~~PRELIMINARY DRAFT - NOT READY FOR INTRODUCTION~~

GenCat

1 AN ACT ... relating to: certain applicants for preference points under the
2 cumulative preference system for issuing Class A bear hunting licenses.

^S
Analysis by the Legislative Reference Bureau

Under current law, the department of natural resources (DNR) issues two types of bear hunting licenses. A Class A bear hunting license allows the license holder to shoot and kill bear. A Class B bear hunting license allows the license holder to assist a Class A license holder in pursuing bear, to bait bear and to train dogs to pursue bear, but it does not allow the license holder to actually shoot at or kill bear.

only Under current law, DNR administers a cumulative preference system for issuing Class A bear license, if the number of applicants for the license exceeds the number of licenses available. Under the system, an applicant may apply for a license or may apply for just a preference point if he or she is not seeking a license for the upcoming bear hunting season. DNR gives a preference point to each person who applies for one and to each person who applies for a license but who is not selected. The more preference points an applicant has, the higher priority he or she is given in issuing the licenses. Under current law, an applicant seeking these preference points need not be eligible to receive a hunting license. This bill requires that an applicant seeking these preference points be at least 12 years old and be eligible for a hunting license on the first day of the next bear-season.
