

Cross-References in the Wisconsin Administrative Code

Current through Register No. 820

In each table, the list is organized into two main columns. The left-hand column shows the statute (or other provision or reference) that is referred to in the statute or statutes enumerated in the right-hand column.

The list is limited to numerical cross-references to current law. References to repealed statutes are not included. Other references not shown are the verbal references, found in many statutes, to "under this section" or "in this section," or "this chapter," "this section," "this subsection," "this paragraph," or "this subdivision."

The list of statute cross-references in the Administrative Code is compiled from the machine-readable record of the statutes. Every effort has been made to make the list of cross-references as accurate as possible, but the LRB assumes no responsibility or liability for possible errors or omissions.

If you are checking for cross-references to a specific code or statute section, be aware that the code and statute references in the left hand column include ranges of code or statute sections or parts thereof. For example, cross references to 180.1702 would be found not only under 180.1702, but would also be included with references under 'ch. 180,' 'ch. 178 to 181,' 'subch. XVII' of ch. 180,' or '180.1701 to 180.1705.' References to a series of chapters are listed immediately after references to the individual chapter, immediately following the chapter headings within the table. References to subchapters are located within the listing for cross-references within the appropriate chapter preceding where references to the first section of that subchapter would be or is numerically listed. Cross-references to series of sections do not include sections from more than one chapter.
