Treaties between the federal government and Menominee tribe do not deprive the state of criminal subject matter jurisdiction over crimes committed by a Menominee tribal member outside of the reservation. Sturdevant v. State, 76 Wis. 2d 247, 251 N.W.2d 50 (1977).

Jurisdiction over crimes committed by tribal members on the Menominee reservation is vested in the federal and tribal governments. State v. LaTender, 86 Wis. 2d 410, 273 N.W.2d 260 (1979).

1.035 Wildlife and fish refuge by United States. (1) The state of Wisconsin consents that the government of the United States may acquire in this state, in any manner, such areas of land, or of land and water, as the United States deems necessary for the establishment of the “Upper Mississippi River Wildlife and Fish Refuge,” in accordance with the act of congress approved June 7, 1924; provided, that the states of Illinois, Iowa and Minnesota grant a like consent, and all rights respectively reserved by said states, in addition to the reservation herein made, are hereby reserved to this state; and provided, further, that any acquisition by the government of the United States of land, or of land and water, shall first be approved by the governor, on the advice of the department of natural resources.

(2) The consent hereby given is upon the condition that the United States shall not, by an act of congress or by regulation of any department, prevent the state and its agents from going upon the navigable waters within or adjoining any area of land, or land and water, so acquired by the United States, for the purpose of rescuing or obtaining fish therefrom; and the state shall have the right to construct and operate fish hatcheries and fish rescue stations adjacent to the areas so acquired by the United States; and the navigable waters leading into the Mississippi and the carrying places between the same, and the navigable lakes, sloughs and ponds within or adjoining such areas, shall remain common highways for navigation and portaging, and the use thereof, as well to the inhabitants of this state as to the citizens of the United States, shall not be denied.

(3) The legal title to and the custody and protection of the fish in the navigable waters leading into the Mississippi River and in the navigable lakes, sloughs and ponds within or adjoining such areas in this state, is vested in the state, for the purpose of regulating the enjoyment, use, disposition and conservation thereof.

Subject to the conditions specified in s. 1.02, the United States commissioner of fisheries may establish fish hatcheries within Wisconsin and may take fish or fish eggs from the waters of this state for propagation in such hatcheries. The United States commissioner of fisheries and authorized agents may conduct fish culture operations, rescue work, and all fishing and other operations necessary therefor in connection with such hatcheries in such manner and at such times as is considered necessary and proper by the commissioner and agents.

ernor shall execute in duplicate, under the great seal, a certificate
of such consent given and of such compliance with ss. 1.02 and

States and the other filed with the secretary of state. Such certifi-
cate shall be sufficient evidence of such consent of the legislature
and of such compliance with the conditions specified. All such

belonging to the state and covered by the navigable waters of the
United States, for sites for lighthouses, beacons, or other aids to
navigation, the governor may, upon application therefor by any
authorized officer of the United States, setting forth an exact

consent had not been given. Provided, further, that the boundaries
of any areas so selected shall be first approved by the governor,

SOVEREIGNTY AND JURISDICTION

Increased traffic congestion was a sufficient allegation of injury to acquire standing to challenge a final EIS. Milwaukee Brewers v. DHSS, 130 Wis. 2d 56, 387 N.W.2d 245 (1986).

When a state action did not come within an action type listed in DOA rules, an environmental assessment was required. A determination following an assessment that an EIS was not required for a building constructed for the state by a private developer under a lease/purchase agreement was reasonable under the circumstances. Larsen v. Munz Corp. 167 Wis. 2d 583, 482 N.W.2d 583 (1992).

The test as to whether an EIS should be conducted is one of reasonableness and good faith. When conditions for approval that compensate for any adverse environmental impacts are imposed, the statutory threshold of significant environmental impact is not crossed and no EIS is required. State ex rel. Boehm v. DNR, 174 Wis. 2d 457, 497 N.W.2d 445 (1993).

Section 227.42 (1) does not grant a right to a contested case hearing regarding the need for an EIS. North Lake Management Dist. v. DNR, 182 Wis. 2d 500, 513 N.W.2d 903 (Cl. App. 1994).

