| Assumptions Used in Arriving at Fis | | <u></u> | | | | | | | | | | |
| Key Assumptions | | | | | | | | | | | | |
| SB 387 would require WisD | OT to charge sales tax to pi | archasers of information | lists used for | commercial purposes. | | | | | | | | |
| • The definition of "data list" includes any request for any number of records for commercial use including requests for individual | | | | | | | | | | | | |
| records but does not include individuals who request their own record for non-commercial purposes. | | | | | | | | | | | | |
| WisDOT does not differentiate between commercial requests and non-commercial requests in terms of record keeping but | | | | | | | | | | | | |
| 1 | estimate that non-commercial requests make up less than 5% of total sales. DMV collects sales tax on some items today and therefore our systems and processes would be able to accommodate this change | | | | | | | | | | | |
| with no measurable impact. | | | | | | | | | | | | |
| Despite the Supreme Court of | D. S. d. G | | | | | | | | | | | |
| | | | | | | | | | | | | |
| Conclusion | oco for computer progra | mming modifications (| o automate | d hilling eveteme | | | | | | | | |
| \$440 One time cost increase for computer programming modifications to automated billing systems. \$450,000 ongoing revenue increase to the general fund for collection of sales tax on approximately \$9,000,000 in WisDOT sales of data lists. Note: In addition, we will collect an indeterminable amount of county sales tax and stadium tax based on the location of the requester. | | | | | | | | | | | | |
| There is an indeterminab | | | nt. | | | | | | | | | |
| Designation Constraint | | entro di | | | | | | | | | | |
| Basis for Conclusion 20 hours programming time X \$22/hr(salary &fringe for IS Comp Professional - Senior = \$440 | | | | | | | | | | | | |
| | 40.5. When I take the last 50's are appropriately appropriately 60 million in commercial colors | | | | | | | | | | | |
| \$9 million X 5% sales tax = \$450,000 ongoing revenue increase to general fund | | | | | | | | | | | | |
| Note: We cannot estimate the amount of additional county and stadium taxes collected because we currently do | | | | | | | | | | | | |
| not capture county data in our billing systems. | | | | | | | | | | | | |
| • Local government agencies provide a wide variety of data to many customers for various purposes. The assumption is that some of these data lists are provided for commercial purposes. This would result in some costs to begin calculating and collecting sales tax and revenue increase from the tax. Both amounts are indeterminable. | | | | | | | | | | | | |
| to begin calculating and collecting sales tax and revenue increase norm the tax. Both amounts are indeterminable. | | | | | | | | | | | | |
| | | | | | | | | | | | | |
| | | | | | | | | | | | | |
| Long-Range Fiscal Implications | | | | | | | | | | | | |
| Increased revenue fiscal implications are ongoing. No additional long-range fiscal implications. | | | | | | | | | | | | |
