Analysis by the Legislative Reference Bureau

This bill does each of the following: 1) establishes programs administered by the department of administration (DOA) for providing energy assistance to low-income households (low-income programs), for conservation and efficiency services (conservation programs) and for encouraging the development and use of renewable energy resources (renewables programs); 2) imposes certain requirements on the generation of electricity from renewable energy resources; 3) creates an exemption from the cap on investments of public utility holding companies in nonutility affiliate assets (asset cap); 4) changes requirements regarding the ownership and operation of the transmission system of the state; 5) imposes employment requirements with respect to the acquisition of certain energy business units; 6) changes the requirements for the approval of certain high-voltage transmission lines; and 7) imposes various other requirements, including changes to the duties of the public service commission (PSC), prohibitions on the authority of the department of natural resources (DNR) regarding nitrogen oxide emissions and requirements for an interstate compact on regional transmission need and siting.

Low-income, conservation and renewables programs

After consulting with a council on utility public benefits that is created under the bill, DOA is required to establish the low-income, conservation and renewables programs. DOA must hold a hearing before establishing the programs.

The bill requires the division of housing in DOA to contract with certain nonprofit or governmental entities for the administration of the low-income programs. DOA must also contract with a nonprofit corporation for the administration of the conservation and renewables programs.

The programs established by DOA are funded by a public benefits fee that DOA collects from nonmunicipal electric public utilities, which must charge the public benefits fees to their customers. Municipal electric public utilities and retail electric cooperatives (municipal utilities and cooperatives) are also required to charge a public benefits fee to their customers or members. Every three years, a municipal utility or cooperative may elect to contribute all or a specified portion of the public benefits fees to DOA for the programs established by DOA. A municipal utility or cooperative that does not elect to contribute all of the public benefits fees to DOA must spend specified portions of the fees on its own “commitment to community programs”, which are defined as low-income assistance and conservation programs.

Each municipal utility and cooperative must charge a public benefits fee that is sufficient for the utility or cooperative to collect an annual average of \$17 per meter. However, for the period ending on June 30, 2008, the amount of any increase to an electric bill that is based on the public benefits fee charged by a municipal

SENATE BILL 196

utility or cooperative may not exceed 3% of the total of every other charge billed during that period, or \$750 per month, whichever is less.

For nonmunicipal utilities, the bill directs DOA to determine the amount of the public benefits fee, which consists of a portion sufficient to fund the low-income programs and a portion sufficient to fund the conservation and renewables programs. The bill allows DOA to reduce the amount that must be collected for the conservation and renewables programs after fiscal year 2003–04 if DOA determines to reduce or discontinue such programs. The public benefits fee paid by a customer of a nonmunicipal utility is subject to the same limit that applies to a municipal utility or cooperative for the period ending on June 30, 2008.

The bill also requires the PSC to determine the amount that an electric utility spent on low-income, energy conservation and renewables programs in 1998. Under the bill, an electric utility must spend a decreasing portion of such amount and contribute an increasing portion of such amount to the PSC for deposit in a utility public benefits fund, which is used to fund the programs established by DOA under the bill. This requirement replaces a requirement under current law that an electric utility annually spend a specified percentage of its annual operating revenues on energy conservation programs.

Renewable energy resources

Under this bill, specified percentages of the electricity generated by a public utility or retail cooperative must be generated from renewable energy resources. The percentage is calculated on the basis of a public utility's or retail cooperative's total retail energy sales. The bill allows public utilities and retail cooperatives to purchase credits from other public utilities and retail cooperatives that generate electricity from renewable energy resources in excess of the percentages required under the bill.

The bill also includes other requirements, including requirements for calculating the percentages and reporting compliance with the percentages to DOA.

Asset cap

With certain exceptions, current law prohibits the investments of a public utility holding company system (system) in nonutility affiliate assets from exceeding a specified asset cap.