When the legislature has selected a specific project site, consideration of alternative sites is too remote and speculative and not reasonably related to the proposed project. Shoreline Park Preservation, Inc. v. D/OA, 195 Wis. 2d 750, 537 N.W.2d 388 (Cl. App. 1995), 94–2512.

The burden of proving the adequacy of an environmental impact statement is discussed. CUB v. PSC, 211 Wis. 2d 537, 565 N.W.2d 554 (Cl. App. 1997), 96–0866.

It was reasonable to suspend the requirement for a draft EIS and the corresponding comment period, when legislatively imposed time constraints could not have been met if they were not suspended. RURAL v. PSC, 2000 WI 129, 239 Wis. 2d 661, 619 N.W.2d 888, 99–2430.

A court must assess an environmental impact statement (EIS) in light of the rule of reason, which requires an EIS to furnish only such information as appears to be reasonably necessary under the circumstances for evaluation of the project ratio, than to be so all-encompassing in scope that the task of preparing it would become impossible or meaningless or will have been impossible. While reasonable alternatives are to be considered, every potentiality need not be evaluated. Clean Wisconsin, Inc. v. PSC, 2005 WI 93, 282 Wis. 2d 250, 700 N.W.2d 768, 04–3179.

The EIS is an informational tool that does not compel a particular decision by the agency or prevent the agency from concluding that other values outweigh the environmental consequences of a proposed action. Clean Wisconsin, Inc. v. PSC, 2005 WI 93, 282 Wis. 2d 250, 700 N.W.2d 768, 04–3179.

Agency decision-making under the Wisconsin environmental policy act. 1977 WLR 111.

(2) CONSERVATION POLICY. A state agency or local governmental unit shall investigate and consider the maximum conservation of energy resources as an important factor when making any major decision that would significantly affect energy usage.

(3) GOALS. (a) Energy efficiency. It is the goal of the state to reduce the ratio of energy consumption to economic activity in the state.

(b) Renewable energy resources. It is the goal of the state that, to the extent that it is cost-effective and technically feasible, all new installed capacity for electric generation in the state be based on renewable energy resources, including hydroelectric, wood, wind, solar, refuse, agricultural and biomass energy resources.

(c) Afforestation. It is the goal of the state to ensure a future supply of wood fuel and reduce atmospheric carbon dioxide by increasing the forested areas of the state.

(4) PRIORITIES. In meeting energy demands, the policy of the state is that, to the extent cost-effective and technically feasible, options be considered based on the following priorities, in the order listed:

(a) Energy conservation and efficiency.

(b) Noncombustible renewable energy resources.

(c) Combustible renewable energy resources.

(cm) Advanced nuclear energy using a reactor design or amended reactor design approved after December 31, 2010, by the U.S. Nuclear Regulatory Commission.

(d) Nonrenewable combustible energy resources, in the order listed:

1. Natural gas.
2. Oil or coal with a sulphur content of less than 1 percent.
3. All other carbon−based fuels.

(5) MEETING ENERGY DEMANDS. (a) In designing all new and replacement energy projects, a state agency or local governmental unit shall rely to the greatest extent feasible on energy efficiency improvements and renewable energy resources, if the energy efficiency improvements and renewable energy resources are cost−effective and technically feasible and do not have unacceptable environmental impacts.

(b) To the greatest extent cost−effective and technically feasible, a state agency or local governmental unit shall design all new and replacement energy projects following the priorities listed in sub. (4).

(6) SITING OF ELECTRIC TRANSMISSION FACILITIES. In the siting of new electric transmission facilities, including high−voltage transmission lines, as defined in s. 196.491 (1) (f), it is the policy of this state that, to the greatest extent feasible that is consistent with economic and engineering considerations, reliability of the electric system, and protection of the environment, the following corridors should be utilized in the following order of priority:

(a) Existing utility corridors.
(b) Highway and railroad corridors.
(c) Recreational trails, to the extent that the facilities may be constructed below ground and that the facilities do not significantly impact environmentally sensitive areas.

(d) New corridors.

NOTE: 1993 Wis. Act 414, which creates subs. (1) and (3) to (5), contains extensive explanatory notes.
