***The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:***

PREFATORY NOTE: This bill was prepared for the joint legislative council's special committee on telemedicine issues.

Under current law, no person may practice medicine and surgery, or attempt to do so or make a representation as authorized to do so, without a license to practice medicine and surgery granted by the Wisconsin medical examining board. Current law provides an exception for actual consultation or demonstration by licensed physicians of other states or countries with licensed physicians of this state. To receive a license to practice medicine and surgery, a person must satisfy the educational and examination requirements set forth in current law and pay the fee specified by law.

This bill creates a nonresident physician license. The Wisconsin medical examining board is required to issue such a license to any person who submits proof that

he or she has an unrestricted physician's license in another state and pays the fee set by the bill, which is half the fee otherwise paid by physicians. "State" is defined in the statutes to include the District of Columbia, the Commonwealth of Puerto Rico and U.S. territories.