This bill creates a new exception from this prohibition if the public utility affiliates in a system satisfy certain requirements, including the following: 1) petitioning the PSC and the federal energy regulatory commission for approval to transfer operational control of their electric transmission facilities that are located in the midwest region of the United States to a specific independent system operator; and 2) filing a commitment with the PSC to transfer ownership of transmission facilities and related land rights in this state to a transmission company that satisfies specified requirements. If the public utility affiliates satisfy the requirements for the exception, then certain nonutility affiliate assets are not included in calculating whether the system exceeds the asset cap. The assets that are not included in the calculation include the assets of a nonutility affiliate that are used for the following: 1) producing or selling gas, oil, electricity or steam energy; 2) providing energy management, conservation or efficiency products or services; 3) providing energy customer services; 4) recovering or producing energy from waste

SENATE BILL 196

materials; 5) processing waste materials; 6) manufacturing or selling certain filtration or fluid pumping products; and 7) providing telecommunications services.

Transmission system operation

This bill allows transmission utilities to transfer ownership of their transmission facilities to a transmission company that satisfies certain requirements, including the requirements to apply for approval to begin operations no later than November 1, 2000. The bill requires the transmission utilities that make such a transfer to enter into contracts with the transmission company to provide operation and maintenance with respect to the transmission facilities for a period of at least three years. A transmission utility that is a public utility affiliate in a public utility holding company system must comply with these transfer requirements in order for the system to qualify for the exception from the asset cap that is described above.

The bill also provides that, after the transmission company begins operations, a transmission utility or cooperative that has transferred ownership of its transmission facilities to the transmission company no longer has a duty to provide transmission services. Instead, the transmission company has the exclusive duty to provide transmission service in a specified area of the state. The transmission company's duty terminates when a certain independent system operator begins operations. This independent system operator is a person that has received the conditional approval of the federal energy regulatory commission to provide transmission service in the midwest region of the United States.

Under the bill, after the independent system operator begins operations, it has the exclusive duty to provide transmission service in a specified area of the state and each public utility that provides transmission service in that area must transfer operational control over its transmission facilities to the independent system operator. In addition, as noted above, a public utility affiliate must make such a transfer to qualify for the exception to the asset cap exception described above.

The bill imposes other requirements on the organization, formation and operation of the transmission company.

Under current law, a utility company's property is exempt from the property tax and the utility company pays a license fee that is based on a percentage of the company's gross revenues. Under this bill, the transmission company's property is also exempt from the property tax and the transmission company is required to pay the license fee.

Employment requirements for acquired energy units

The bill imposes certain employment requirements on a person who acquires an energy unit, which is defined as a business unit of a nonutility affiliate in a public utility holding company system or a public utility or cooperative association in which the business unit engages in certain energy-related activities. A person who acquires an energy unit must offer employment to the energy unit's nonsupervisory employees who are necessary for the operation and maintenance of the energy unit. If a nonutility affiliate acquires an energy unit in the same holding company system, the nonutility affiliate must offer employment to all of the energy unit's nonsupervisory employees. A person or nonutility affiliate that is subject to the bill's

SENATE BILL 196

requirements must, during the 30-month period after the acquisition, offer employment at wage rates that are no less than the wage rates in effect immediately prior to the acquisition. In addition, during the same 30-month period, the terms and conditions of employment, including fringe benefits, must be substantially similar to the terms and conditions in effect immediately prior to the acquisition.

Approval of high-voltage transmission lines

Under current law, with certain exceptions, a person may not construct a high-voltage transmission line, which is defined as a line that is designed for operation at 100 kilovolts or more, unless the PSC issues a certificate of public convenience and necessity (certificate) to the person. The PSC may not issue a certificate unless it makes certain specified findings regarding the high-voltage transmission line.

Under this bill, the PSC may not issue a certificate for a high-voltage transmission line that is proposed to increase transmission capacity into this state unless, in addition to the findings under current law, the PSC also makes specified findings regarding the use of existing rights-of-way and the routing and design of the line. In addition, the PSC may not issue a certificate for a high-voltage transmission line that is designed for operation at 345 kilovolts or more unless the PSC finds that certain benefits are reasonable in relation to the cost of the line.

The bill also imposes fees on persons who are issued certificates for high-voltage transmission lines that are designed for operation at 345 kilovolts or more. Such a person must pay an annual impact fee and a one-time environmental impact fee. The fees are based on the cost of the high-voltage transmission line. The fees must be paid to DOA, which is required to distribute the fees to counties, towns, cities and villages through which the high-voltage transmission line is routed.

