State and Local Government Revenue and Expenditure Rankings

Introduction

This paper presents information on Wisconsin's rankings among all states on state and local taxes, other revenues, and expenditures by state and local governments. The data used in calculating the rankings is from the U.S. Census Bureau's publication "State and Local Government Finances," which is generally issued each spring. The Census data is the most complete information available, and covers government revenues and expenditures in all 50 states, the District of Columbia, and local units of government.

A drawback of this data, however, is that it is somewhat dated. The most recent figures were released in July, 2008, and cover state fiscal year 2005-06, which ran from July 1, 2005, through June 30, 2006, in most states. Therefore, there is a lag of two years between the end of the period covered by the data and its release. Other organizations, such as the Tax Foundation, issue more timely tax rankings, but their figures are based on projections rather than actual collections. Also, the Tax Foundation does not prepare detailed estimates of state and local government expenditures. Another potential drawback of the Census data is that states may differ in how they report certain revenues and expenditures, such as refundable tax credits. Despite these limitations, the Census data is the most accurate information available for calculating state-by-state revenue and expenditure rankings.

Comprehensive Census Bureau data is available for fiscal year 1971-72, fiscal years 1976-77 through 1999-00, fiscal year 2001-02, and fiscal years 2003-04 through 2005-06. The Census Bureau did not issue state-by-state figures for 2000-01 or 2002-03, and less detailed information is available

for some years prior to 1971-72. Government revenue and expenditure amounts are presented on a fiscal-year basis. Personal income amounts are shown for the calendar year in which the fiscal year began, and population amounts are shown for the calendar year in which the fiscal year ended. This paper primarily focuses on Wisconsin's most recent tax and expenditure rankings, and also presents information regarding historical trends.

The remainder of this paper is comprised of five sections. The first section presents an overview of how state and local revenue and expenditure rankings are calculated and the second section provides information about Wisconsin's population and state personal income. This is followed by sections covering Wisconsin's rankings on state and local government revenues and expenditures. Finally, the last part of the paper includes a number of attachments, which show population, personal income, revenue, and expenditure rankings for all 50 states and the District of Columbia. The attachments also present historical information on Wisconsin's state and local government revenues and expenditures.

Calculation of Revenue and Expenditure Rankings

There are two measures that are commonly used to portray state and local tax burdens and spending levels:

- Per capita revenue collections or expenditures; and

- Revenue collections or expenditures per \$1,000 of state personal income.

Per capita revenues or expenditures are calculated by dividing total revenue collections or government spending by a state's population. Revenues or expenditures per \$1,000 of personal income, which is generally believed to more accurately reflect the ability of state residents to pay taxes and fund government expenditures, is calculated by dividing total revenue collections or spending by total state personal income and multiplying that result by \$1,000. State personal income is a broad indicator of the size of a state's economy. It measures income from current production and includes wages and salaries, fringe benefits, personal interest and dividend income, rental income, proprietors' income, and public and private transfer payments to individuals. Employer and employee contributions for social insurance are subtracted and capital gains and losses are not included in calculating personal income.

In comparing revenues and expenditures across states, it is important to include both state and local governments, because there are significant differences among states in the mix of state and local revenues used to fund various programs. The extent to which the state deviates from the U.S. average for each measure is also noteworthy. A relatively high or low tax or expenditure ranking may be viewed as less of a concern if the state is close to the national average than if it significantly differs from the average.

State Population and Personal Income

Wisconsin's population in June, 2007, was estimated at 5.60 million, which was 20th largest in the nation. Wisconsin residents made up 1.9% of the total U.S. population. Wisconsin's aggregate state personal income in calendar year 2007 was also 20th highest at \$203.0 billion. Using these

numbers, per capita personal income in Wisconsin was \$36,241, which was 25th highest and 6.0% below the U.S. average. Rankings for all states on these measures are presented in Attachment 1.

