Referred to Committee on Rules.

1     **Relating to:** proclaiming February 2022 to be American Heart Month in Wisconsin.

2             Whereas, heart disease and stroke are responsible for close to one-third of  
3     deaths in Wisconsin; and

4             Whereas, an estimated 80 percent of cardiovascular disease can be prevented;  
5     and

6             Whereas, increasing community awareness of the risks, such as diabetes, high  
7     blood pressure, high cholesterol, smoking, and lack of regular physical activity, can  
8     improve and focus prevention efforts in Wisconsin; and

9             Whereas, communities, health professionals, and families can work together to  
10    create opportunities for healthier lifestyles; and

11            Whereas, in addition to discussing smoking cessation if applicable, individuals  
12    should talk to their health care provider to learn about the following five numbers  
13    to better understand their risks for cardiovascular disease:

- 14            1. Total cholesterol
- 15            2. HDL (good) cholesterol