Other requirements

The bill imposes the following duties on the PSC:

1. Requires the PSC to promulgate rules for carrying out the PSC's duties under current law regarding the consideration of environmental impact of certain actions.
2. Requires the PSC to promulgate rules requiring certain electric utilities and cooperative associations to submit reports on their electric reliability status.
3. Requires the PSC to study and report to the legislature on the establishment of a program for providing incentives for the development of certain high-efficiency, small-scale electric generating facilities.
4. Requires the PSC to contract for a study and submit a report to the legislature on the potential for horizontal market power of electric generators to frustrate the creation of effectively competitive retail electric markets.
5. Requires the PSC to approve certain market-based rates, individual contract options and market-based compensation for voluntary service interruptions for certain customers of certain electric public utilities.
6. Requires the PSC to order a public utility affiliate or the transmission company described above to make certain investments in its facilities if the PSC determines that the public utility affiliate or transmission company is not making investments that are sufficient to ensure reliable electric service.

SENATE BILL 196

The bill allows the governor, on behalf of the state, to enter into an interstate compact on the need for and siting of regional electric transmission facilities. A compact under the bill must include certain requirements, including a mechanism for resolving transmission conflicts between states.

The bill prohibits DNR from establishing certain reductions in nitrogen oxide emissions from electric generating facilities in specified counties.

This bill will be referred to the joint survey committee on tax exemptions for a detailed analysis, which will be printed as an appendix to this bill.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.

22 *charge public benefits fees.* Each retail electric cooperative and municipal utility
23 shall charge a monthly public benefits fee to each customer or member in amount
24 that is sufficient for the retail electric cooperative or municipal utility to collect an

2 (a) “Biomass” means a resource that derives energy from wood or plant
3 material or residue, biological waste, crops grown for use as a resource or landfill
4 gases. “Biomass” does not include garbage, as defined in s. 289.01 (9), or
5 nonvegetation-based industrial, commercial or household waste, except that
6 “biomass” includes refuse-derived fuel used for a renewable facility that was in
7 service in this state before January 1, 1998.

8 (b) “Conventional resource” means a resource that derives energy from coal, oil,
9 nuclear power or natural gas, except for natural gas used in a fuel cell.

10 (bm) “Department” means the department of administration.

11 (c) “Electric provider” means an electric utility or retail electric cooperative.

12 (d) “Electric utility” means a public utility that sells electricity at retail. For

15 system.

16 (e) “Excludable renewable capacity” means the portion of an electric provider’s
17 total renewable capacity that is supplied from renewable facilities that were placed
18 in service before January 1, 1998, and that, before January 1, 1998, derived
19 electricity from hydroelectric power, even if the output of the renewable facilities is
20 used to satisfy requirements under federal law.

21 (f) “Nonsystem renewable energy” means the amount of electricity that an
22 electric provider sells to its retail customers or members and that is supplied or
23 allocated under executed wholesale purchase contracts from renewable facilities
24 that are not owned or operated by the electric provider. “Nonsystem renewable

4 facility in which energy is derived from a renewable resource. “Renewable facility”
5 includes a facility the installation or operation of which is required under federal law,
6 but does not include a facility the installation or operation of which is required under
7 the laws of another state even if the installation or operation of the facility is also
8 required under federal law.

9 (h) “Renewable resource” means any of the following:

10 1. A resource that derives electricity from any of the following:

- 11 a. A fuel cell that uses, as determined by the commission, a renewable fuel.
12 b. Tidal or wave action.
13 c. Solar thermal electric or photovoltaic energy.
14 d. Wind power.

SENATE BILL 196**SECTION 26**

1 paragraph, a cooperative association is not considered to sell electricity at retail
2 solely on the basis of its ownership or operation of a retail electric distribution
3 system.

4 (n) “System renewable energy” means the amount of electricity that an electric
5 provider sells to its retail customers or members and that is supplied by renewable
6 facilities owned or operated by the electric provider.

7 (o) “Total renewable energy” means the sum of an electric provider’s system and
8 nonsystem renewable energy.

9 **(2) RENEWABLE RESOURCE ENERGY.** (a) Each electric provider shall provide to its
10 retail electric customers or members total renewable energy in at least the following
11 percentages of its total retail energy sales, either directly or through renewable
12 resource credits from another electric provider:

- 13 1. By December 31, 2000, 0.5%.
- 14 2. By December 31, 2002, 0.85%.

