatic cost-of-living increases in the federal SSI benefit equal to, and coinciding with, the automatic cost-of-living

increases in social security benefits. When Congress initially enacted cost-of-living increases in the federal SSI benefit, some states did not maintain their supplemental payment levels, but rather, reduced the payment levels by amounts up to the amount of the increase in the federal level. Consequently, the federal benefit increase was not always passed along to recipients. Recipients would receive the same, or only a slightly higher, combined federal and state SSI benefit.

The enactment of the "pass-along" requirement in 1976, which first took effect with the cost-of-living increase in July, 1977, generally required that the federal increases be passed along to SSI recipients. However, federal law also allows any state that makes supplemental payments, regardless of whether the supplement is administered by the state or federal government, to comply with the pass-along requirement by either: (a) maintaining the total annual expenditure level; or (b) maintaining the state supplemental payment levels to each category of recipients.

States are required to inform the federal government of their selected methodology each October. However, federal law allows states to change their method of compliance at any point throughout the year.

Maintaining Total Annual Expenditures. Wisconsin currently chooses to meet the pass-along requirement by maintaining total annual expenditures. In Wisconsin, this is often referred to as a maintenance-of-effort (MOE) requirement. Under this methodology, a state's total supplemental payments for both mandatory and optional beneficiaries in a calendar year must be at least equal to its total expenditures for such payments in the preceding calendar year. Thus, if increased caseload causes state expenditures for the SSI supplement to rise each year, the state would still comply with pass-along requirements if increased costs were offset with reductions in payments levels. If the state supplement is reduced at the same time the federal cost-of-living adjustment is made, recipients may not actually

see a decrease in the total payment.

Wisconsin's required MOE amount for 2005 is \$128,281,600. In 2005, Wisconsin met its MOE requirement with regular SSI state supplement GPR expenditures of \$127,081,408 and caretaker supplement GPR expenditures of \$1,200,192. GPR expenditures increased in 2005-06 due to increased caseloads, which caused SSI state supplement payments alone to surpass the \$128,281,600 MOE amount. GPR expenditures for 2005-06 were \$129,556,000.

Program Trends

Benefit Levels. Table 3 identifies the change in federal and state benefit levels for Wisconsin SSI recipients who live independently. The table shows that between 1987 and 2007, federal benefit levels for individuals who live independently (the largest category of SSI recipients) increased by 83.2%, rising from \$340 in 1987 to \$623 in 2007. In general, federal benefit levels have increased due to annual cost-of-living adjustments.

Table 3: SSI Maximum Monthly Benefit Amount by Payment Source*

Calendar Year	Federal		State		Total	
	Benefit	% Change	Benefit	% Change	Benefit	% Change
1987	\$340.00		\$101.70		\$441.70	
1988	354.00	4.1%	102.72	1.0%	456.72	3.4%
1989	368.00	4.0	102.72	0.0	470.72	3.1
1990	386.00	4.9	102.72	0.0	488.72	3.8

1994	446.00	2.8	84.70	-8.6	530.70	0.8
1995	458.00	2.7	83.68	-1.2	541.68	2.1
1996	470.00	2.6	83.78	0.1	553.78	2.2
1997	484.00	3.0	83.78	0.0	567.78	2.5
1998	494.00	2.1	83.78	0.0	577.78	1.8
1999	500.00	1.2	83.78	0.0	583.78	1.0
2000	513.00	2.6	83.78	0.0	596.78	2.2
2001	531.00	3.5	83.78	0.0	614.78	3.0
2002	545.00	2.6	83.78	0.0	628.78	2.3
2003	552.00	1.3	83.78	0.0	635.78	1.1
2004	564.00	2.2	83.78	0.0	647.78	1.9
2005	579.00	2.7	83.78	0.0	662.78	2.3
2006	603.00	4.1	83.78	0.0	686.78	3.6
2007	623.00	3.3	83.78	0.0	706.78	2.9

*For eligible individual in own household.

Requests for changes in the level of state supplemental payments must be submitted by DHFS to the Secretary of the Department of Administration (DOA). Upon approval from DOA, the request is sent to the Joint Committee on Finance. The Committee has 14 days in which to schedule a public hearing or executive session to review the proposal, otherwise the proposal is deemed approved. Any payment changes made by the Committee are subject to approval by the Governor. If the Governor has taken no action within 10 days, not including Sundays, the decision of the Committee takes effect.