Wisconsin's population grew by 17.2% between 1987 and 2007, an average increase of 0.8% per year. In contrast, the population for all 50 states and the District of Columbia rose by 24.5% (1.1% per year) during that period. Wisconsin represented 2.0% of the nation's population in 1987 and 1.9% in 2007

Aggregate personal income in Wisconsin also grew more slowly than the U.S. total during this period: by 5.2% annually compared to 5.6% annually. Wisconsin's per capita personal income was 5.9% less than the national average in 1987 and 6.0% less in 2007. Wisconsin's per capita personal income grew by approximately 4.4% per year during this period, which was the same as the growth rate for the entire U.S.

[The population and personal income figures shown above and used in calculating the government revenue and expenditure rankings are the most recent estimates issued by the U.S. Census Bureau and the U.S. Bureau of Economic Analysis. These figures were released in September, 2008.]

State and Local Government Revenue Rankings

The Census Bureau's definition of government revenue includes all amounts of money received by a government from external sources during its fiscal year, net of refunds and other correcting transactions. Under this definition, transfers of funds within the same level of government, such as contributions to employee retirement systems, are not counted as revenues. Non-cash transactions, such as the receipt of technical services or property, are also not included.

The Census Bureau also does not include as government revenue money received from the issuance of debt, sales of investments, or agency or private trust transactions. An agency transaction is a financial activity in which one government acts as an agent for another unit of government, such as when the state withholds federal income and payroll taxes from its employees for disbursement to the federal government or when the state Department of Revenue collects local sales taxes for distribution to counties and other local taxing jurisdictions. A private trust transaction is a situation where a government accounting fund receives and disburses assets held in trust for a particular individual or corporation, such as the state support collections trust fund, which is used for the receipt and disbursement of child support payments.

As outlined below, the Census Bureau divides total government revenues into a number of subcategories. Tables 1 and 2 present information on state and local government revenue sources in Wisconsin for fiscal year 2005-06. The following sections describe the various revenue categories used by the Census Bureau and highlight some of the data shown in Tables 1 and 2.

Major Census Bureau Revenue Categories

The Census Bureau divides total state and local government revenues into four major categories: general revenue, utility revenue, liquor store revenue, and insurance trust revenue.

- *General revenue*, which is by far the largest of these categories, includes all revenues that do not fall into one of the other three categories.
- *Utility revenue* is comprised of gross receipts from sales and directly-related services and by-products of four types of government utilities: water, electric, gas, and mass transit.
- *Liquor store revenue* includes gross receipts of government-run liquor stores. In 2005-06, there

were no government-owned liquor stores in Wisconsin.

- *Insurance trust revenue* consists of contributions distinctively imposed for the support of public retirement and social insurance systems plus net earnings on the investment assets of such systems. It does not include contributions from the government that administers the system, whether they are paid on behalf of its employees covered by the plan or for supplemental support. Also excluded are general tax receipts that are credited to these trust funds. In Wisconsin, the two largest sources of insurance trust revenue are for government employee retirement systems and unemployment compensation. Employee retirement trust fund revenue includes earnings or losses on assets in such funds, but does not include contributions to such funds on behalf of employees. Unemployment compensation revenue primarily consists of required employer contributions to the state unemployment reserve fund.

As shown in Table 1, Wisconsin's total state and local government revenues were \$47,967.2 million in 2005-06. General revenue was \$38,369.6 million, utility revenue was \$1,364.1 million, and insurance trust revenue was \$8,233.6 million.

In 2005-06, Wisconsin ranked 26th highest on total state and local government revenues per capita (6.0% below the U.S. average), and 30th highest on total revenues per \$1,000 of personal income (0.8% below average).

If only general revenues are considered, Wisconsin ranked 29th on both of these measures. Wisconsin was below the U.S. average by 5.9% on general revenues per capita and by 0.7% on general revenues per \$1,000 of personal income. Wisconsin ranked 10th highest on insurance trust revenues per capita and 9th highest on insurance trust revenues per \$1,000 of personal income, primarily due to strong employee retirement investment earnings. Wisconsin was well below average on utility revenue.

