### *Analysis by the Legislative Reference Bureau*

Under current law, certain licenses and permits are issued by the Department of Natural Resources (DNR) based on a random or preference selection system, including otter and fisher trapping permits, bonus deer hunting permits, Canada goose hunting permits, Class A bear licenses, wild turkey hunting licenses, and elk hunting licenses. The preference selective system for a wild turkey hunting license, for example, provides that resident landowners are in the first preference category, residents who applied in a previous season are in the second preference category, all other residents are in the third preference category, qualified nonresident landowners are in the fourth preference category, and all other nonresidents are in the fifth preference category.

This bill allows a person who is selected under one of these random or preference selective systems to designate a minor to exercise the privilege to hunt or trap granted by the permit or license if the person dies before using the license. If the person who has applied for the permit or licensee dies before receipt of the permit or license, the designated minor may apply for that permit or license and the deceased person's preference would apply. If the person who received a permit or license dies on at least the day prior to the beginning of that hunting or trapping season, the designated minor may apply for the permit or license.