Program Participation. Table 4 identifies caseload distributions by category of eligibility from fiscal year 1980-81 through 2004-05. Individuals receiving SSI benefits on the basis of a disability comprise the largest group of recipients.

Table 4: Average Caseload Levels, by Eligibility Determination

Fiscal Year	Disabled	Elderly	Blind	Total
1980-81	36,452	30,454	954	67,860
1981-82	35,818	26,127	964	62,909

2002-03	82,635	11,113	1,040	94,788
2003-04	84,203	10,624	1,054	95,881
2004-05	86,618	9,914	1,019	97,551
2005-06	86,854	9,522	998	97,374

SSI eligibility categories are somewhat misleading, since an elderly person with a disability may be counted as disabled, rather than elderly when SSI eligibility is initially determined. In December, 2005, while 17.4% of Wisconsin SSI recipients were 65 or older, only 9.2% of all Wisconsin SSI recipients were categorized as receiving benefits based on age.

Changes in the number of disabled SSI recipients can be attributed to the creation of outreach programs, changes in the disability determination and review process, and state and local efforts to shift beneficiaries to the federal and state-funded SSI program. However, the most significant changes have been the result of eligibility changes targeted to disabled children and individuals considered disabled due to alcoholism or drug addiction. These changes are described below.

Children's Eligibility Changes. As shown in Table 5, the number of children that received SSI benefits increased significantly during the 1990s. Although the data include a count of the number of blind children receiving SSI, this group typically accounts for less than 2% of the total disabled/blind caseload.

The increase in caseload beginning in 1992 is usually attributed to changes made in the disability determination process for children as a result of the relaxed eligibility criteria stemming from the 1990 U.S. Supreme Court decision *Sullivan v. Zebley*. In addition, SSA attributes the rise in the number of children on SSI to: (a) outreach efforts conducted by SSA beginning in 1989; (b) updated information available in late 1990 for evaluating mental disorders in children; and (c) new regulations as a result of *Zebley*.

Finally, the 1996 federal welfare reform legislation changed the children requirements in two ways. First, it raised the level of required functional loss for children for approved receipt of SSI benefits. A total of 6,979 childhood SSI disability cases in Wisconsin were redetermined

Table 5: Disabled/Blind Children Receiving SSI Benefits

Month/Year	Wisconsin	% Change	Nationally	% Change

Source: 1980 through Dec 1995: Social Security Bulletin, Annual Statistical Supplement and the office of Research and Statistics, Social Security Administration. Figures include persons age 18-21 who are students and still classified as children. For December 1995 through 2005, Wisconsin data was retrieved from the State Data Exchange (SDX) system by the Department of Health and Family Services.

under the new eligibility criteria. Of these, 3,928 were ceased, 2,689 were continued after disability was confirmed, and 362 were determined no longer eligible for SSI due to nonmedical reasons. Second, the 1996 welfare reform legislation required that all SSI child recipients have their medical eligibility redetermined within one year of their 18th birthday.

Disabled Due to Alcoholism or Drug Addiction Eligibility Changes. The Contract with America Advancement Act of 1996 (Public Law 104-121), enacted in March 1996, eliminated drug addiction and alcoholism as a basis for eligibility for SSI benefits due to a disability. This provision applied to new applicants beginning March 29, 1996. Effective January 1, 1997, approximately 3,100 individuals lost their SSI eligibility as a result of this provision. Another 1,180 were redetermined as eligible under other criteria.

Expenditures. Appendix II shows expenditures for the SSI state supplements for state fiscal years 1980-81 through 2005-06, by funding source.

