LASEE and KELSO. Referred to Health, Utilities, Veterans and Military Affairs.

- 1 **AN ACT to create** 66.082 (3m) of the statutes; **relating to:** operation and costs
2 of municipal cable television systems.

Analysis by the Legislative Reference Bureau

Under current law a municipality may own and operate a cable television system and may award and regulate a cable television system franchise. This bill requires a municipality that owns and operates its own cable television system to prepare and maintain records that include the cost of franchise fees, pole rentals and all other expenses that the municipality would incur were it a nonmunicipal cable operator granted a franchise by the municipality and the amount, source and cost of working capital used for the municipal cable television system. The bill also prohibits the municipality from allocating municipal costs and indebtedness in a way that subsidizes directly or indirectly the provision of municipal cable television service.

For further information see the *local* fiscal estimate, which will be printed as an appendix to this bill.
