The Honorable John Gard
Assembly Chair
Joint Committee on Finance
315 North, State Capitol
Madison, WI 53702

Dear Senator Burke and Representative Gard:

The 1999-2001 Biennial Budget bill contained a provision that instructed the Department of Commerce to prepare and submit to the Joint Committee on Finance and the Joint Committee for Review of Administrative Rules a report containing recommendations for actions that the department could take to reduce interest costs incurred by claimants. The report was also to include a review of schedules for making progress payment to claimants.

Although the department recognizes the importance of the report on interest costs, it currently lacks some of the key information necessary to prepare the report. Two major initiatives were included in the budget bill, which fundamentally change the interest cost picture. These changes were the bonding to fund the claim backlog and the reduction in interest rate reimbursements allowed under the PECFA statute. These items are key to the question of interest costs for owners and there has not been adequate time for their impact to be felt and assessed.

The first block of bonding funds was made available to the department in April and immediately disbursed to owners. Additional bond proceeds are expected to be available in May and this will allow the program to complete the elimination of the claim backlog. The assessment of owner interest costs should be made after the backlog is eliminated and after lenders and claimants establish a post bonding loan market.

A key element of the post bonding market will be the new interest rate caps established in the budget. Currently, we have little information regarding trends in loans. Although trends will emerge over time, it is simply too early to gauge the impact that this change is having on owner costs.

Again, although we recognize the critical nature of the report that has been requested, additional time is needed to assess the interest cost question. Our belief is that approximately six months is needed, after the completion of the bonding payout, to determine the interest impact on claimants. We anticipate completing the bonding payout in May and would be able to provide a report by December 1, 2000.

We appreciate your efforts to control interest costs and are available to provide any additional information that you might wish regarding current operations and the future interest report.

Sincerely,

A handwritten signature in black ink, appearing to read "Brenda J. Blanchard".

JOINT COMMITTEE ON FINANCE

May 11, 2000

Secretary Brenda Blanchard
Department of Commerce
201 West Washington Avenue, 6th Floor
Madison, WI

Dear Secretary Blanchard:

This is in response to your letter of April 27, 2000, that described why the Department of Commerce did not submit a report to the Joint Committee on Finance on March 1, 2000, as required by the 1999-01 biennial budget act. 1999 Act 9 (Section 9110 (3yx)) directed the Department of Commerce to submit a report related to interest costs under the Petroleum Environmental Cleanup Award (PECFA) program to this Committee and to the Joint Committee for Review of Administrative Rules containing recommendations for actions that Commerce could take to reduce interest costs incurred by PECFA claimants, including a review of schedules for making progress payments to claimants.

We appreciate your efforts to date to make timely PECFA payments with the revenue obligation proceeds authorized in Act 9 and to reduce the claim backlog. It is important to complete disbursing revenue bond proceeds to eliminate the PECFA claim backlog. It is also important to review the impact of the bonding provisions and progress payment schedules on interest costs incurred by claimants, particularly due to the interest reimbursement caps contained in Act 9.

Although you indicate that the required report may not be completed until December 1, we encourage you to give the report a high priority and to submit it as soon as possible. Please keep us informed of your progress to implement provisions that will minimize interest costs incurred by PECFA claimants.

Sincerely,

BRIAN BURKE
Senate Chair

MEMORANDUM

To: Members
Joint Committee on Finance

From: Senator Brian Burke
Representative John Gard

Date: November 8, 2000

Re: Semi-Annual Status Report on PECFA

Attached is a copy of a report from the Department of Commerce and the Department of Natural Resources, which summarizes the activities completed for the PECFA program during the first half of calendar year 2000.

The report is being provided for your information only. No formal action is required by the Committee. Please feel free to contact us if you have any questions.

Rep. Neal Kedzie, Chair
Assembly Environment Committee
Room 307 North, State Capitol
P.O. Box 8952
Madison, WI 53708

Alice *Neal*
Dear Senator Clausing and Representative Kedzie:

The Department of Natural Resources and the Department of Commerce are pleased to transmit to you the Semi-Annual Status Report on Petroleum Storage Remedial Action; Financial Assistance and Petroleum Storage Tank Discharges (PECFA program) for the period of January 1, 2000 through June 30, 2000.

As directed in section 101.143 (11) Stats., the report summarizes the activities completed for the PECFA program during the first half of CY2000. The report provides the results of implementation of the statutory requirements, including a summary of the pertinent demographic information such as the number of sites within the program, the date of receipt of the site investigation report, a listing of environmental risk factors for each of the sites, a breakdown of PECFA costs for claims submitted, progress made in evaluating fraud and other complaints, and additional important information.

