Assumptions Used in Arriving at Fiscal Estimate

This bill would prohibit telecommunications providers, including cable television operators, from using customers' social security numbers. The PSC would be required to enforce any violations of the law and initiate forfeiture provisions.

If this bill became law, it is presumed that the industry will make whatever changes are required to comply with the statute. Therefore, it is unlikely that any significant costs will occur to enforce the bill's provisions.

There would be no local government costs associated with this bill.

Long-Range Fiscal Implications

Minimal, if any.
