

DRAFTER'S NOTE
FROM THE
LEGISLATIVE REFERENCE BUREAU

LRBa2068/1dn
RCT:jlj:jf

March 27, 2000

Bill Wenzel:

As we discussed, the language in this draft varies from the language that you provided to me. This draft requires persons applying pesticides in schools and on school grounds to be certified under DATCP's current pesticide applicator certification program, s. 94.705. It does not require any special training about applying pesticides in or around schools for the individual applicators. As we discussed, it would not really work to require some new training about pesticide application in schools before individuals become certified under s. 94.705 because many individuals are already certified under s. 94.705.

This draft also requires each school district to have at least one individual who will be involved in developing the pest management plan receive the school pest management training provided by the UW-Extension.
