

DRAFTER'S NOTE
FROM THE
LEGISLATIVE REFERENCE BUREAU

LRB-2660/3dn
PJK:jlg:kjf

July 13, 1999

This redraft provides funding for the program from the development fund, instead of with new GPR. Because the development fund appropriation is a biennial appropriation, I provided that not more than \$2,000,000 may be spent under the program in a fiscal biennium. If you prefer, I can provide instead that not more than \$1,000,000 may be spent under the program in a fiscal year.

The development fund appropriation is heavily affected by the budget. Because the budget has not yet passed, the development fund appropriation in this draft does not take into account the changes made by the budget. If the budget passes before this draft does, it might be possible to draft a technical amendment that substitutes the final budget version of the appropriation in this draft. If such an amendment is not possible for one reason or another, or is not passed, the revisor will have to merge the two versions in a revisor's bill.
