| Senate Bill 358 transfers the animal health laboratories and their employees from the Department of Agriculture, Trade and Consumer Protection (DATCP) to the University of Wisconsin System on July 1, 2000. The bill also authorizes 18 additional positions for the laboratories and creates a veterinary laboratory board, attached to the UW System, to oversee the laboratories. The economic health of Wisconsin agriculture depends heavily on the ability to export products around the world. A common characteristic of international trade agreements is the requirement that exporting agents be able to provide official, verifiable data to demonstrate the absence of, or incident rate of, specific animal diseases. The acceptability of disease incidence and quality assurance data from a private, non-governmental laboratory to our international trading partners is low. | | | | | | | | | |
| Within Wisconsin, there is no counterpart to the Laboratory. The School of Veterinary Medicine was directed and funded from its conception to avoid duplication of activities of other state agencies, including the Laboratory. The design and size of the Veterinary School's physical plant and equipment, and the level of staffing simply do not allow the school to fulfill the functions of the Wisconsin Animal Health Laboratory. Consequently, a complete transfer of assets is required. This transfer preserves the availability of critical services to the state and its agricultural business community and complements UW System functions and mission. It is therefore, supported by UW System. The transfer will result in an increase in UW System costs of \$6,390,100 and 80.5 full time equivalent | | | | | | | | | |
| positions. All but approximately \$200,000 of those costs and 18 positions will be directly off set by reductions at DATCP. This fiscal estimate does not include classified employee compensation increases that are still being negotiated between the Department of Employee Relations and employee unions. Additional detail is found in the fiscal estimate worksheet and DATCP's fiscal estimate for this bill. Long-Range Fiscal Implications: | | | | | | | | | |
