- 1 **AN ACT to amend** 20.435 (4) (b) of the statutes; **relating to:** medical assistance
2 wage or salary supplements for nursing home housekeeping, laundry and food
3 workers and making an appropriation.

Analysis by the Legislative Reference Bureau

Under current law, the department of health and family services (DHFS) pays a combination of general purpose revenues and federal medicaid moneys to nursing homes for care provided to recipients of medical assistance (MA). DHFS must calculate a payment rate for a nursing home by applying, to information from cost reports for the nursing home's previous fiscal year, a statutory formula that includes specified standards and considers specified cost centers and allowable costs. Among the cost centers that DHFS must consider is allowable support service costs, including dietary service and environmental service (providing maintenance, housekeeping, laundry and security services).

This bill provides a supplement of \$4,550,000 of general purpose revenues and federal medicaid moneys to the MA payment rates for nursing homes, beginning on July 1, 2000, for the payment of wages or salaries for or an increase in the staff hours of housekeeping, laundry and food workers. Each nursing home may apply to DHFS and receive up to the total maximum amount per patient day for the wages or salaries that DHFS calculates for the nursing home, under a method specified in the bill. In order to ensure that each nursing home expends the supplement for the wages or salaries, each nursing home must complete a form, prepared by DHFS, to determine if the nursing home's housekeeping, laundry and food workers' wage or salary costs

ASSEMBLY BILL 857

per patient day increased by 3.5% during the 12 months following the supplement. However, if the nursing home had in effect on January 1, 2000, a collective bargaining agreement that included an increase in wages or salaries or increase in staff hours of housekeeping, laundry and food workers, DHFS may not include that increase in the required increased expenditures unless all parties to the collective bargaining agreement otherwise agree. DHFS may adjust the percentage increase to account for specific factors. If DHFS determines that any part of the supplement provided to a nursing home was not expended as required, DHFS may recoup that part of the supplement.
