To afford all children throughout the state an opportunity to secure an elementary education, there shall be paid state aid to the several counties, towns, cities and villages of the state for the support of the elementary public schools as follows:

(1) Annually, to each school district or city of the state two hundred fifty dollars for each elementary teacher employed by such district or city in the preceding school year. Provided, that the number of teachers for which any district or city shall receive aid hereunder shall not exceed the number of elementary teachers employed on May 1, 1929, unless the average daily attendance of pupils below the ninth grade during the preceding school year shall have been at least equal to the following average number of pupils per elementary teacher:

- (a) Twenty, if two teachers are employed;
- (b) Twenty-five, if three or four teachers are employed;
- (c) Thirty, if more than four teachers are employed.

(2) In addition to the amounts provided in subsection (1) there shall be paid to school districts or cities in which the assessed valuation back of each pupil is insufficient to properly support an efficient elementary school, an amount to be determined as follows: The full valuation expressed in the nearest thousand dollars of the property in each school district or city shall be determined by the tax commission. A valuation of two hundred fifty thousand dollars for each elementary teacher employed by the school district or city in the preceding school year shall be considered as the base for determining the amount of state aid for each school district. The apportionment shall be made to such school districts or cities in which the quotient of dividing the full valuation by the number

of elementary teachers in the preceding school year is less than such base. Such quotient shall be subtracted from such base and the amounts so obtained multiplied by the local school tax rate for such school district or city, which rate shall not exceed four mills. The amount in turn shall be multiplied by the number of elementary teachers employed by the school district or city in the preceding school year, which resulting amount shall be the aid payable to the school district or city under this subsection. But in no event shall such apportionment under this and the preceding subsection exceed six hundred dollars for each such teacher employed in the preceding school year; nor shall such state aid be based upon a greater number of elementary teachers than the number of such teachers for which the district or city is entitled to state aid under the provisions of subsection (4).

(3) For the purposes of subsections (3) and (4) an elementary teacher is defined as one who devotes the whole or the major portion of his time to teaching grades below the ninth, and no substitute or part time teacher shall be counted in determining the amount to be distributed to the several school districts and cities.

(4) The right to share in the aids provided for in subsections (1) and (2) is subject to the following conditions:

(a) Whenever any county shall fail to raise for the support of the common schools by taxation upon the aggregate valuation of the whole county an amount at least equal to two hundred fifty dollars for each public elementary teacher employed in the county as certified by the county superintendent and shall fail to apportion to each district or city such amount for each elementary teacher employed, the aid for the schools of that county shall be withheld from the next succeeding apportionment.

(b) No aid shall be paid to any city, except to a city of the first class, or to any village or town for any school district therein for any year during which such district shall not have maintained a common school taught by a qualified teacher at a salary of not less than seventy-five dollars per month, for at least eight months; unless the state superintendent shall be satisfied that such school was maintained and so taught for at least three months, and the failure to maintain and so teach it for eight months was occasioned by some extraordinary cause not arising from intention or neglect on the part of the responsible officers. Time spent by the teacher or teachers of such districts in attendance upon an institute in

the county, shown by due reports to have been allowed by the district board without deduction from such teacher's wages, shall be counted as a part of such eight months. No aid shall be paid to any city of the first class for any school district or board of school directors therein for any year during which such district or board of school directors shall not have maintained common schools taught by qualified teachers at salaries of not less than one hundred twenty dollars a month for the full period during which such schools shall have been in session during such year as provided by the rules and regulations of such district or board of school directors; unless the state superintendent shall be satisfied that any failure to so maintain such schools and so teach them for such full period was occasioned by some extraordinary cause not arising from intention or neglect on the part of the responsible officers.

(c) No aid shall be paid for or on account of any public school as defined in section 42.20, unless the employer as defined in section 42.20 has complied with the provisions of sections 42.39 to 42.43, inclusive.

(d) No aid shall be paid to any city or for any school district failing to provide for an additional room and an additional teacher whenever so required by section 40.05.

(e) No aid shall be paid to any city or for any school district refusing or willfully neglecting to comply with the provisions of subsections (1) and (2) of section 40.22.

(f) Provisions by a school district for the transportation and tuition of its pupils to and their instruction in some other district as prescribed by law shall entitle the former to share in the aid as though such district had maintained school, and shall be considered as having one elementary teacher employed, but no district shall receive more state and county aid than the operating expense of such school.

(5) Immediately upon determining the amount of state aid payable under this section the state superintendent shall certify to the secretary of state and to the state treasurer the amount thereof which each county is entitled to receive, and he shall at the same time certify to each county clerk and county treasurer the amount thereof which each town, city and village in their respective counties is entitled to receive, and a statement of the number of teachers employed in each such town, village and city.

(6) At the time when taxes levied for other state purposes are required by law to be paid into the state treasury, each county treasurer shall pay to the state treasurer the moneys, arising from the tax levied under section 70.58 in excess of the amount such county is entitled to as state aid under this section; but if the amount so due to any county be larger than the amount such county is required to so pay, the state treasurer shall pay to the county treasurer, at said time, the amount so in excess. The secretary of state shall thereupon draw his warrants covering the total amount of the aid payable to the several counties.

(7) (a) Whenever any officer shall omit to make within the time prescribed any statement or reports required to be made to the state superintendent, the latter shall notify such officer of such omission, but the failure to give such notice shall not in any manner affect the consequences of such omission.

(b) Any town, village, city or school district excluded from any apportionment of the aid under this section because of some mistake or omission by some officer may at any time within two years after such apportionment furnish proof to the state superintendent of the facts of such mistake or omission and that the same has been corrected or remedied.

(c) If such proof be satisfactory to the state superintendent he shall certify such facts to the secretary of state, together with a supplemental apportionment to such town, village, city or school district and shall notify the treasurer and clerk of the county of such apportionment. The secretary of state shall thereupon draw his warrant for such supplemental apportionment and the same shall be paid as if originally apportioned.
