5 and 62.231 (1) (am) of the statutes; **relating to:** mapping and zoning of certain
6 wetlands.

Analysis by the Legislative Reference Bureau

Currently, the department of natural resources (DNR) is required to map all wetlands in the state that have an area of five acres or more. This bill requires that DNR map all wetlands in the state that have an area of two acres or more. The bill also requires that DNR map those wetlands that are contiguous to wetlands that are over two acres in area. The bill defines a contiguous wetland to be a wetland that is less than two acres in area, that is located in a shoreland, that is bordering or adjacent to another wetland, that is in the same wetland system as the other wetland and that has interdependent functions with the other wetland. Current law defines "shorelands" as lands within certain distances of navigable waters.

Under current law, villages and cities must enact specific zoning ordinances to regulate activities in wetlands that have an area of five acres or more and that are located in shorelands. The bill expands the wetland zoning requirement for cities and villages to cover wetlands that have an area of two acres or more and to cover the contiguous wetlands to those wetlands.
