- 1     **To create** section 9 (3) of article IV and section 12 of article VIII of the constitution;

### *Analysis by the Legislative Reference Bureau*

Under current law, a communications provider is required to collect from each subscriber of a communications service a monthly fee of 75 cents on each communications service connection with an assigned telephone number, including a communications service provided via a voice over Internet protocol (VoIP) connection. The communications provider must identify the fee as a “charge for funding countywide 911 systems plus police and fire protection fee.” The fee is commonly referred to as the “police and fire protection fee.” The fee is administered by the Public Service Commission, and the revenue from the fee is deposited in the police and fire protection fund. Under current law, most of the revenue from the police and fire protection fund is used to make county and municipal aid payments.

This constitutional amendment, proposed to the 2023 legislature on first consideration, requires that revenues from a police and fire protection fee be deposited into a police and fire fund and used only for expenses related to updating the 911 service infrastructure. The amendment also requires the Department of Military Affairs to administer the fee.

A proposed constitutional amendment requires adoption by two successive legislatures, and ratification by the people, before it can become effective.