21 electric provider’s retail energy sales in this state during the prior 3 years.

22 2. The amount of electricity supplied by a renewable facility in which biomass
23 and conventional fuels are fired together shall be equal to the product of the
24 maximum amount of electricity that the facility is capable of generating and the ratio

SENATE BILL 196

2 content of both the biomass and conventional resource fuels.

3 3. Any excludable renewable energy that exceeds 0.6% of an electric provider's
4 total retail energy sales shall be excluded from the electric provider's total renewable
5 energy.

6 (c) No later than April 15 annually, an electric provider shall submit a report
7 to the department that describes the electric provider's compliance with par. (a).

16 under this paragraph by any of the following methods:

17 1. Allocating the costs equally to all customers or members on a kilowatt-hour
18 basis.

19 2. Establishing alternative price structures, including price structures under
20 which customers or members pay a premium for renewable energy.

3 2. For purposes of calculating the percentages under subd. 1., an electric
4 provider may include renewable facilities located in this or another state and
5 renewable facilities located on its or another electric provider's system.

6 3. Notwithstanding subd. 1., this subsection applies to an electric provider
7 unless the electric provider provides documentation to the commission that
8 establishes, to the satisfaction of the commission, that the electric provider satisfies
9 the requirements under subd. 1. a. or b.

10 **(3) RENEWABLE RESOURCE CREDITS.** (a) An electric provider that provides total
11 renewable energy to its retail electric customers or members in excess of the
12 percentages specified in sub. (2) (a) 1. to 6. may, in the applicable year, sell to any
13 other electric provider a renewable resource credit or a portion of a renewable
14 resource credit at any negotiated price. Alternatively, an electric provider may use
15 a renewable resource credit or portion of a renewable resource credit in a subsequent
16 year to establish compliance with sub. (2) (a). The commission shall promulgate
17 rules that establish requirements for calculating the amount of a renewable resource
18 credit.

19 (b) The commission may promulgate rules that establish requirements and
20 procedures for a sale under par. (a).

21 **(4) RULES.** The commission may promulgate rules that designate a resource,
22 except for a conventional resource, as a renewable resource in addition to the
23 resources specified in sub. (1) (g) 1. and 1m.

24 **(5) PENALTY.** Any person who violates sub. (2) or any wholesale supplier who

22 b. Bypass the distribution facilities of an electric utility or provide electric
23 service directly to a retail customer.

24 c. Own electric generation facilities or sell, market or broker electric capacity

16 prepare a plan for phasing in a combined single zone rate for the purpose of pricing
17 network use by users of the transmission system operated by the Midwest
18 independent system operator and shall seek plan approval by the federal energy
19 regulatory commission and the Midwest independent system operator. A plan under
20 this subdivision shall phase in an average-cost price for the combined single zone in
21 equal increments over a 5-year period, except that, under the plan, transmission
22 service shall be provided to all users of the transmission system on a single-zone
23 basis during the phase-in period.

19 date or upon a two-thirds vote of the board of directors or managers after such
20 10-year period.

21 2. That at least 4 managers or directors of the transmission company have
22 staggered 4-year terms, are elected by a majority vote of the security holders and are

17 may not transfer control over, or divest its interest in, its transmission facilities to
18 an independent system operator or independent transmission owner unless, to the
19 satisfaction of the commission, each of the following requirements is satisfied:

20 **SECTION 54.** 196.485 (4) (am) of the statutes is created to read:

21 196.485 (4) (am) Each transmission utility in the transmission area that is a
22 public utility shall become a member of the Midwest independent system operator
23 no later than June 30, 2000, and shall transfer operational control over its
24 transmission facilities to the Midwest independent system operator. Each such
25 transmission utility that has not contributed its transmission facilities to the

SENATE BILL 196

1 transmission company shall elect to become part of the single zone for pricing
2 purposes within the Midwest independent system operator and any phase-in plan
3 prepared under sub. (3m) (a) 4.

