Affected Ch. 20 Appropriations

Assumptions Used in Arriving at Fiscal Estimate

This proposal establishes a sales and use tax exemption for access to, and use of, the Internet. For purposes of this fiscal note, it is assumed that access and use of the Internet are limited to direct Internet access and online information services (OLS), web site advertising services, and web site hosting and design services. Transfers of taxable tangible personal property via the Internet are not considered to be use of the Internet for purposes of this fiscal note; these would remain taxable if this bill were enacted.

Of the services included in this fiscal estimate, direct Internet access services are taxed and web site design services are taxed if the design is transferred to the purchaser. According to Jupiter Communications, revenue generated from direct Internet access services that are sold to both businesses and households is projected to be an estimated \$7.5 billion nationally in 1999. Of this amount, nearly \$6.1 billion would be considered access services that are taxable under Wisconsin's current statutes.

(continued on page two)

Long-Range Fiscal Implications

Due to continued strong growth in direct Internet access, U.S. revenue from these services is projected to reach \$8.4 billion in 2001. This figure translates into a potential sales tax revenue loss for Wisconsin of approximately \$7.9 million during that year; however, predicting future revenue is difficult given the volatile nature of this rapidly changing market.

Assuming Wisconsin's share of Internet access revenue is the same as the state's share of personal income, the amount of Internet access revenue in 1999 will be approximately \$113 million ($\$6,100 \text{ million} \times .0185$). Therefore, the amount of sales tax revenue associated with Internet access charges is \$5.7 million ($\$113 \text{ million} \times .05$).

Information regarding the amount of sales tax generated from web site designs that are transferred to purchasers is not available and the revenue loss associated with these transactions is not included as part of this fiscal note.

In 1997, local sales tax revenues collected by Wisconsin counties and the Southeast Wisconsin Professional Baseball Park District were approximately 6.25% of state sales tax revenues. Assuming that this percentage applies, local sales tax revenues would be reduced by approximately \$356,000 ($\$5.7 \text{ million} \times .0625$).