TABLE 1

**Summary of Wisconsin Rankings on State and Local Government Revenues
Fiscal Year 2005-06**

| | Amount (Thousands) | Percent of Total | Per Capita Revenues | Rank | % Difference From U.S. Average | Revenues Per \$1,000 of Pers. Income | Rank | % Difference From U.S. Average |

| Employee Retirement Revenue | \$7,480,012 | 15.6% | \$1,342.27 | 9 | 13.8% | \$41.29 | 8 | 20.1% |
| Other Insurance Trust Revenue | <u>753,571</u> | <u>1.6</u> | <u>135.23</u> | 29 | -39.1 | <u>4.16</u> | 25 | -35.7 |
| Total Insurance Trust Revenue | \$8,233,583 | 17.2% | \$1,477.50 | 10 | 5.4% | \$45.45 | 9 | 11.2% |

*Motor fuel taxes include the motor fuel tax and petroleum inspection fee. The corporate income tax amount includes the corporate income and franchise tax and recycling surcharge. These amounts differ from the figures reported by the Census Bureau due to errors in the Census data.

Sources: U.S. Census Bureau and Bureau of Economic Analysis.

Breakdown of General Revenues

The Census Bureau divides state and local general revenues into two main categories: revenue received from the federal government and general revenue from own sources. General revenue from own sources is further broken down into three main categories: taxes, current charges, and miscellaneous general revenue. These revenue categories are described in more detail below:

- *Revenue from the federal government* includes federal monies received by state and local government entities for support of particular functions or for general financial support, amounts received as reimbursement for providing governmental services to the federal government, and any other revenue received from the federal government and used in the financing of state and local government activities. It does not include direct expenditures within a state or local jurisdiction by the federal government, such as for social security benefits, national parks, or military installations.
- *Taxes* are defined broadly as compulsory contributions extracted by a government for public purposes, other than employee and employer assessments and contributions to finance retirement and social insurance systems and special assessments to pay for capital improvements. Tax revenue is comprised of gross amounts collected (including interest and penalties) less amounts paid under protest and amounts refunded during the same period. With this definition, some revenue sources that are commonly considered to be fees in Wisconsin, such as the vehicle registration fee, are instead classified as taxes by the Census Bureau. As noted, employer contributions to the state unemployment insurance reserve fund are considered insurance trust revenues rather than taxes.
- *Current charges* include charges imposed for providing current services or for the sale of products in connection with general government activities (primarily university tuition and other fees for specific services). These are reported as gross amounts without deduction for the costs of

providing the products or services. Utility charges are shown as utility revenues and are not included in this category.

- *Miscellaneous general revenue* includes all other general revenue of state and local governments from their own sources. It does not include utility, liquor store, or insurance trust revenue, which are not considered to be general revenues. The largest single source of miscellaneous revenue is interest earnings. Special assessments and sales of property are also included in this category.

As Table 1 indicates, Wisconsin's state and local general revenue from own sources totaled \$31,244.7 million in 2005-06. The per capita amount was \$5,607, which was 24th highest in the nation and 3.4% below the U.S. average. General own-source revenue per \$1,000 of personal income was \$172, which was 22nd highest and 2.0% above average.

Revenues received from the federal government totaled \$7,124.8 million. Federal revenues per capita were \$1,279, which was 43rd highest and 15.5% below the national average. Federal revenues per \$1,000 of personal income were \$39, which was 38th highest and 10.8% below average.

State and local taxes totaled \$22,229.5 million in 2005-06, which was \$4,002 per capita and \$123 per \$1,000 of personal income. Wisconsin ranked 17th highest on state and local taxes per capita (equal to the U.S. average) and 13th highest on taxes per \$1,000 of personal income (5.6% above average). Wisconsin ranked high and was significantly above the U.S. average on the individual income tax, property tax, and motor fuel tax. Wisconsin was below the national average on most other taxes.