4 **SECTION 55.** 196.485 (5) of the statutes is created to read:

5 196.485 (5) PUBLIC UTILITY AFFILIATES. (a) *Asset cap exception.* Section 196.795
6 (6m) (e) does not apply to the eligible assets of a nonutility affiliate in a holding
7 company system unless each public utility affiliate in the holding company system
8 does each of the following:

9 1. Petitions the commission and the federal energy regulatory commission to
10 approve the transfer of operational control of all the public utility affiliate's
11 transmission facilities in this state and in Iowa, Michigan, Minnesota and Illinois to
12 the Midwest independent system operator.

13 2. Files with the commission an unconditional, irrevocable and binding
14 commitment to contribute, no later than June 30, 2000, all of the transmission
15 facilities that the public utility affiliate owns or operates in this state on the effective
16 date of this subdivision [revisor inserts date], and land rights, to the transmission
17 company. A filing under this subdivision shall specify a date no later than June 30,
18 2000, on which the public utility affiliate will complete the contribution of
19 transmission facilities.

20 3. Files with the commission an unconditional, irrevocable and binding
21 commitment to contribute, and to cause each entity into which it merges or
22 consolidates or to which it transfers substantially all of its assets to contribute, any
23 transmission facility in this state the ownership or control of which it acquires after
24 the effective date of this subdivision [revisor inserts date], and land rights, to the
25 transmission company.

SENATE BILL 196

1 4. Notifies the commission in writing that the public utility affiliate has become
2 a member of the Midwest independent system operator, has agreed to transfer its
3 transmission facilities to the Midwest independent system operator and has
4 committed not to withdraw its membership prior to the date on which the public
5 utility affiliate contributes transmission facilities to the transmission company
6 under par. (b).

7 5. Petitions the commission and the federal energy regulatory commission to
8 approve the contributions specified in subds. 2. and 3. and agrees in such a petition
9 not to withdraw the petition in the event that the commission or the federal energy
10 regulatory commission conditions its approval on changes that are consistent with
11 state or federal law.

12 (b) *Contribution of transmission facilities.* 1. A public utility affiliate may not
13 contribute a transmission facility to the transmission company until the commission
14 has reviewed the terms and conditions of the transfer to determine whether the
15 transfer satisfies the requirements of this subsection and has issued an order
16 approving or modifying the terms and conditions of the transfer. An order under this
17 subdivision that modifies the terms and conditions of a transfer may allow a public
18 utility affiliate to recover in retail rates any adverse tax consequences of the transfer
19 as a transition cost.

20 2. The transmission company and a public utility affiliate that files a
21 commitment to contribute transmission facilities under par. (a) 2. shall structure the
22 transfer of the transmission facilities in a manner that satisfies each of the following:

23 a. The structure of the transfer avoids or minimizes the material adverse tax
24 consequences to the public utility affiliate that result from the transfer and avoids
25 or minimizes material adverse consequences on public utility rates that do not arise

SENATE BILL 196

1 out of combining the transmission company's facilities into a single zone in the
2 Midwest independent system operator.

3 b. To the extent practicable, the structure of the transfer satisfies the
4 requirements of the Internal Revenue Service for a tax-free transfer.

5 3. The requirements under subd. 2. b. shall, if practicable, be satisfied by the
6 transmission company's issuance of a preferred class of securities that provides the
7 fixed-cost portion of the resulting capital structure of the transmission company.
8 The transmission company shall issue preferred securities under this subdivision on
9 a basis that does not dilute the voting rights of the initial security holders relative
10 to the value of their initial contributions.

11 4. If the transfer of transmission assets under this paragraph results in a
12 capital structure of the transmission company in which the percentage of common
13 equity is materially higher than that of the public utility affiliates who made the
14 transfer, or if the cost of the fixed-cost portion of the capital structure of the
15 transmission company is materially higher than that of the public utility affiliates
16 who made the transfer, the public utility affiliates shall enter into a contract with the
17 transmission company under which the public utility affiliates agree to accept from
18 the transmission company a return on common equity based upon the equity rate of
19 return approved by the federal energy regulatory commission and upon an imputed
20 capital structure that assigns to a portion of the public utility affiliates' common
21 equity holdings an imputed debt return that is consistent with the requirements of
22 this subdivision. A contract under this subdivision shall specify that the public
23 utility affiliates shall be required to accept the return on common equity described
24 in this subdivision only until such time that the federal energy regulatory
25 commission determines that the actual capital structure and capital costs of the

SENATE BILL 196

1 transmission company are appropriate and consistent with industry practice for a
2 regulated public utility that provides electric transmission service in interstate
3 commerce.

