

DRAFTER'S NOTE
FROM THE
LEGISLATIVE REFERENCE BUREAU

LRB-3229/2dn
RAC:jlg:km

August 6, 1999

Per your request, this version of the draft eliminates the statutory definitions of patient and prisoner; as a result, the department of employe trust funds will decide the definitions of patient and prisoner.

Please note that in the first version of the draft it was not necessary that the employe *only* have contact with a patient and prisoner, as these terms were defined; instead, it was only required that the employe duties *include* contact with a patient and prisoner, as these terms were defined. Thus, the employe could be a protective occupation participant under the first version of the draft and have contact with other types of patients and prisoners that might have been excluded from the defined terms.

Please review how I have dealt with the issue of where these employes are assigned. I specified that they must be assigned at a facility owned, leased or operated by the University of Wisconsin Hospitals and Clinics Authority. I believe that this would cover every conceivable place at which such an employe would be working.

If you have any questions about the draft, please do not hesitate to contact me.
