---

### *Analysis by the Legislative Reference Bureau*

This bill requires the Department of Health Services (DHS) to create two or three regional comprehensive opioid treatment programs to provide treatment for opiate addiction in rural and underserved, high-need areas. In creating the program, DHS must obtain and review proposals for opioid treatment programs in accordance with its request-for-proposal procedures. These programs may not offer methadone treatment.

An opioid treatment program, under the bill, must offer an assessment to individuals in need of service to determine what type of treatment is needed. The opioid treatment program must provide counseling, medication-assisted treatment, and abstinence-based treatment. If a licensed residential program is necessary for an individual, the opioid treatment program must transition the individual there. The opioid treatment program must transition individuals who have completed treatment to county-based or private post-treatment care. The bill also requires DHS to submit annually, beginning approximately two years after the bill's effective date, a progress report on the outcomes of the opioid treatment program to the Joint Committee on Finance and appropriate standing committees of the legislature.
