Dear Representative Schneider:

Thanks very much for calling to inquire if our association and/or members might support an effort to create a web page with database search capabilities and provide additional support to make it possible for Kosovar refugees in resettlement camps being established in several countries and their relatives worldwide to locate and communicate each other. It would be a very worthy humanitarian effort. Per our discussion I'll check with appropriate federal agencies and international charitable organizations tomorrow to find out if anything is being done or planned in that regard, and if there are ways our industry can help. I'll let you know what I find out. Thanks also for allowing me a few minutes to talk to you about our efforts to enact Information Technology training tax credit legislation in the state of Maryland, and for your interest in possibly introducing and supporting the same measure in Wisconsin. The Maryland bill, as introduced, follows. Lots of high paying unfilled jobs are available in every state (350,000 nationally), and if we can fill them with new workforce entrants/displaced workers, states will create an immediate additional income stream from new corporate and personal income taxes. Arguments in favor of the legislation, statistics and other useful information are on the [web site of the Technology Training Tax Credit Coalition \(TechnologyTrainingTaxCreditCoalition.org\)](http://www.technologytrainingtaxcreditcoalition.org)

The MD bill has been modified since introduction, has cleared the tax committees, is in the general assembly's budget package, and has a reasonable chance of enactment. You would be a miracle worker if you get it in the WI budget at this point, and you would be a hero to our members in Wisconsin! (We have 7,500 nationally - I'll e-mail you a list of those in WI - they would be delighted to hear of your support.) Thanks again for calling, and bless you for the work you are doing to help the refugees!

Bruce Hahn

in 1-12-2000

1 **AN ACT . . . relating to:** creating a nonrefundable income tax and franchise tax  
2 credit for information technology training.

**Analysis by the Legislative Reference Bureau**

This bill creates an individual income tax and corporate income tax and franchise tax credit for training related to information technology. The credit is an amount equal to 50% of the amount that a claimant pays for the claimant or the claimant's spouse, dependent or employe to receive training related to information technology. If the amount of the credit exceeds the claimant's tax liability, the state will not issue a refund check, but the claimant may carry forward any remaining credit to subsequent taxable years. A claimant who receives the credit, however, must pay back the amount of the credit if the individual who receives the training is not employed in this state in a occupation related to information technology within one year after the individual completes the training or if the individual is employed in that occupation for less than one year.

Representative Schneider:

1. Please review this draft carefully to ensure that it is consistent with your intent. The instructions do not provide a definition for "information technology". The bill, therefore, provides that "information technology" has the meaning given in section 16.97 (6) of the statutes, which defines information technology as the electronic processing, storage and transmission of information including data processing and telecommunications. Is that consistent with your intent% ?

2. The instructions do not specify what type of training is eligible for the credit. Do you want the training to be at a college, university or technical college? Do you want the training to be in this state? Do you want the training to result in the granting of a degree?

3. The instructions do not specify what type of occupations are eligible under the credit. Under the bill, occupations from word processing operator to computer engineer would arguably qualify as "related to information technology". Is that O.K. or do you want to target specific occupations?

This is in response to the questions you posed to Rep. Schneider re LRB-2934. If these answers are not sufficient, please do not hesitate to contact me at 266-0215.

Rep. Schneider would like the bill to specify the training at colleges, universities and technical colleges. He does want the training to be in Wisconsin and does not want the training to result in the granting of a degree. He does intend that occupations such as word processing operator could qualify as "related to information technology". He does not want to target specific occupations.

Thank You,

~~PRELIMINARY DRAFT - NOT READY FOR INTRODUCTION~~

1 AN ACT *to amend* 71.05 (6) (a) 15., 71.21 (4), 71.26 (2) (a), 71.34 (1) (g), 71.45 (2)  
2 (a) 10. and 77.92 (4); and to **create** 71.07 (5s), 71.10 (4) (gv), 71.26 (5s), 71.30  
3 (3) (eon), 71.47 (5s) and 71.49 (1) (eon) of the statutes; **relating to:** creating a  
4 nonrefundable income tax and franchise tax credit for information technology  
5 training.

**Analysis by the Legislative Reference Bureau**

This bill creates an individual income tax and corporate income tax and franchise tax credit for training related to information technology. The credit is an amount equal to 50% of the amount that a claimant pays for the claimant or the claimant's spouse, dependent or employe to receive training related to information technology. If the amount of the credit exceeds the claimant's tax liability, the state will not issue a refund check, but the claimant may carry forward any remaining credit to subsequent taxable years. A claimant who receives the credit, however, must pay back the amount of the credit if the individual who receives the training is not employed in this state in an occupation related to information technology within one year after the individual completes the training or if the individual is employed in that occupation for less than one year.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.

**The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:**

MEMORANDUM

April 3, 2000

**TO:** Joseph Kreye  
Legislative Reference Bureau

**FROM:** Yeang-Eng Braun *YEB*  
Department of Revenue

**SUBJECT:** Technical Memorandum on AB 844 - Income and Franchise Tax Credit for Information Technology Training

The sponsor may wish to clarify what expenses are included in the credit, in particular, whether it is limited to tuition, or includes books, supplies, room and board, travel or computer equipment as well. In addition, we would find it helpful if the draft indicated whether an entire course of study is included if a person is pursuing an information technology degree, or just the computer-based courses. Similarly, are information technology courses for persons pursuing a non-related degree included in the base of the credit?

Under the draft, a credit may not be claimed for amounts excluded from income under the IRC section 127 educational assistance program because the employer reimbursed the employee for the expenses. The sponsor may wish to clarify that an employee also cannot claim a credit for other amounts that are reimbursed, regardless of whether they are under the educational assistance program.

Sec. 71.08(1) imposing the minimum tax should be amended to include a reference to sec. 71.07(5s). Because of the placement of the credit in sec. 71.0(4), the credit is not considered when determining the minimum tax.

For ease in administration and to avoid confusion, the sponsor may want to cross-reference the definition of "qualified institution" with the existing definition in sec. 71.05(6)(b)28.

The sponsor may wish to clarify provisions of the recapture of credit when an individual is not employed in an information technology occupation. For example, it is unclear what constitutes an information technology occupation. Would it include a receptionist who occasionally uses a word processor or a line worker who occasionally keys in specifications to a computer operated manufacturing machine?

The Department would like to point out that recapture of credit when an individual is not employed in information technology would be extremely difficult to enforce. For example, once a parent receives credit for a child's information technology training, the Department would be required to monitor the work experience, including job descriptions and location, of the child.