We hope that the attached report fulfills your needs. If you, or your staff, have any questions regarding this report, please contact us so that we can provide any needed clarifications. You can reach Jay Hochmuth, DNR Division Administrator for Air and Waste Management at 608-267-9521 and John Alberts, Commerce Division Administrator for Environmental and Regulatory Services at 608-266-9403.

Sincerely,

A handwritten signature of Brenda J. Blanchard.

**REPORT ON
PETROLEUM STORAGE REMEDIAL ACTION; FINANCIAL ASSISTANCE
AND PETROLEUM STORAGE TANK DISCHARGES
(JANUARY 1, 2000 THROUGH JUNE 30, 2000)**

This report fulfills the requirement that the Departments of Commerce and Natural Resources semi-annually submit a report on the status of activities related to petroleum storage remedial action; financial assistance and petroleum storage tank discharges (hereinafter referred to as the Program). As directed in section 101.143(11), Stats., the report summarizes activities completed within the Program during the period of January 1, 2000 through June 30, 2000. Both agencies respectfully submit this report to the Governor, the Joint Legislative Audit Committee, and the Joint Committee on Finance, and to other appropriate standing committees of the legislature as directed by the statute.

SUMMARY OF RECENT ACTIVITY

Significant changes within the program during the first six months of CY2000 include: the promulgation of the most recent version of emergency rule COMM 46 and NR 746 which incorporates additional risk-based criteria for closure of petroleum cleanup sites, and the continued implementation of the shift of approximately 1,800 additional petroleum sites to the Department of Commerce based on statutory changes contained in the provisions of the 1999-2001 biennial budget bill.

♦ **Emergency Rule COMM46 / NR746 [promulgated May 17, 2000]**

The agencies were directed by the Joint Committee on Review of Administrative Rules to incorporate additional risk-based decision making into the remediation process for petroleum contaminated sites, and were directed to implement an emergency rule in January 1999. The purpose of the rule was to codify the memorandum of understanding between the departments, as well as allow for closure criteria for clay sites based on risk factors. The most recent version of the emergency rule COMM46 and NR746 was promulgated on May 17, 2000. Public hearings were held on June 15, July 10, and July 12 in Madison, Milwaukee and Wausau, respectively. The final rule is expected to be finalized this Fall.

Key factors of the current emergency rule include: definition of high, medium and low risk sites; a description of risk assessment criteria; the determination of when sites are allowed to close directly after completion of the site investigation in addition to after remediation; determination of when remediation by natural attenuation may be approved as the final remedial strategy for a contamination site; qualitative table values for concentrations of contaminants in soil indicating free product; qualitative groundwater values; provisions for remediation decision-making between the departments; closure processes, and; the administrative relationship between the two agencies.

Issues that are the focus of current discussions between the agencies include: tracking the achievement of remediation progress and success, and joint agency reporting of program activities.

♦ **Remedial Bid Process**

Competitive bidding of remediation programs has resulted in substantial cost savings to the program, with the projected costs to closure over 75% less than the initial proposed remedial plans.

There were 65 sites included in the first six bid rounds. The initial remedial action plans proposed for the sites totaled \$12,896,598. After competitive bidding, the winning bids totaled \$3,914,800 for completion of the remedial programs. This demonstrates savings of over \$8,981,798.

As part of the public bidding, the agencies have agreed upon a joint decision-making process for the selection of remedial bids and the setting of remediation targets.

◆ **Revenue Bonding**

The biennial budget bill resulted in several significant process changes within PECFA, including the authorization of \$270 million in revenue bonding to reduce the backlog. Two stages of bonding occurred in March and April 2000. A total of \$221,319,548 in bonding was paid out to over 3770 claims. The claim review backlog is currently less than 3 months.

◆ **Transfer of Files from Department of Natural Resources to Department of Commerce**

The revised statutes defined the high-risk sites as well as the assignment of work responsibilities between the DNR and Commerce. The statutes provide that sites defined as high risk will remain under the jurisdiction of the Department of Natural Resources. The medium and low risk sites will remain under the jurisdiction of the Department of Commerce, except those that are also contaminated with a hazardous substance other than a petroleum product or additive. The statutes also limited high risk classification to no more than 35% of the petroleum sites (excluding co-contamination sites) as of December 1, 1999. Jurisdiction of the sites was determined by December 1, 1999, and files have been transferred to Commerce as closure requests were submitted. The complete transfer of all medium and low-risk sites was initiated on June 1, 2000, and completed by July 31, 2000. Over 1800 files were transferred to Commerce during this period.