4 5. If, at the time that a public utility affiliate files a commitment under par. (a)
5 2., the public utility affiliate has applied for or obtained a certificate of public
6 convenience and necessity under s. 196.491 (3) or a certificate under s. 196.49 for the
7 construction of transmission facilities, the public utility affiliate shall do each of the
8 following:

9 a. Proceed with diligence with respect to obtaining the certificate and, except
10 as provided in subd. 6., constructing the transmission facilities.

11 b. If the commission determines that the cost of the transmission facilities is
12 reasonable and prudent, transfer the transmission facilities to the transmission
13 company at net book value when construction is completed in exchange for additional
14 securities of the transmission company on a basis that is consistent with the
15 securities that were initially issued to the public utility affiliate.

16 6. If the construction of a transmission facility specified in subd. 5. a. is not
17 completed within 3 years after a certificate is issued for the transmission facility
18 under s. 196.49 or 196.491 (3), the transmission company may assume responsibility
19 for completing construction of the transmission facility. If the transmission company
20 assumes responsibility for completing construction under this subdivision, the
21 transmission company shall carry out any obligation under any contract entered into
22 by the public utility with respect to the construction until the contract is modified or
23 rescinded by the transmission company to the extent allowed under the contract.

24 7. Any transmission facilities that are contributed to the transmission
25 company shall be valued at net book value at the time of the transfer.

SENATE BILL 196**SECTION 55**

1 (bm) *Lease of transmission facilities.* If a public utility affiliate is not able to
2 contribute its transmission facilities to the transmission company as required under
3 par. (b) due to merger-related accounting requirements, the public utility affiliate
4 shall transfer the transmission facilities to the transmission company under a lease
5 for the period of time during which the accounting requirements are in effect and,
6 after such requirements are no longer in effect, contribute the transmission facilities
7 to the transmission company under par. (b). A public utility affiliate that transfers
8 transmission facilities under a lease under this paragraph does not qualify for the
9 asset cap exception under par. (a) unless, during the term of the lease, the public
10 utility affiliate does not receive any voting interest in the transmission company.

11 (c) *Contribution of land rights.* 1. A public utility affiliate that commits to
12 contributing land rights to the transmission company under par. (a) 2. shall do each
13 of the following:

14 a. Except as provided in subd. 2., if the land right is assigned to a transmission
15 account for rate-making purposes and is not jointly used for electric and gas
16 distribution facilities by the public utility affiliate, the public utility affiliate shall
17 convey or assign at book value all of its interest in the land right to the transmission
18 company, except that any conveyance or assignment under this subd. 1. a. shall be
19 subject to the rights of any joint user of the land right and to the right of the public
20 utility affiliate to nondiscriminatory access to the real estate that is subject to the
21 land right.

22 b. If the land right is jointly used, or is intended to be jointly used, for electric
23 and gas distribution facilities by the public utility affiliate, the public utility affiliate
24 shall enter into a contract with the transmission company that grants the
25 transmission company a right to place, maintain, modify or replace the transmission

SENATE BILL 196

1 company's transmission facilities on the real property that is subject to the land right
2 during the life of the transmission facilities and the life of any replacements of the
3 transmission facilities. A right granted in a contract under this subd. 1. b. shall be
4 paramount to the right of any other user of the land right, except that a right granted
5 in such a contract shall be on par with the right of the public utility affiliate to use
6 the land right for electric or gas distribution facilities.

7 2. If a public utility affiliate is prohibited from making a conveyance or
8 assignment described in subd. 1. a., the public utility affiliate shall enter into a
9 contract with the transmission company that grants the transmission company
10 substantially the same rights as under such a conveyance or assignment. For
11 purposes of a contract under this subdivision, a land right shall be valued at book
12 value, not at market value.

13 3. The commission shall resolve any dispute over the contribution of a land
14 right under subd. 1. or 2., including a dispute over the valuation of such a land right,
15 unless a federal agency exercises jurisdiction over the dispute. During the pendency
16 of any dispute that is before the commission or a federal agency, the transmission
17 company shall be entitled to use the land right that is the subject to the dispute and
18 shall be required to pay any compensation that is in dispute into an escrow account.

