The building commission may not approve a contract for the construction, reconstruction, renovation or remodeling of or an addition to a state building as defined in s. 44.51 (2) unless it determines that s. 44.57 has been complied with or does not apply. This section applies to the department of transportation only in respect to buildings, structures and facilities to be used for administrative or operating functions, including buildings, land and equipment to be used for the motor vehicle emission inspection and maintenance program under s. 110.20. This subsection does not apply to contracts by the department of natural resources for construction work related to hazardous substance spill response under s. 144.76 or environmental repair under s. 144.442. (6) (a) 4.

(h) Provide procedures for identifying any nonexempt vehicle subject to a recall by the manufacturer of the vehicle that is related to emissions and ensuring motorist compliance with the recall.

(i) Provide a procedure for detecting and preventing the fraudulent classification of any nonexempt vehicle as a vehicle that is not a nonexempt vehicle.

(j) Prescribe an annual frequency for inspection for any model year subset of nonexempt vehicles if the department determines annual inspection to be appropriate after additional program evaluation.

In addition, the contractor shall perform a loaded test if the approved short test shows that the motor vehicle does not comply with one or more applicable emissions limitations and the motor vehicle is suitable for loaded testing as determined by the department, unless the approved short test is a loaded test or the person presenting the vehicle for inspection refuses the loaded test and oxides of nitrogen. The department may require the contractor to provide information on the fuel efficiency of the motor vehicle as part of a loaded test.

(b) The department shall require the contractor to furnish the results of the emissions inspection testing in writing to the person presenting the vehicle for inspection before he or she departs from the testing inspection station. If the inspection shows that the vehicle does not comply with one or more applicable emissions limitations, the results shall include, to the extent possible, a description of the noncompliance and, if a loaded test was performed, the adjustments or repairs likely to be needed for compliance.

(12) Repairs. Repairs or adjustments necessary to bring a vehicle into compliance with applicable emissions limitations are the responsibility of the vehicle owner and may be made by the owner or any person selected by the owner.