◆ **Cost Controls**

The Department of Commerce is in the process of developing rules for site priority categorization, deductibles, the bidding process, cost caps, service fees, and performance and cost reporting. The department is directed to:

- Affirm that reimbursement for sites was limited to the least costly method of completing the remedial action activities while complying with the groundwater enforcement standards.
- Require increased use of the competitive bidding process to assist in determining the least costly method of remedial action.
- Increase the deductibles for many site owners.
- Reduce the reimbursement for interest costs as applicants' gross revenues increase, and;
- Establish a role for a schedule of usual and customary costs.

**SUMMARY OF ACTIVITIES RELATED TO
PETROLEUM STORAGE REMEDIAL ACTION; FINANCIAL ASSISTANCE
AND PETROLEUM STORAGE TANK DISCHARGES**

January 1 through June 30, 2000

The following information summarizes the activities conducted within the Program during the first six months of CY2000 (January 1 through June 30, 2000) as directed in 101.143 (11).

1. STATUS OF REMEDIATION OF PETROLEUM SITES

The following is provided for each petroleum product storage tank system and home oil tank system from which a discharge has occurred and for which remedial activities began during the period from 1/1/00 through 6/30/00:

- (a) the date of receipt of the SIR
- (b) a list of the environmental risk factors identified at the site
- (c) the year in which the closure approval is expected to be issued

A list of sites by the date of receipt of the site investigation report (SIR) is prepared and provided as Attachment A. The list of environmental risk factors is provided by the Department of Natural Resources, and is also provided in Attachment A.

For the third requirement under this section, the departments are not able to provide the year in which closure approval is expected at this time. This information will be submitted in the annual reporting required from the consultants (on behalf of the responsible parties) as directed under 101.143(2)(I)2, Stats. The joint rules specifying the content and timing of these reports were promulgated in emergency rule COMM47/NR746 on May 17, 2000. These rules specify that the first report must be submitted no later than January 1, 2001, and subsequent reports must be submitted annually thereafter. This information will be available for reporting in the January 2001 semiannual report.

2. NOTICES RECEIVED AND CLOSURE APPROVALS

The number of notices received under s. 101.143(3)(c)4, Stats by the Department of Commerce is provided below:

PECFA-Eligibility Notices Received

Notices Recd - s. 101.143(3)(c)4, Stats.	January 1, 2000 – June 30, 2000	Total
PECFA Occurrences Reported	187	12,852

The number of closure requests approved by the Departments is provided below:

Petroleum Site Closures under the Program

Closure Activities	January - June 2000			Total Program through July 2000		
	Commerce	DNR	Total	Commerce	DNR	Total
Closure Requests Approved	246	216	462	2,581	9,423	12,004

3. HIGH RISK SITES

"High-risk site" is defined in the statute to mean the site of a discharge of a petroleum product from a petroleum product storage tank if at least one of the following applies:

- (a) Repeated tests show that the discharge has resulted in a concentration of contaminants in a well used to provide water for human consumption that exceeds a preventative action limit, as defined in s. 160.01 (6).
- (b) Petroleum product that is not in a dissolved phase is present with a thickness of 0.01 feet or more, as shown by repeated measurements.
- (c) An enforcement standard is exceeded in groundwater within 1000 feet of a well operated by a public utility, as defined in s. 196.01 (5), or within 100 feet of any other well used to provide water for human consumption.
- (d) An enforcement standard is exceeded in bedrock.

The following tables summarize the numbers of sites classified as high, medium and low risk as of August 1, 2000:

Petroleum Tank Sites By Risk Rank As Of 8/01/2000					
Counts By Risk Rank					
	High	Medium	Low	Unknown	Total
Sites In Both Commerce and DNR Databases					
DNR Open Sites	1,494	40	13	1,249	2,796
DNR Closed Sites	2,596	1,175	1,420	360	5,551
Commerce Open Sites	0	2,142	593	0	2,735
Commerce Closed Sites	0	975	1,606	0	2,581
Subtotal Sites in Both Databases	4,090	4,332	3,632	1,609	13,663
Sites Only in DNR LUST Database					
DNR Open Sites	304	5	5	963	1,277
DNR Closed Sites	677	675	2,114	406	3,872
Subtotal Sites Only in DNR Database	981	680	2,119	1,369	5,149
Total Sites	5,071	5,012	5,751	2,978	18,812

Open Petroleum Tank Sites, By Risk Rank 8/01/2000					
	All Open Sites	% of Open Sites	% of Open Ranked Sites	Number of Ranked Sites, Excluding Sites With Non-Petroleum Related Hazardous Substances	% of Ranked Sites, Excluding Sites With Non-Petroleum Related Hazardous Substances
High Risk	1,798	26.4%	39.1%	1,351	33.1%
Medium Risk	2,187	32.1%	47.6%	2,142	52.4%
Low Risk	611	9.0%	13.3%	593	14.5%
Unknown	2,212	32.5%	NA	NA	NA
Total	6,808			4,086	

