

**DRAFTER'S NOTE
FROM THE
LEGISLATIVE REFERENCE BUREAU**

LRB-4082/1dn
PEN:cjs:jf

January 6, 2000

Representative Spillner:

The technical name for a front license plate holder is a "bracket", according to the parts departments of Ahrens Cadillac, Don Miller Dodge, Thorstad Chevrolet and Zimbrick Volkswagon, all of Madison. No motor vehicle dealer I spoke with called that part anything other than a "bracket".

I delayed the implementation of this requirement to allow dealers time to prepare for the change. Ok?

The penalty is provided under s. 347.50 (1), stats. Ok?