Current charges totaled \$5,786.9 million in 2005-06. The per capita amount was \$1,038, which ranked 27th and was 7.3% below the U.S. average. Current charges per \$1,000 of personal income were approximately \$32, which was 30th highest and 2.2% below average. The most significant

sources of current charges were for higher education, hospital services, and sewerage services.

Miscellaneous general revenue totaled \$3,158.3 million, or \$567 per capita and \$17 per \$1,000 of personal income. Wisconsin ranked 38th on miscellaneous revenue per capita (16.9% below average) and 39th highest on miscellaneous revenue per \$1,000 of personal income (12.2% below average). Table 1 also includes a breakdown of utility revenues and insurance trust revenues for 2005-06.

These figures show that Wisconsin collects slightly less general revenue than most other states, and relies more heavily on taxes and less heavily on federal funds and non-tax revenue sources. Ta-

ble 2 shows which government revenue sources in Wisconsin exceeded the U.S. average and which sources were lower than average.

Historical Revenue Trends

Historically, Wisconsin has had relatively high individual income and property tax collections, while sales tax revenues have generally been below the U.S. average. The corporate income tax has been less consistent. Since 1984-85, corporate income tax collections (including the recycling surcharge) per \$1,000 of personal income have ranged from 15.2% below the U.S. average in 2005-06 to 13.6% above average in 1994-95. Wisconsin's rankings on this measure have ranged from 11th

TABLE 2

Wisconsin State and Local Government Revenues Compared to U.S. Average -- 2005-06

| | Amount (Thousands) | Percent of Total | Per Capita Revenues | Rank | % Difference From U.S. Average | Revenues Per \$1,000 of Pers. Income | Rank | % Difference From U.S. Average |

*Motor fuel taxes include the motor fuel tax and petroleum inspection fee. The corporate income tax amount includes the corporate income and franchise tax and recycling surcharge. These amounts differ from the figures reported by the Census Bureau due to errors in the Census data.

Sources: U.S. Census Bureau and Bureau of Economic Analysis.

highest in the mid-1980s to 29th in 2005-06. Prior to 1982-83, Wisconsin's motor fuel tax revenues were generally below the U.S. average. Since that time, motor fuel tax collections have been significantly higher than average. Wisconsin has historically ranked lower on non-tax state and local revenues and on revenues received from the federal government.

The total tax burden in Wisconsin has fallen significantly since the 1990s. From fiscal years 1991-92 through 1999-00, total taxes per \$1,000 of personal income exceeded \$125 in each year, with a high of \$133 in 1993-94. State and local taxes per \$1,000 of personal income fell to \$117 in 2001-02 and rose to \$123 in 2005-06. Compared to the 1990s, the lower tax burden is primarily due to reductions in the state individual income tax and a decreased property tax burden resulting from revenue limits and additional state support for public schools.

Attachments 2 through 25 provide state-by-state rankings for state and local taxes and other revenue sources for the 2005-06 fiscal year. Attachments 47 through 58 present more detailed historical information regarding state and local government revenues in Wisconsin.

State and Local Government Expenditure Rankings

The Census Bureau defines government expenditures to include all amounts of money paid out by a government during its fiscal year, other than for retirement of debt, purchase of investment securities, extension of loans, and agency or private trust transactions. Expenditures are reported net of recoveries and other correcting transactions. Expenditures include payments from all sources of funds, including current revenues, prior year balances, and proceeds from borrowing. Tax refunds and other refunds of revenues are deducted from reported revenue amounts rather than treated as

expenditures. Transfers of funds within the same level of government are also not considered expenditures.

Major Census Bureau Expenditure Categories

As with revenues, the Census Bureau divides state and local government expenditures into four major categories: direct general expenditures, utility expenditures, liquor store expenditures, and insurance trust expenditures.