As of August 1, 2000, 33% of the sites classified under the new definition, excluding those that are also contaminated with a hazardous substance other than a petroleum product or additive, were classified as "high risk" under the new definition. This is consistent with the statutory requirement that no more than 35% of the sites classified, excluding those with co-contamination, be classified as high risk. Considering all sites, including those with co-contamination, and those with unknown classification, DNR has jurisdiction for 60% of the sites and Commerce jurisdiction for 40% of the sites. There were 2,561 unclassified sites as of December 31, 1999; this number has dropped to 2,212 as of July 31, 2000. The remaining unclassified sites will be classified when sufficient information to make a decision is submitted to either of the agencies.

4. ENGINEERING CONSULTING FIRMS PROVIDING SERVICES TO CLAIMANTS

The name of each firm providing engineering consulting services under the Program is included in the list of PECFA-eligible consultants, which is provided as Attachment B. In several cases where the consulting firm has offices that are independently registered, the firm name will be listed more than once to account for all the registered locations. This list currently includes 254 engineering consulting firms.

A list of the number of claimants to whom the engineering firms are providing services is provided in Attachment C. Similar to the list of PECFA-eligible consultants, there are several firms that are listed more than once. The list of companies currently providing services to claimants within the Program includes 179 firms.

5. CHARGES FOR ENGINEERING CONSULTING SERVICES

The charges for engineering consulting services for site activities within the Program (including closure requests as well as sites in status other than closure) were \$27,181,942. It is important to note that these were not costs paid out during the first six months of CY2000, but rather, are a total of the engineering consulting costs included in claims which were submitted and reviewed during calendar year 1999. A breakdown of the current charges to the program for the reporting period is included in Attachment D.

The total charges for engineering consulting services for petroleum sites claimed for the ten-year period from January 1989 through June 30, 2000 were \$319,116,402. A breakdown of the total charges for Program costs (claimed to date) is included in Attachment D.

6. CHARGES BY PROVIDERS OTHER THAN ENGINEERING CONSULTING FIRMS

The charges by service providers other than engineering consultants for services for which reimbursement is provided under the Program (including excavating, hauling, laboratory testing, and landfill disposal) are provided below, and a breakdown of the total charges for program claims is provided in Attachment D.

The chart summarizes the costs that were submitted to the Department during the first six months of CY2000 (not those costs paid out), as well as the total costs submitted to date. These costs are further explained below:

	Program Costs for 1/2000 – 6/2000	Total Program Costs 1989-6/2000
Backfill Costs	1,430,913	21,236,810
Excavation Costs	1,661,858	29,863,115
Laboratory Analysis	2,853,119	56,750,631
Interest	22,873,576	125,951,421
Remedial Equipment	5,673,905	102,643,625
Shipping/Trucking	1,626,888	26,273,797
Soil Boring/Well Drilling	3,011,470	46,805,933
Thermal/ Landfill/ Disposal Costs	5,300,570	113,501,072
Other Costs	526,471	6,583,262
Non-Eligible Amounts	4,955,644	47,111,792
TOTAL	\$ 49,914,414	\$576,721,458

7. DISPUTE RESOLUTION

There were no dispute resolution issues between the departments during this reporting period related to the annual review reporting, as the annual review information has not yet been provided. These annual reviews will begin after the initial annual reports are submitted by the consultants (January 1, 2001).

8. MONITORING OF QUESTIONABLE CLAIMS & COMPLAINTS, INCLUDING FRAUD

The PECFA Bureau continues with the following on-going strategies for identifying possible fraud in the program:

During claim review, staff actively watch for evidence of fraud within the program, including compliance with bid procedures as well as appropriateness of information provided in documents submitted. A follow-up audit is conducted if there is enough information available to pursue an investigation.

The Department of Commerce has finalized a contract with the Department of Justice to fund two additional staff within the Department of Justice - Division of Criminal Investigation to provide assistance in the identification and evaluation of potential fraud cases, compilation of proof to enable prosecutors to take appropriate legal action, documentation of fraud investigations, and testimony in court.

When complaints are received from claimants regarding engineering consulting firms (non-fraud issues), the complaints are entered and tracked in "consultant complaint folders". These complaint folders are maintained on a consulting-firm basis. In addition, the Department of Commerce regularly refers claimant to the Department of Regulation and Licensing, where the complainant has additional recourse.
