Assumptions Used in Arriving at Fi	ecal Fetir	nate		20.000(0)	(44).					
Assumptions Used in Arriving at Fiscal Estimate The motor vehicle fuel tax rate is re-computed annually on April 1 st based upon the annual change in the Consumer Price Index - Urban (CPI).										
Based upon the 2.2% increase in CPI (1999 versus 1998,) the motor fuel tax rate is estimated to increase from \$0.258 per gallon to \$0.264 per gallon on April 1, 2000.										
Motor fuel tax revenues are estimated at \$804.1 million and \$828 million for FY 2000 and FY2001 respectively.										
Under AB 935 the motor vehicle fuel tax rate would not annually be adjusted each April 1 st and remain at \$0.258 per gallon.										
Based upon AB 935 revenues are estimated at \$799.4 million and \$804.6 million for FY 2000 and FY2001 respectively. A revenue loss of \$-4.7 million in FY 2000 and \$-23.4 million in FY 2001.										
Total impact in the 1999-2001 biennium is a loss of \$-28.1 million.										
The FY 2001 amount represents a full fiscal year impact of suspending the adjustment to the motor fuel tax rate.										
Long-Range Fiscal Implications Eliminating the annual April 1st adjustment to the motor vehicle fuel tax would result in the permanent loss of an expected \$0.018 increase in the rate. Estimated revenue from the projected rate increase was appropriated in the department's 1999-2001 biennial budget. Subsequently, changing the tax rate could leave an imbalance in departmental expenditures and revenues.
