

B

Dear Members of the 1999 Joint Committee on Finance,

I am a MADISON AREA TECHNICAL COLLEGE student. I am one of the 450,000 students representing 16 districts of the Wisconsin Technical College System. I am concerned about the proposed 1999-2001 state budget and the lack of increases in general state aid to technical colleges. This lack of increase funding has occurred over the past 20 years, **dropping 41%**. Educational investment is not only important for my education now but important for the future of our community as a whole.

I ask you to fund the Wisconsin Technical College System at the level requested by the WTCS Board (4.4% and 4.8% respectively for each year of the budget), in order to continue this educational investment. I would like other citizens to have the opportunity I have had. This would be possible only through an increased investment in the technical colleges.

This lack of increase funding has occurred over the past 20 years, dropping 41%. Educational investment is not only important for my education now but important for the future of our community as a whole.

I ask you to fund the Wisconsin Technical College System at the level requested by the WTCS Board (4.4% and 4.8% respectively for each year of the budget), in order to continue this educational investment. I would like other citizens to have the opportunity I have had. This would be possible only through an increased investment in the technical colleges.

Dear Members of the 1999 Joint Committee on Finance,

I am a MADISON AREA TECHNICAL COLLEGE student. I am one of the 450,000 students representing 16 districts of the Wisconsin Technical College System. I am concerned about the proposed 1999-2001 state budget and the lack of increases in general state aid to technical colleges. This lack of increase funding has occurred over the past 20 years, **dropping 41%**. Educational investment is not only important for my education now but important for the future of our community as a whole.

I ask you to fund the Wisconsin Technical College System at the level requested by the WTCS Board (4.4% and 4.8% respectively for each year of the budget), in order to continue this educational investment. I would like other citizens to have the opportunity I have had. This would be possible only through an increased investment in the technical colleges.

I ask you to fund the Wisconsin Technical College System at the level requested by the WTCS Board (4.4% and 4.8% respectively for each year of the budget), in order to continue this educational investment. I would like other citizens to have the opportunity I have had. This would be possible only through an increased investment in the technical colleges.

Dear Members of the 1999 Joint Committee on Finance,

I am a MADISON AREA TECHNICAL COLLEGE student. I am one of the 450,000 students representing 16 districts of the Wisconsin Technical College System. I am concerned about the proposed 1999-2001 state budget and the lack of increases in general state aid to technical colleges. This lack of increase funding has occurred over the past 20 years, **dropping 41%**. Educational investment is not only important for my education now but important for the future of our community as a whole.

I ask you to fund the Wisconsin Technical College System at the level requested by the WTCS Board (4.4% and 4.8% respectively for each year of the budget), in order to continue this educational investment. I would like other citizens to have the opportunity I have had. This would be possible only through an increased investment in the technical colleges.
