### ***Analysis by the Legislative Reference Bureau***

This bill creates a grant program administered by the department of transportation to award grants totaling \$1,500,000 annually to air carriers having a hub facility in this state. The bill defines “air carrier” as any person engaged in the business of transportation in aircraft of persons or property for hire on regularly scheduled flights. The bill defines “hub facility” as: a facility at an airport from which an air carrier company operated at least 45 common carrier departing flights each weekday in the prior year and from which it transported passengers to at least 15 nonstop destinations; or as an airport or any combination of airports in this state from which an air carrier company cumulatively operated at least 20 common carrier departing flights each weekday in the prior year, if the air carrier company’s headquarters are in this state.

Under current law, revenues derived from aeronautics activities in this state, including moneys received from taxes on air carrier companies, from aircraft registration fees and from general aviation fuel taxes, are deposited in the segregated transportation fund. Aeronautics activities are funded from a sum certain appropriation in the segregated transportation fund.

**ASSEMBLY BILL 941**

Beginning on July 1, 2003, this bill directs all revenues derived from aeronautics activities that are currently deposited in the transportation fund to a new appropriation. Aeronautics activities are funded from these receipts, instead of from a sum certain appropriation.

Finally, the bill creates an airport financing committee consisting of members appointed by the governor. The bill requires the committee to review and evaluate this state's airport system needs and the current system of funding those needs and to recommend changes, if any, to better meet those needs. The bill requires the committee to submit a report not later than December 31, 2000, to the legislature and to the governor containing the committee's evaluation, findings and recommendations. The committee's recommendations, if any, should, if enacted, generate revenue in amounts equal to or greater than the sum of moneys appropriated for aeronautical activities in fiscal year 2001.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.