APPENDIX I

SSI Income Determinations Items Not Included as Countable Income in Determining Recipient Payment Amount

- Medical care and services (including reimbursements and payment of health insurance premiums by others);
- Social services (including program reimbursements);
- Receipts from the sale, exchange to replacement of resources (such receipts are considered resources);
- Income tax refunds;
- Earned income tax credit payments;
- Payments by credit life or credit disability insurance (that is, insurance on charge accounts or other credit accounts);
- Proceeds of a loan;
- Bills paid by someone else for things other than food, clothing or shelter;
- Replacement of lost or stolen income; and
- Home energy assistance.
- \$20 a month of earned or unearned income (except some types of unearned income based on need, such as certain veterans' pensions);
- \$65 a month of earned income plus one-half of earned income over \$65 a month or, if there is no unearned income, \$85 a month of earned income plus one-half of the remainder;
- FoodShare benefits;
- Housing assistance from most federal housing programs;
- Government refunds of taxes paid on real property or on food purchases;
- Assistance based on need from a state or local political subdivision or Indian tribe;
- Amounts for tuition and fees paid from grants, scholarships and fellowships from the Department of Education of the Bureau of Indian Affairs;
- Home-grown produce consumed by the household;
- Irregular or infrequent earned income totaling no more than \$30 a quarter;
- Irregular or infrequent unearned income totaling no more than \$60 a quarter;
- Domestic commercial transportation tickets received as gifts and used;
- Payments for providing foster care to a child who is not receiving SSI but has been placed in the recipient's household by an approved agency;
- If a child, one-third of any child support payments received from the absent parent;
- Earnings (up to \$1,510 a month, but no more than \$6,100 a year) of a blind or disabled child who is a student under 22;
- If disabled or blind, the amount of income necessary for fulfillment of an approved plan for achieving self-support (PASS);
- The cost of items or services needed to help a blind person work;
- The cost of items or services needed to help a person with a disability work;
- Compensation to volunteers from ACTION programs run by state and local subdivisions;
- Restitution payments made by the U.S. government to Japanese-Americans and Aleuts who were interned or relocated during World War II;
- Payments made by the Austrian government under paragraphs 500-506 of the Austrian General Social Insurance Act;
- Agent Orange settlement payments;
- Reparations payments received by Holocaust survivors from the General Republic of Germany;
- Netherlands WUV payments to victims of persecution during the German and Japanese occupations of the Netherlands and the Dutch East Indies;
- Relocation assistance provided for federal or federally assisted projects or by state or local governments;

- Disaster assistance;
- Most federal judgment distribution payments and per capita payments of funds held in trust by the Secretary of the Interior made to members of Native American tribes, including purchases made with such payments;
- Up to \$2,000 annually of income that Native Americans get from their interests in trust or restricted Indian lands;
- Interest which is paid on excluded burial funds and left to accumulate;
- Any interest earned and left to accumulate as part of the value of an excluded burial space purchase agreement;
- Interest and dividends earned on other resources, in many cases;
- Food, clothing or shelter in a nonprofit retirement home or similar institution that is provided or paid for by a nonprofit organization that is not expressly obligated to do so;
- Food, clothing, shelter and home energy assistance provided by a private nonprofit organization if the assistance is based on need as certified by the state;
- Home energy assistance provided by certain home energy suppliers if the assistance is based on need and is certified by the state;
- Victims' compensation payments; and
- Payments from the Radiation Exposure Compensation trust fund.

APPENDIX II

SSI Benefit Expenditures State Fiscal Years 1980-81 through 2005-06

State Fiscal Year	GPR Expenditures	TANF Expenditures	% Change of Total Funding
1980-81	\$28,945,000	\$0	N.A.
1981-82	38,945,000	0	34.5%
1982-83	45,556,200	0	17.0
1983-84	55,530,400	0	21.9
1984-85	68,162,000	0	22.7
1985-86	78,215,000	0	14.7
1986-87	85,044,100	0	8.7
1987-88	89,883,200	0	5.7
1988-89	93,419,900	0	3.9
1989-90	99,054,000	0	6.0
1990-91	105,043,000	0	6.0
1991-92	114,448,800	0	9.0
1992-93	131,029,700	0	14.5
1993-94	128,182,100	0	-2.2
1994-95	122,580,000	0	-4.4
1995-96	131,889,800	0	7.6
1996-97	133,087,500	0	0.9
1997-98	128,281,500	1,692,600	-2.3
1998-99	128,281,600	9,334,700	5.9
1999-00	128,281,600	15,574,700	4.5
2000-01	128,281,600	20,390,200	4.5
2001-02	128,281,600	21,991,600	0.5
2002-03	128,281,600	22,749,100	2.6
2003-04	128,281,600	26,635,100	1.1
2004-05	128,281,600	28,322,900	0.6
2005-06	129,556,000	29,334,200	0.8
