In counties having a population of 500,000 or more the county board may undertake the necessary studies and planning, alone or with other urban planning activities, to determine the total transportation needs of the county areas; to formulate a program for the most efficient and economical co-ordination, integration and joint use of all existing transportation facilities; and to study the interrelationship between metropolitan county area growth and the establishment of various transportation systems for such area in order to promote the most comprehensive planning and development of both. In pursuance of such undertaking the county board may employ the services of consultants to furnish surveys and plans, and may appropriate funds for the payment of the cost of such work and the hiring of consultants.