19 **SECTION 56.** 196.485 (6) of the statutes is created to read:

20 196.485 (6) ELECTRIC UTILITIES, TRANSMISSION DEPENDENT UTILITIES AND RETAIL
21 ELECTRIC COOPERATIVES. No later than the first day of the 12th month beginning after
22 the first public utility affiliate files a commitment under sub. (5) (a) 2.:

23 (a) An electric utility, other than a public utility affiliate, may transfer all of its
24 integrated transmission facilities to the transmission company on the same terms

SENATE BILL 196

1 and conditions as a contribution of transmission facilities and land rights by a public
2 utility affiliate under sub. (5) (b) and (c).

3 (b) A transmission-dependent utility or retail electric cooperative may
4 purchase equity interests in the transmission company at a price that is equivalent
5 to net book value and on terms and conditions that are comparable to those for public
6 utility affiliates that have contributed transmission facilities to the transmission
7 company. A purchaser under this paragraph may contribute funds to the
8 transmission company that are no more than the value of its prorated shares based
9 on firm electric usage in this state in 1999.

10 **SECTION 57.** 196.485 (6m) of the statutes is created to read:

11 196.485 **(6m)** DIVIDENDS, PROFITS AND GAINS. The commission may not treat any
12 dividend received by a transmission utility from the transmission company or any
13 gain or profit of a transmission utility from the sale or other disposition of securities
14 issued by the transmission company as a credit against the retail revenue
15 requirements of the transmission utility.

16 **SECTION 58.** 196.485 (7) of the statutes is created to read:

17 196.485 **(7)** ENFORCEMENT. A wholesale or retail customer of a public utility
18 affiliate may petition the circuit court for Dane County for specific performance of
19 a commitment filed under sub. (5) (a) 2. or 3.

20 **SECTION 59.** 196.485 (8) of the statutes is created to read:

21 196.485 **(8)** PENALTIES. A public utility affiliate that fails to complete the
22 contribution of transmission facilities to the transmission company by the
23 completion date specified in the filing under sub. (5) (a) 2. shall forfeit \$25,000 for
24 each day that completion of the contribution is delayed if the transmission company
25 is legally able to accept the contribution.

SENATE BILL 196

1 **SECTION 60.** 196.487 of the statutes is created to read:

2 **196.487 Reliability of electric service. (1) DEFINITIONS.** In this section:

3 (a) “Public utility affiliate” has the meaning given in s. 196.795 (1) (L).

4 (b) “Transmission company” has the meaning given in s. 196.485 (1) (ge).

5 **(2) COMMISSION ORDER.** If the commission determines that a public utility
6 affiliate or the transmission company is not making investments in the facilities
7 under its control that are sufficient to ensure reliable electric service, the commission
8 shall order the public utility affiliate or transmission company to make adequate
9 investments in its facilities that are sufficient to ensure reliable electric service. An
10 order under this subsection shall require the public utility affiliate or transmission
11 company to provide security in an amount and form that, to the satisfaction of the
12 commission, is sufficient to ensure that the public utility affiliate or transmission
13 company expeditiously makes any investment that is ordered.

14 **(3) COST RECOVERY.** The commission shall allow a public utility affiliate that is
15 subject to an order under sub. (2) to recover in its retail electric rates the costs that
16 are prudently incurred in complying with the order.

17 **SECTION 61.** 196.491 (3) (d) 3r. of the statutes is created to read:

18 196.491 **(3) (d) 3r.** For a high-voltage transmission line that is proposed to
19 increase the transmission import capability into this state, existing rights-of-way
20 are used to the extent practicable and the routing and design of the high-voltage
21 transmission line minimizes environmental impacts in a manner that is consistent
22 with achieving reasonable electric rates.

23 **SECTION 62.** 196.491 (3) (d) 3t. of the statutes is created to read:

24 196.491 **(3) (d) 3t.** For a high-voltage transmission line that is designed for
25 operation at a nominal voltage of 345 kilovolts or more, the high-voltage

SENATE BILL 196

1 transmission line provides usage, service or increased regional reliability benefits to
2 the wholesale and retail customers or members in this state and the benefits of the
3 high-voltage transmission line are reasonable in relation to the cost of the
4 high-voltage transmission line.

