In certain municipalities master plumber patching K-er can not install fireman. It must be installed by fire sprinkler K-er.

Problem is that plumber takes out the work of installing the main. Difficult to get the K-er to commit to a cost.

Would like to change law to allow plumber to make connections from city main to bldg

MP would bring main into bldg, 2 feet above floor
+ underground pipe outside of bldg

1 AN ACT [✓] relating to: the installation of automatic fire sprinkler systems.

Analysis by the Legislative Reference Bureau

Under current law, only an automatic fire sprinkler contractor or [✓]journeyman automatic fire sprinkler fitter [✓]licensed or registered by the department of commerce (department) may install an automatic fire sprinkler system (sprinkler system). The sprinkler system includes underground and overhead piping and a suitable water supply. Under current law, a master plumber or utility contractor licensed by the department may not install any portion of a sprinkler system.

This bill expands current law by authorizing a master plumber or utility contractor to install the underground piping for a sprinkler system.

1. Please note that the attached draft contains a delayed effective date, in order to allow the department of commerce ^{time} to update the applicable sections of the administrative code. If you do not desire this delayed effective date, please let me know.

2. The constituent who generated this request indicated to me that the draft should allow a plumber or utility contractor to install underground piping up to the first flange above the finished floor in a building. It is my understanding that all piping up to this flange is considered underground piping. Thus, I have not referenced this flange in the attached draft. Please let me know if this is inconsistent with your intent.
