Assumptions Used in Arriving at Fiscal Estimate

This bill authorizes use of a semiautomatic defibrillator in rendering emergency care or treatment of an individual who appears to be in cardiac arrest, by a person other than an ambulance service provider, emergency medical technician or a first responder-defibrillation, if the person has received training in a course for which a physician serves as medical director and that is approved by DHFS. In addition the bill provides immunity for the above mentioned people from civil liability for the acts or omissions, in rendering in good faith emergency care, by use of a semiautomatic defibrillator. The bill also provides immunity from civil liability for the physician who serves as medical director for the above-mentioned training course. The bill also instructs DHFS to review training courses for the use of a semiautomatic defibrillator and authorizes DHFS to approve those courses that satisfy DHFS' standard for approval.

The Department's Bureau of Emergency Medical Services (EMS) in the Division of Public Health facilitates the establishment and maintenance of a comprehensive, coordinated system of emergency medical services by providing a state level focal point for leadership, quality assurance, administration, coordination and technical assistance to all EMS providers and other system components. The EMS Bureau is responsible for the coordination of training, licensing, community assistance, communications, grants management, public information and education for the state. The Department, without additional cost, can absorb the additional responsibilities as specified in the bill. The bill has no fiscal impact.

Long-Range Fiscal Implications