5 **SECTION 63.** 196.491 (3) (gm) of the statutes is created to read:

6 196.491 (3) (gm) The commission may not approve an application filed after the
7 effective date of this paragraph [revisor inserts date], under this section for a
8 certificate of public convenience and necessity for a high-voltage transmission line
9 that is designed for operation at a nominal voltage of 345 kilovolts or more unless the
10 approval includes the condition that the applicant shall pay the fees specified in sub.
11 (3g) (a). If the commission has approved an application under this section for a
12 certificate of public convenience and necessity for a high-voltage transmission line
13 that is designed for operation at a nominal voltage of 345 kilovolts or more that was
14 filed after April 1, 1999, and before the effective date of this paragraph [revisor
15 inserts date], the commission shall require the applicant to pay the fees specified in
16 sub. (3g) (a). For any application subject to this paragraph, the commission shall
17 determine the cost of the high-voltage transmission line, identify the counties,
18 towns, villages and cities through which the high-voltage transmission line is routed
19 and allocate the amount of investment associated with the high-voltage
20 transmission line to each such county, town, village and city.

21 **SECTION 64.** 196.491 (3g) of the statutes is created to read:

22 196.491 (3g) FEES FOR CERTAIN HIGH-VOLTAGE TRANSMISSION LINES. (a) A person
23 who receives a certificate of public convenience and necessity for a high-voltage
24 transmission line that is designed for operation at a nominal voltage of 345 kilovolts
25 or more under sub. (3) shall pay the department of administration an annual impact

SENATE BILL 196

1 fee as specified in the rules promulgated by the department of administration under
2 s. 16.969 (2) (a) and shall pay the department of administration a one-time
3 environmental impact fee as specified in the rules promulgated by the department
4 of administration under s. 16.969 (2) (b).

5 (b) A person that pays a fee under par. (a) may not use the payment to offset
6 any other mitigation measure that is required in an order by the commission under
7 sub. (3) regarding the certificate of public convenience and necessity specified in par.
8 (a).

9 **SECTION 65.** 196.491 (3m) (b) 2. of the statutes is amended to read:

10 196.491 **(3m)** (b) 2. The analytical process specified in subd. 1. b. shall, to the

17 under this subsection, issue an order requiring an electric utility to construct or
18 procure, on a competitive basis, the construction of transmission facilities specified
19 by the commission in its order if the commission determines that, ~~based on the~~
20 ~~results of the study under sub. (2),~~ such construction is necessary to relieve a
21 constraint on a transmission system and the construction will materially benefit the
22 customers of the electric utility or other electric utilities or of an independent system
23 operator, as defined in s. 196.485 (1) (d), or independent transmission owner, as
24 defined in s. 196.485 (1) (dm).

25 **SECTION 67.** 196.494 (5) of the statutes is created to read:

SENATE BILL 196**SECTION 67**

2 compact that establishes a joint process for the states in the upper midwest region
3 of the United States to determine the need for and siting of regional electric
4 transmission facilities that may affect electric service in this state. The governor
5 may not enter into a compact under this subsection unless the compact includes
6 requirements and procedures for establishing each of the following:

7 (a) Compliance with each state’s environmental and siting standards for
8 transmission facilities.

9 (b) A regional need determination for transmission facilities.

10 (c) A mechanism for resolving conflicts between the states regarding the siting

5 after June 7, 1931, only if it shall clearly appear and be established upon
6 investigation that it is reasonable and consistent with the public interest. The
7 commission may not approve any contract or arrangement unless satisfactory proof
8 is submitted to the commission of the cost to the affiliated interest of rendering the
9 services or of furnishing the property or service to each public utility or of the cost
10 to the public utility of rendering the services or of furnishing the property or service
11 to each affiliated interest. No proof is satisfactory under this paragraph unless it
12 includes the original (or verified copies) of the relevant cost records and other
13 relevant accounts of the affiliated interest, or an abstract of the records and accounts
14 or a summary taken from the records and accounts if the commission deems the
15 abstract or summary adequate. The accounts shall be properly identified and duly
16 authenticated. The commission, where reasonable, may approve or disapprove a
17 contract or arrangement without submission of the cost records or accounts.
