### *Analysis by the Legislative Reference Bureau*

Under current law, if a witness is not testifying as an expert, the witness's testimony is limited to those opinions that are rationally based on the perception of the witness and helpful to a clear understanding of the witness's testimony or of a fact at issue in the case. This bill adds the additional limit that a nonexpert's testimony may not be based on scientific, technical, or other specialized knowledge of the witness.

Current law allows the testimony of an expert witness if that scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact at issue in the case. This bill limits the testimony of an expert witness to testimony that is based on sufficient facts or data, that is the product of reliable principles and methods, and that is based on the witness applying those principles and methods to the facts of the case. The bill also prohibits the testimony of an expert witness who is entitled to receive any compensation contingent on the outcome of the case.

Currently, the facts or data in a particular case on which an expert witness bases his or her opinion may be made known to the expert at or before the case hearing, but if those facts or data are reasonably relied upon by experts in the field in forming opinions about the subject, they do not need to be admissible into evidence

in the case. This bill adds that facts or data that are otherwise inadmissible may not be disclosed to the jury unless the court determines that their value in assisting the jury to evaluate the expert's testimony outweighs their prejudicial effect.