- *Direct general expenditures* are all expenditures except those classified as utility, liquor store, or insurance trust expenditures.
- *Utility expenditures* are state and local outlays for the purchase or construction of utility facilities, interest on utility debt, and production or acquisition and distribution of utility commodities and services for sale to the public or to other governments by state and local government water, electric, gas, or mass transit utilities. Depreciation of utility assets is not considered an expenditure; instead, capital outlays are reported as expenditures at the time of their payment.
- *Liquor store expenditures* are outlays related to the establishment and operation of government-owned liquor stores, including amounts paid to purchase liquor for resale. As noted, there were no government-owned liquor stores in Wisconsin in 2005-06.
- *Insurance trust expenditures* consist of social insurance payments to beneficiaries, public employee retirement annuities and other benefits, and withdrawals of insurance or employee retirement contributions. In effect, this category includes only benefits paid to members or beneficiaries of government insurance trust systems. It does not include contributions to a government's own trust funds (which are considered intergovernmental transfers) or costs of administering insurance trust programs and managing their investments (which are considered general government expenditures). Group insurance premiums covering a government's own employees and contributions to private

insurers or to public employee association retirement systems are also not included; instead, these outlays are classified as current operation expenditures.

Tables 3 and 4 present information on state and local government expenditures in Wisconsin for the 2005-06 fiscal year.

As Table 3 shows, total state and local government expenditures in Wisconsin were \$45,316.3 million in 2005-06. Of this amount \$39,413.1 million (87.0%) was direct general expenditures, \$4,196.0 million (9.3%) was insurance trust expenditures, and \$1,680.8 million (3.7%) was utility expenditures. Wisconsin also had a small amount of inter-governmental expenditures.

Total expenditures were \$8,132 per capita and \$250 per \$1,000 of personal income. Wisconsin ranked 22nd highest on total expenditures per capita (3.1% below the U.S. average) and also on total expenditures per \$1,000 of personal income (2.3% above average).

Direct general expenditures were \$7,073 per capita, which was 21st highest and 0.7% below average. Direct general expenditures per \$1,000 of personal income were \$218, which was 24th highest and 4.9% above the national average.

Insurance trust expenditures were \$753 per capita and \$23 per \$1,000 of personal income. Wisconsin ranked 14th on per capita insurance trust expenditures (10.3% above average) and 9th on insurance trust expenditures per \$1,000 of personal income (16.4% above average), primarily due to relatively high employee retirement expenditures. Wisconsin was significantly below average on utility expenditures.

As described in the following sections, the Census Bureau also classifies government expenditures

by type and by functional area.

State and Local Government Expenditures by Type

The Census Bureau divides total state and local spending into six broad types of expenditure: salaries and wages, other current operations, capital outlays, insurance benefits and repayments, interest on debt, and assistance and subsidies.

Capital outlays include expenditures for construction, land, existing structures, and equipment. Insurance benefits and repayments are the same as insurance trust expenditures, which are described above. Assistance and subsidies include direct cash assistance to private individuals and nongovernmental organizations not in return for goods and services nor in repayment of debt or other claims against the government. This category consists of education grants (including scholarships to individuals and aid to private schools or colleges), public welfare cash assistance payments, and veterans' benefits. Excluded are: payments to private vendors for medical care or other services for the needy; cash benefits under insurance trust programs; and administrative costs, in-kind assistance, and payments for the purchase of commodities or services to be furnished free to needy or other individuals (the latter are classified as current operations).

The second part of Table 3 shows a breakdown of Wisconsin's state and local government expenditures by type in 2005-06. As noted above and shown in Table 3, Wisconsin had high rankings and significantly exceeded the U.S. average for insurance trust expenditures (insurance benefits and repayments). Wisconsin was significantly below the U.S. average on expenditures for assistance and subsidies. For the other types of expenditure, Wisconsin ranked between 18th and 33rd highest and was relatively close to the U.S. average.

