Under current law, the department of natural resources (DNR) provides grants for certain projects relating to lakes including lake management projects that improve or protect the quality of water in lakes or the natural ecosystems of lakes. Current law requires DNR to promulgate rules designating those activities for which a grant may be provided. This bill requires DNR to designate certain additional activities for which a grant may be provided. ✓

Under current law, DNR also provides grants for management projects and planning projects relating to rivers. Current law provides that a grant for a planning project may not exceed \$10,000. This bill increases the limit for such a grant to \$25,000. Current law also requires DNR to promulgate rules establishing the types of natural riverine ecosystems that are eligible for river planning or management project grants. This bill eliminates that requirement. ✓

Under current law, an excise tax is imposed on suppliers of motor vehicle fuel including fuel used for all-terrain vehicles (gas tax). Current law requires that funds be appropriated from the conservation fund in an amount equal to an estimate of the all-terrain vehicle gas tax payment to provide aid to local government and federal agencies for nonstate all-terrain vehicle projects. This bill reduces that appropriation to an amount equal to 50% of the estimated all-terrain vehicle gas tax payment and appropriates an amount equal to the other 50% of that estimated payment for the maintenance and development of habitat areas. ✓

This bill also appropriates funds to maintain and develop certain habitat areas and increases funding for hunting and fishing promotion, for certain DNR positions, for aids relating to recreational boating and other projects, for lake management grants and for land acquisition, development and improvement. ✓

Subject: Change to conservation fund bill draft

In reviewing LRB-4540/P2, it occurred to me that one change needs to be made. Since the \$1.7 million for resource development for the various wildlife and interpretive centers was meant to be one-time rather than ongoing, that should be reflected in the draft. In drafting terms, that means section 12 needs to be changed in a couple places to include s.20.370 (7)(fs) as a one-time increase.

Analysis by the Legislative Reference Bureau

Under current law, the department of natural resources (DNR) provides grants for certain projects relating to lakes including lake management projects that improve or protect the quality of water in lakes or the natural ecosystems of lakes. Current law requires DNR to promulgate rules designating those activities for which a grant may be provided. This bill requires DNR to designate certain additional activities for which a grant may be provided.

Under current law, DNR also provides grants for management projects and planning projects relating to rivers. Current law provides that a grant for a planning project may not exceed \$10,000. This bill increases the limit for such a grant to \$25,000. Current law also requires DNR to promulgate rules establishing the types of natural riverine ecosystems that are eligible for river planning or management project grants. This bill eliminates that requirement.

Under current law, an excise tax is imposed on suppliers of motor vehicle fuel including fuel used for all-terrain vehicles (gas tax). Current law requires that funds

ASSEMBLY BILL

~~be appropriated from the conservation fund in an amount equal to an estimate of the all-terrain vehicle gas tax payment to provide aid to local government and federal agencies for nonstate all-terrain vehicle projects. This bill reduces that appropriation to an amount equal to 50% of the estimated all-terrain vehicle gas tax payment and appropriates an amount equal to the other 50% of that estimated payment for the maintenance and development of habitat areas.~~

This bill also appropriates funds to maintain and develop certain habitat areas and increases funding for hunting and fishing promotion, for certain DNR positions, for aids relating to recreational boating and other projects, for lake management grants and for land acquisition, development and improvement.
