### ***Analysis by the Legislative Reference Bureau***

Current law regulates snowmobile rail crossings (crossings) that are not located on highways or streets. Under that law, only a snowmobile organization may construct a crossing. Current law defines a snowmobile organization as a snowmobile club, a snowmobile alliance or a county. In order to construct a crossing, the snowmobile organization must obtain a permit from the department of natural

**SENATE BILL 439**

resources (DNR). Current law also regulates established crossings which are defined as crossings that have been used by snowmobiles for at least five winters of the last ten years. This bill makes changes to certain procedures and requirements under current law that apply to snowmobile organizations and to rail authorities that construct or maintain crossings. Those changes include the following:

1. Under current law, DNR must promulgate rules to establish uniform maintenance standards and uniform design and construction standards for crossings after consulting with the snowmobile recreational council. Under this bill, DNR must instead consult with an established snowmobile association that represents snowmobile clubs and with the office of the commissioner of railroads.

2. The bill requires that each rail authority that has rail lines in this state designate an agent who is authorized on behalf of the rail authority to receive copies of crossing permit applications filed with DNR and that DNR send copies of crossing permit applications to the designated agents of the applicable rail authorities.

3. Current law requires DNR to approve or deny a crossing permit application within 60 days after receipt and provides that DNR may deny the application only if DNR determines that the proposed crossing does not comply with rules promulgated by DNR. The bill provides that DNR must approve the application within 90 days of sending a copy of the application to the rail authority's designated agent, provided certain conditions are met. The conditions require, among other things, that the permit applicant contact the rail authority to discuss the advisability and feasibility of the proposed crossing, that the application comply with certain rules promulgated by DNR and that the rail authority not object to the application. The bill establishes a hearing procedure that applies if the rail authority does object to the application. The bill requires that the office of the commissioner of railroads give testimony at such a hearing addressing certain issues including whether the proposed rail crossing could pose a substantial danger to public safety.

4. Under current law, DNR may charge an initial application fee not to exceed \$150. The bill requires that in addition to this fee, an applicant who receives a permit must pay the rail authority \$1,500 to compensate the rail authority for the cost of construction and to pay for the use of the crossing by snowmobile operators.

5. Under current law, a snowmobile organization must maintain liability insurance to indemnify the applicable rail authority for damages resulting from the design, construction or maintenance of a crossing for which there is a permit. Under the bill, the insurance must also indemnify the rail authority for damages resulting from the existence or use of the crossing. The bill also provides that the snowmobile organization need not maintain the insurance to indemnify the rail authority for injuries sustained by a person engaged in a recreational activity if the rail authority would be immune from liability for those injuries under current law.

6. Under current law, the initial term for a crossing permit is 11 years. The permit may be renewed for additional periods of time not to exceed 11 years per renewal. This bill eliminates the term limit for a crossing permit.

7. Under current law, only DNR is authorized to inspect an established snowmobile rail crossing to determine whether the snowmobile organization is maintaining the crossing in conformance with rules promulgated by DNR and is

**SENATE BILL 439**

maintaining required liability insurance. This bill authorizes the office of the commissioner of railroads to also conduct such an inspection.

8. The bill specifies which portion of a crossing for which a permit is issued that the rail authority must construct and which portion of an established crossing that a snowmobile organization must maintain.

9. Current law provides that a rail authority may not close or remove a snowmobile crossing that is subject to permit unless the rail authority first petitions DNR for an order authorizing the rail authority to close or remove the crossing. This bill provides that a rail authority may close or remove a crossing, whether or not the crossing is subject to a permit, if it enters into an agreement with the snowmobile organization to close or remove the crossing. The bill also authorizes a rail authority to petition DNR to close or remove a crossing without first obtaining an agreement from the snowmobile organization.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