TABLE 3
Summary of Wisconsin Rankings on State and Local Government Expenditures
Fiscal Year 2005-06

| | Amount (Thousands) | Percent of Total | Per Capita Expenditures | Rank | % Difference From U.S. Average | Expenditures Per \$1,000 of Pers. Income | Rank | % Difference From U.S. Average |

State and Local Government Expenditures by Functional Area

The Census Bureau also reports state and local government expenditures by functional area. This information is presented in the last three sections of Table 3 and in Table 4. Wisconsin had relatively high rankings and/or considerably exceeded the U.S. average on the following significant spending categories: higher education, public welfare, highways, employee retirement, corrections, natural resources, and unemployment compensation.

Areas where Wisconsin had lower rankings and was significantly below average include hospital expenditures, utility expenditures, judicial and legal administration, transportation other than highways, financial administration, and housing and community development. More detailed information on what specific types of expenditures are included in these categories can be found in the "Government Finance and Employment Classification Manual", which is available on the Census Bureau's website.

2005-06 Revenues Compared to Expenditures

Total state and local government revenues exceeded total expenditures by approximately \$2.7 billion in 2005-06 (\$48.0 billion of revenues compared to \$45.3 billion of expenditures). All of the excess was due to employee retirement system activity. In that year, employee retirement system revenues were \$7.5 billion while employee retirement expenditures were \$3.4 billion, for a net surplus of \$4.1 billion. The large revenue amount was due to strong investment gains. Other state and local revenues were \$1.4 billion lower than expenditures, primarily due to a -\$1.0 billion difference between general revenues and expenditures. The remaining \$1.4 billion variance between total revenues and expenditures was funded with a combination of existing balances and borrowing.

Historical Expenditure Trends

Since the mid-1980s, Wisconsin's total state and local government expenditures per capita have been close to the U.S. average amount, ranging from 4.5% below average in 1989-90 to 3.9% above average in 1999-00. Since 1984-85, Wisconsin's rankings on this measure have ranged from 14th highest in 1998-99 and 1999-00 to 24th highest in 1988-89. Wisconsin's expenditures per \$1,000 of personal income have generally exceeded the U.S. average by about 1% to 8% since 1984-85. Wisconsin's rankings on this measure have ranged from 19th in the mid-1980s to 25th in 2003-04.

Wisconsin has consistently ranked relatively high and had greater-than-average expenditures for elementary and secondary education and for higher education. However, compared to other states, Wisconsin's expenditures for education have fallen in recent years. From fiscal years 1984-85 through 1992-93, Wisconsin's expenditures for public welfare ranked at or near the top 10 of all states, and Wisconsin was significantly above the U.S. average. However, since then, the state's ranking on public welfare expenditures has fallen, and Wisconsin is much closer to the national average. Wisconsin's rankings on health expenditures have also

fallen significantly since the mid-1980s. Wisconsin has had relatively high expenditures for highways throughout the past 20 years, although in more recent years the rankings have moved up by approximately 10 places. Wisconsin's highway expenditures have also exceeded the national average by a larger margin in recent years. The state's rankings on corrections expenditures and employee retirement expenditures have also moved up significantly in recent years.

State-by-state rankings on government expenditures in 2005-06 can be found in Attachments 26 through 46. Attachments 59 through 79 present historical information concerning Wisconsin's state and local government expenditures.

Attachments

The remainder of this paper presents tables showing state-by-state rankings and historical data on population, personal income, and state and local government revenues and expenditures.

- Attachment 1 shows rankings on state population, personal income, and per capita personal income in calendar year 2007.
- Attachments 2 through 25 show rankings on state and local government revenues per capita and per \$1,000 of personal income in fiscal year 2005-06.
- Attachments 26 through 46 show rankings on state and local government expenditures per capita and per \$1,000 of personal income in 2005-06.
- Attachments 47 through 79 show historical data on Wisconsin's rankings on state and local government revenues and expenditures. Specifically, Attachments 47 through 58 show historical data on taxes and other state and local government

revenues in Wisconsin. Attachments 59 through 79 present similar data on state and local government expenditures. As noted, the Census Bureau did not release state-by-state figures for the 2000-01 or 2002-03 fiscal years. Therefore, those years are not

included in the attachments.

A detailed list of the attachments can be found in the Table of Contents.
