

PAPER BALLOT
**Committee on Insurance, Tourism, Transportation and
Corrections**

SENATE BILL 448

Relating to: size and weight limitations for vehicles and combinations of vehicles transporting biosolids from a facility that recycles or processes metallic or nonmetallic scrap. **By Senator Clausing and cosponsored by Representative Rhoades.**

NOTE: According to the authors, this legislation cures a problem for a municipal waste recycling facility in Ellsworth. Ellsworth Biosolids plant accepts waste from 11 municipalities which it processes and markets as fertilizer and lawn care products. Up to 8,000 gallons of waste can be transported to the facility since it qualifies as "recyclable waste." However, after processing the "recyclable waste" classification no longer applies and only 6,000 gallons may be transported at one time. SB 448 creates a narrow exemption to current law which will alleviate the problem.

The amendment (LRBa2160/1) represents language requested by Department of Transportation. It narrows the scope of the bill yet the achieves the primary objective of the legislation.

MOTION: By Senator Breske for introduction and adoption of Senate Amendment 1 (LRBa2160/1 – attached) to Senate Bill 448.

Aye
 No

MOTION: By Senator Breske for passage as amended.
