PETITION

The undersigned hereby express their opposition to the addition of two corridors for low level flights and the expansion of the Hardwood Range.

The Ho-Chunk Nation has a Head Start Center, a Day Care Center, a Senior Center, and a developing housing area within two miles of the expanded practice bombing range. The Nation's second largest enterprise is open every day with employees and customers from the surrounding communities within the two mile area. The higher levels of noise and air pollution from low level flights can result in increased blood pressure and pulse and respiratory rates of these children, elders, and community members, as well as expose them to risks from this dangerous weapons-delivery system flying within a few hundred feet of their heads.

Two locations already exist which permit repeated target bombing. The expansion is not cost effective when the existing sites and budget cutting efforts are considered.

We, the undersigned, strongly object to the existence and expansion of the military flight airways and the expansion of the Hardwood Range in Wisconsin and Iowa. Evaluation of these overflights must include the examination of danger and upset to wildlife and domestic animals, destruction of quiet tourism of the area, and a noise level that frightens people and leaves us with a major loss of peace of mind.
