Analysis by the Legislative Reference Bureau

Under this bill, a governmental subdivision, which the bill defines as a city, village, town, county, school district, technical college district or cooperative educational service agency may not provide a telecommunications service in this state as a telecommunications utility, alternative telecommunications utility or telecommunications carrier. A "telecommunications utility" is defined under current law as a person that manages or controls any plant or equipment used to furnish telecommunications services within the state directly or indirectly to the public. A "telecommunications carrier" is similar to a telecommunications utility, except that a carrier does not provide basic local exchange service, except on a resale basis. An

ASSEMBLY BILL 747

“alternative telecommunications utility” is defined to include cable television telecommunications service providers, pay telephone service providers and telecommunications resellers.

The bill also prohibits a governmental subdivision from providing an Internet access service directly or indirectly to the public. “Internet access service” is defined as a service that enables a user to obtain access to content, information, electronic mail or any other service offered over the Internet. Finally, the bill prohibits a governmental subdivision from transferring a telecommunications transmission facility in this state to another person if the facility is used to furnish a telecommunications service directly or indirectly to the public.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
