9 **relating to:** causing property damage by operating a motor vehicle while under
10 the influence of an intoxicant or other drug.

Analysis by the Legislative Reference Bureau

In addition to the absolute sobriety offense applicable to young drivers and the lower blood alcohol concentration limit applicable to commercial motor vehicle drivers, there are currently four kinds of the following offenses related to operating a motor vehicle or commercial motor vehicle while under the influence of an intoxicant (OWI): 1) regular OWI; 2) OWI causing injury; 3) OWI causing great

SENATE BILL 508

bodily harm; and 4) OWI causing death. A person commits an OWI offense when the person operates a motor vehicle while having a prohibited alcohol concentration in his or her blood or while under the influence of an intoxicant, a controlled substance, a controlled substance analog, any other drug or of a combination of any of those, to a degree that renders him or her incapable of safely driving. The penalties for these offenses increase with the severity of the offense and with the number of previous OWI offenses the person has committed within certain time frames. In addition to these offenses, a person is subject to the loss of his or her operating privilege (driver's license) if he or she refuses to take a test to determine his or her blood alcohol concentration.

This bill creates additional offenses for operating of a motor vehicle while under the influence of an intoxicant or while having a prohibited alcohol concentration and that results in damage to property. These offenses are counted as other OWI offenses when determining the applicable penalties. The penalties for these offense are identical to the penalties for second-offense regular OWI offenses.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
